THIRTY-THIRD ANNUAL REPORT.

To the Trustees and Members of the American Museum of Natural History :

I have the honor to submit herewith a statement of the proceedings of the Museum for the year 1901.

FINANCES.—The Treasurer's Report is given on pages 41 to 47, inclusive, presenting in detail the receipts and disbursements for Endowment and Maintenance separately.

Maintenance.—The estimated cost of maintaining the Museum, as shown in the Budget, approved by the Trustees, was \$23,059 in excess of the city appropriation of \$130,000. As the year progressed, circumstances permitted a reduction of the cost of maintenance, and the actual deficit December 31st was \$17,773.75. This shortage in the receipts for maintenance was, as heretofore, paid by the Trustees, who have contributed \$268,167 for this purpose since the opening of the Museum.

The subscriptions received from the Trustees and others whose names are noted in the Treasurer's Report, enable the Museum to commence the new year with a cash surplus of \$7,641.21.

Endowment Fund.—The Trustees have received the legacy of \$25,000 bequeathed to the Museum by their late colleague, Oswald Ottendorfer, and \$5,000 from the estate of the late Henry Villard. These bequests were paid in full; the payment of the inheritance tax having been assumed by the executors. The entire sum will be invested and the income used solely for the increase and betterment of the collections.

BOARD OF TRUSTEES.—Professor Henry Fairfield Osborn was made a member of the Board of Trustees and elected Second Vice-President at the annual meeting held in February, 1901.

MEMBERSHIP.—During the past year the Museum gained 155 new annual subscribers; the loss by death and resignation was 46, leaving a net gain of 109 in this grade of membership. Mrs. C. P. Huntington, Mrs. Frederick F. Thompson, Miss Susan Dwight Bliss and Messrs. John L. Cadwalader, George S. Bowdoin, Archer M. Huntington, George Foster Peabody, John D. Rockefeller, Andrew Ellicott Douglass, John D. Rockefeller, Jr., Jacob H. Schiff, John Taylor Terry, Jr., and Rev. Roderick Terry, D.D., were elected "Patrons."

Mr. William Lanman Bull and General Egbert L. Viele, U. S. A., were elected "Fellows," and the following-named persons were elected "Life Members": Mrs. Joseph M. White, Miss Georgette T. A. Collier and Messrs. George Foster Peabody, Alfred R. Whitney, John B. McDonald, Silas D. Webb, Jacob Rubino, Thomas C. Bushnell, David L. Bruce-Brown, W. R. Peters, George Blumenthal, L. G. Woodhouse, W. H. Perkins, Louis Haupt, M.D., and V. H. Jackson, M.D., D.D.S.

It is with much regret that I record the decease of George T. Bliss, Francis O. Matthiessen and Andrew Ellicott Douglass, of the list of Patrons, and J. H. Dunham, Horace Gray, Samuel B. Schieffelin and Loomis L. White, Life Members.

Thirty-five annual contributors, whose names are recorded at the close of the list of Annual Members, have died during the year.

TRANSPORTATION.—I acknowledge with many thanks the valuable assistance received from several railroad companies in granting transportation to the persons engaged in the various expeditions sent into the field by the Museum. For these courtesies we are indebted to the following corporations: The Wabash and Missouri Pacific systems, Southern Pacific Company and connecting steamship lines, the Atchison,

SULPHUR FROM CIANCIANI, ITALY.

A specimen in the Bement Collection of Minerals; presented by J. P. Morgan, Esq.

Topeka & Santa Fé system, Denver & Rio Grande, Erie system, Chicago & Northwestern, Chicago, Milwaukee & St. Paul, the Burlington system, the Northern Pacific, Great Northern, Canadian Pacific and the Mexican Central and Mexican International Railway Companies.

ATTENDANCE.—The use of the collections by public and private educational institutions is a marked feature of the work of the Museum; many of these pupils and teachers come from nearby towns and cities, nearly twenty per cent representing schools in New Jersey, while delegations from Connecticut, Pennsylvania and Virginia are noteworthy. The record shows that 361 teachers and 4,959 pupils made use of the collections during the year. The total attendance of visitors during the year was 461,026.

The Museum was closed in the evening during the Summer months to permit needed repairs to the lighting plant to be made.

DEPARTMENT OF MINERALOGY.—The gift to the Museum by Mr. J. Pierpont Morgan of the famous Bement collection of minerals at the close of the year 1900 was briefly noticed in my last Annual Report, but an extended reference to this collection, which is one of the most valuable individual gifts ever received by the Museum, could not be made at the time of preparing that report, because the specimens had not then been unpacked and placed in the exhibition cases. The acquisition of this immense collection at once made desirable the erection of an independent Department of Mineralogy. The new department was organized at the beginning of the year, and the Trustees installed as Curator, Mr. Louis P. Gratacap, who had had the care of the minerals for several years, while they were still under the charge of the Curator of Geology. The shells remaining in the central hall on the fourth floor of the Museum building were removed to the fifth floor, the minerals of the former Museum collection were removed from exhibition in the desk cases in the western half of the same hall, and from the smaller hall, and the space thus freed was de-

voted to the installation of the newly-acquired Bement collection. The Curator reports that this collection was found to contain about 12,000 specimens, all of them exhibition material of the highest grade, representative of most of the known established species. The available space, furthermore, was found to be inadequate to the proper display of the Bement collection alone, so that it became necessary to relegate all the best specimens of the old Museum collection to the drawers underneath the cases, to form a reserve or study collection, after sorting therefrom the material that could justly be considered to be duplicates.

The preliminary arrangement of such a collection, which has been done in accordance with the latest edition of Dana's *System of Mineralogy* and the preparation of the labels is a task of considerable magnitude. The installation was carried forward so rapidly, however, that it was feasible to throw the collection open to the view of the members of the Museum and their friends on Members' Day, November 26, and to the general public soon thereafter. Many inquiries had been made before that date by the persons interested in mineralogy as to when the Bement collection would be open to view, and the mineral halls have since been frequently visited both by students of the science and by those who are fond of minerals merely as objects of beauty. It is not too much to say that our Institution now possesses the best and most beautiful exhibition series of mineral specimens in this country, and one of the finest in the world. In his report the Curator calls attention to the facts that not more than half of this great collection has yet been provided with labels or installed on permanent mounts, and that much remains to be done in the way of providing group and explanatory labels, maps to show the geographical distribution of the more common and important minerals, and other accessories for rendering the collection attractive, intelligible and instructive to the average visitor.

As a part of the Bement collection the Museum received a series of meteorites that deserves more than the passing notice which can be given it here. The meteorite collection

contains representatives of nearly five hundred falls and finds, and ranks as one of the largest collections of fragments of these visitors from space. At present, for lack of other case-room, these valuable and interesting specimens are crowded together in some of the desk cases.

The Gem Collection.—At the outset of its existence the Department of Mineralogy was confronted with the problem of installing the Gem collection, which had been greatly enlarged, more than doubled, in fact, by the acquisition of the magnificent Tiffany exhibit at the Universal Exposition at Paris. The purchase of this exhibit was made possible through the generosity of Mr. J. Pierpont Morgan, to whom, indeed, we were indebted for our first gem collection, a series of stones which compared favorably with others of its kind and gave delight and instruction to thousands of visitors. The gem collection has been installed in an attractive manner at the southern end of the hall west of the Mineral hall. To undertake an enumeration of the salient points of a collection like this would be quite without the scope of this report, but attention may be called to the marvelous display of cut and uncut materials in the groups of corundums (sapphires), beryls (emeralds), topazes, garnets, tourmalines, chrysoberyls (alexandrites), opals, amethysts, diamonds, golds and pearls. The carved and engraved vases and other objects of jadeite, nephrite, rhodonite and rock crystal attract the notice of every visitor. A descriptive catalogue of this noble collection is being prepared by Mr. George F. Kunz.

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALÆONTOLOGY.—The work of the Curator of the department carried the task of labeling the palæontological collection well forward, 2,187 exhibition labels, bearing generic, specific and authors' names, geological formation and locality, having been prepared for individual specimens. The great amount of geological material which was received with the James Hall collection, and which has not been taken from the original boxes heretofore for lack of room in which to store the speci-

mens, has been carefully sorted and the valuable portion placed in drawers where it is accessible. The large collection of fossil remains of fish and other organisms from the Mt. Lebanon region in Syria, presented by the Protestant College at Beirût, through Rev. D. Stuart Dodge, D.D., of this city, is the most important gift received by the department during the year. Caring for this material required considerable time and attention

The publication of the Catalogue of types and figured specimens in the palæontological collection of the department, which has been in progress for several years, has been completed. This Catalogue emphasizes in marked manner the importance of this portion of the Museum's property, and the work upon it has developed the fact that above one thousand more types and figured specimens are in the collection than were originally supposed to be there. The following extract from the preface of the volume of the *Bulletin* which is devoted to the Catalogue will indicate clearly the scope and character of the work and the collection:

"The chief palæontological possession of the Geological Department of the American Museum of Natural History is the great James Hall collection which was purchased in 1875 from the celebrated palæontologist, and the principal feature of that collection is the large number of type and other illustrated specimens, especially of Palæozoic species, which it contains. This Hall collection may well be considered the standard reference collection for all workers in North American Palæozoic palæontology; hence the desirability of publishing a complete record of these valuable specimens. Other collections have been added to the department from time to time through exchange and other means, but with few exceptions they contain no types. Most of the "figured specimens" in the series are those which were identified, redescribed, illustrated and published by Professor Hall in the early volumes of the Palæontology of New York, and therefore have almost the dignity and value of types.

"Of the specimens described and illustrated in the quarto volumes of the Palæontology of New York, the Museum possesses two-thirds of those in Volume I, covering the Cambrian and Lower Silurian systems; nearly eight-tenths of those in Volume II, extending from the Medina to the Onondaga stages, inclusive; three-fourths of those in Volume III, which treats of the Lower Helderberg and Oriskany groups; more than one-third of those in Volume IV, which describes the Brachiopoda of the Devonian system from the Upper Helderberg to the Chemung; about thirty per cent. of the specimens illustrated in Volume V, Part I, which is devoted to the Lamellibranchiata of the Upper Helderberg (or Corniferous), Hamilton and Chemung groups; and a nearly equal proportion of the Cephalopoda and Gastropoda illustrated in Volume V, Part II. The collection, however, contains only about 74 of the specimens of Bryozoa given in Volume VI, and about 70 of the Crustacea illustrated in Volume VII of the Palæontology of New York. Much of the

UINTACRINUS SOCIALIS Grinnell. FOSSIL CRINOID FROM KANSAS.

Slab five feet four inches long and three feet two inches wide.
Gift from Frank Springer, Esq.

material for Volume VIII, on the Brachiopoda, was prepared for publication prior to 1876, hence a large proportion of the specimens used for illustrations are to be found in the American Museum, especially of those used for the plates bearing the name of R. P. Whitfield.

“Most of the species in the volumes above mentioned were first published in the Regents’ Reports on the Condition of the State Cabinet (or State Museum, as it is now called), but material from other States than New York was also used in these reports, and the American Museum has the fossils from the Wisconsin-Minnesota Cambrian beds described and figured in the sixteenth Report; the Niagara material from Waldron, Ind., published in the twenty-eighth Report; and the graptolites and the Wisconsin Niagara species given in the twentieth Report. The Trenton fossils from Wisconsin described in the Report of Progress of the Geological Survey of Wisconsin for 1861 are here, and the original descriptions have been republished with illustrations and notes by R. P. Whitfield in the Memoirs of the American Museum of Natural History, Volume I, Part II. The Museum has all the Warsaw fossils from Spergen Hill, Ind., originally published without figures by Hall in the Transactions of the Albany Institute, Volume IV, and republished by Whitfield with figures in Bulletin Am. Mus. Nat. Hist., Vol. I. The collection also includes the type fossils from the Clinton beds at Arisaig, Nova Scotia, described by Hall in Volume V of the Canadian Naturalist and Geologist; many of the Devonian and higher forms described by the same author in the Geology of Iowa and the Supplement to the Iowa Report, the latter being republished with figures, by Whitfield in Mem. Am. Mus. Nat. Hist., Vol. I, Part I; several type specimens of the Dictyospongiæ, some of which have been described by Whitfield in the Bulletin of the Am. Mus. Nat. Hist., Vol. I, and others by Hall and Clarke in a Memoir on the Paleozoic Reticulate Sponges; Hall and Meek’s types from the Cretaceous of the Bad Lands of Dakota, Nebraska and Wyoming, described in the Memoirs of the American Academy of Science and Arts, Vol. V; the fruits and seeds from the Eocene beds at Brandon, Vt., described by Lesquereux and published in Hitchcock’s Geology of Vermont, and some of the Cephalopoda, Gastropoda and Lamelli-branchiata described by Whitfield in his U. S. Geological Survey monographs on the Cretaceous and Tertiary fossils of New Jersey. The Museum also has the Holmes collection, which includes more than two hundred of the specimens described and figured in Tuomey and Holmes’s Pleiocene Fossils of South Carolina and in Francis S. Holmes’s work on the Post-Pleiocene Fossils of South Carolina. The fossils described in the various bulletins and memoirs of the American Museum of Natural History are here as a matter of course. In addition to the republication of certain of Hall’s types already mentioned, there have been described and illustrated in the Bulletin a large series of fossils of Chazy and Birdseye age from Fort Cassin, Vt., Beekmantown, N. Y., and other localities on Lake Champlain, and many Cretaceous forms from Beirût, Syria, and from Jamaica, W. I.

“The term ‘type’, as employed in the Geological Department of the American Museum, embraces not only the specimens actually used by an author in the original description of a species, but also those specimens which have been used by the same author in the further elucidation of the species in subsequent publications. The types may or may not have been illustrated in connection with the first publication. ‘Figured specimen’ is the term applied here to the specimens which have been identified with a species by another person than the author of the species and which have been illustrated in some publication. From the standpoint of the student and investigator, types are the most valuable portion of any collection, and should, therefore, be marked in some conspicuous manner and be preserved with the greatest

care. All the types and figured specimens in this Department are individualized by the use of a small rhomb of emerald green paper securely gummed to each."

As is shown in the following tabular summary, there are in this department of the Museum 8,345 type and figured specimens, representing 2,721 species and 190 varieties:

PARTS.	TYPES.			FIG'D SPECIMENS.			REFERENCES.	
	Species.	Varieties.	Specimens.	Species.	Varieties.	Specimens.	Page.	Figure.

Totals....	2222	71	6166	499	119	2179	6561	14324

Expedition.—Dr. E. O. Hovey, the Associate Curator of the department, spent about two months in the field, collecting invertebrate fossils from Jurassic and Cretaceous beds at various localities in the Black Hills region of South Dakota and Wyoming. The Jurassic fossils were especially needed, but the Cretaceous forms are likewise of great value, some of them enabling Professor Whitfield to complete important investigations which he began in 1876, when at work on the fossils collected by Messrs. Newton and Jenney for the United States Geological Survey of the Black Hills.

Accessions.—Next to the fossil remains from Mt. Lebanon, Syria, already mentioned, the chief donation to the department was a large and handsome slab of crinoids from the Niobrara Chalk beds of Kansas, given by Frank Springer,

Esq., of East Las Vegas, New Mexico. There has been deposited with the Museum by the Geological Board of Georgia a series of handsome eight-inch cubes illustrating the building stones of that State. The series, which was collected for the State of Georgia by Dr. W. S. Yeates, State Geologist, comprises thirty-eight specimens and includes gray, homogeneous granite of several shades, porphyritic granite, gneiss, sandstone, limestone and mottled and white marble. Mention should be made also of fossil cycad trunks from the Jurassic (?) beds of the Black Hills, obtained early in the year by purchase. These additions and some minor purchases, together with the material collected in the Black Hills, have rendered the year an unusual one in the growth of the department. It is to be hoped that the rate of increase and improvement can be maintained in the future.

DEPARTMENT OF MAMMALOGY AND ORNITHOLOGY.—The Curator of this department reports that the growth of the collections under his charge has been unusually and satisfactorily large; 1,512 specimens having been added to the series of mammals and 3,195 specimens to the series of birds. One hundred and sixty mammals were received in the flesh by donation from the New York Zoölogical Society and the Central Park Menagerie. Among these there are several specimens of great importance. The museum is indebted, furthermore, to the Duke of Loubat for a valuable collection numbering 120 specimens of mammals and 110 birds from the State of Jalisco, Mexico, presented by him. Seven bird groups have been placed in the exhibition halls, through the generosity of Mr. John L. Cadwalader, who provided the means for the collection and preparation of the specimens.

The acquisitions through museum expeditions have been largely in excess of those obtained in this manner in previous years, and have included an immense amount of valuable material. This work for the department has been carried on by Mr. Samuel L. Klages in Venezuela, by Mr. N. G. Buxton in Siberia, under the auspices of the Jesup North Pacific expedition, by Mr. J. H. Batty in Chiriqui and Panama, and by

Mr. H. H. Smith in Colombia. Furthermore, an expedition known as the A. J. Stone Expedition was organized early in the year by Madison Grant, Esq., and other friends of the Museum, the work of which is to cover a period of three years. Mr. Stone, accompanied by an assistant from the Museum, reached Alaska at the opening of the season, and collected mainly on the Kenai and Alaskan peninsulas. The results of the first season's work are very satisfactory, including about fifty large mammals, obtained with special reference to mounting in groups, about two hundred small mammals, and several hundred birds. Since the Museum has never before received collections from this part of America, these specimens form a very important addition to our collections.

The following groups representing birds and their habits have been added to the series in our halls: The Bird Rock Islands of the Gulf of St. Lawrence, a large group illustrating several kinds of sea birds; the Red-winged Blackbird, the Marsh Wren, the Phalarope, the Water Ousel, the Coot, the Yellow-headed Blackbird, the Passenger Pigeon. An illustrated "Guide Leaflet" of twenty-four pages descriptive of the Bird Rock Group was prepared by Mr. Frank M. Chapman, the Associate Curator, and issued as a supplement to the *American Museum Journal* for October. This description has proved to be of great interest and value to visitors.

DEPARTMENT OF ANTHROPOLOGY.—The Curator of the Department of Anthropology reports that a large amount of work has been done by the several divisions and sections, but that much remains to be done before matters will be in readiness for the Thirteenth International Congress of Americanists which convenes at the American Museum in October, 1902. During the year to which this Report refers, expeditions under the auspices of this department were maintained in several parts of the United States, both east and west, and in Alaska, British Columbia, Mexico, Central America, Bolivia, Peru, Greenland, Siberia, Japan, Corea and China, resulting in large additions to the collections and furnishing much material for description as well as for exhibition. The results which

LEFT HALF OF THE BIRD ROCK GROUP.

thus far have followed from these expeditions have received favorable comment from scientific institutions and individuals both at home and abroad. With the accumulations of the past year, however, and the vast amount of material which will arrive at the Museum during the coming year, the cost of publishing the memoirs resulting from these extensive investigations naturally becomes a serious item. It does not seem proper to ask those who have generously placed parties in the field, also to provide the funds for publishing the scientific results of their investigations; on the other hand, the general funds of the Museum are not sufficient to meet the obligation.

The Jesup North Pacific Expedition.—The work of the Jesup expedition has progressed satisfactorily, and important collections have been received from Mr. James Teit, Mr. George Hunt, Dr. John R. Swanton and Dr. C. F. Newcombe, and from Messrs. W. Jochelson and W. Bogoras. The collections of Messrs. Jochelson and Bogoras open up an entirely new field for the Museum, illustrating as they do the life of all the tribes of the extreme northeastern part of Siberia. The investigations of these gentlemen among the Chukchee, the Koryak and Yukagheer tribes, which live on the coast of the Sea of Okhotsk, have been completed and the material collected during their course has been forwarded to the Museum. Mr. Bogoras is on his way to New York, but Mr. Jochelson is still in Siberia.

The collection of models of totem poles, with full explanations, made by Dr. Swanton is particularly worthy of mention, and he has succeeded by means of this collection in illustrating the significance of these peculiar emblems. One of the most striking objects sent in from the Queen Charlotte Islands is a large, well-preserved totem pole fully fifty feet in height. This has been erected in the open space of the stairway in the West Corridor hall. Dr. Swanton's collections also include a series of beautifully carved spoons, with full explanations of their ornamentation. A large part of Mr. Hunt's collections was obtained at the northern end of Vancouver Island. A

group illustrating the life of the tribes living along the Amur river has been prepared and is awaiting a suitable case.

The Mrs. Morris K. Jesup Expedition.—Early in the year Dr. A. L. Kröber finished his field work in connection with the investigation of the Arapaho Indians, and his collections at present form the main portion of our material from the Indians of the plains. The publication of the results of the important investigations which have been carried on among the Arapaho remains to be done, the completed manuscript and illustrations being already in hand. A large group containing many small figures representing the religious ceremony of the Arapaho, known as the “Sun Dance,” has been prepared.

The Huntington Expedition.—The field work of the Huntington California expedition of 1900 came to a close early this year, and the collections received from this expedition, which was in the charge of Dr. Roland B. Dixon, are all on exhibition. Mrs. C. P. Huntington and Mr. Archer M. Huntington have provided for the continuance of this work, in which the late Mr. Collis P. Huntington was so much interested.

The B. T. B. Hyde and F. E. Hyde, Jr., Expedition.—Owing to the large amount of work to be done on material collected by this expedition in former years, in order to get it catalogued and ready for exhibition, field work in the Southwest was largely suspended. Some of the material mentioned in my last report as having been obtained by this expedition has been arranged in the cases in the southwestern portion of the West hall of the second floor. Especial attention may be called to the remarkable collection from the burial caves and cliff houses of the Grand Gulch region in Utah, to the collections from the Zuñi and Hopi Pueblos and to the extensive display of turquoise ornaments and other objects from the ruined Pueblo Bonito in the Chaco cañon, New Mexico. All the available cases, however, have been filled, and only a very small portion of the Hyde expedition material has been actually placed on exhibition. The Messrs. Hyde have generously provided for

the publication of Dr. Washington Matthews' important account of the Navaho ceremony known as the "Night Chant." This is a valuable contribution to American ethnology, and is the result of more than twenty years' work by the author. Dr. Matthews' account will form an entire volume of our Museum Memoirs, with several plates and text illustrations, and will be issued early in 1902.

Mexican Expedition.—Mr. M. H. Saville spent the winter of 1900-1901 in continuing his explorations of the ruins of Mitla, under the grant made for the purpose by the Duke of Loubat. The scientific results of these explorations are important, and have led to the solution of several problems connected with the architecture of the celebrated ruins in the vicinity of Mitla. The expedition also succeeded in obtaining a pre-Columbian map or "lienzo" on native cloth, which is a unique example of this class of American codices, and a specimen of Mexican painting on maguey paper, consisting of a map of Teotihuacan. These maps have been framed and placed on exhibition in the Mexican hall. The department furthermore has received two reproductions of pre-Columbian codices from the Duke of Loubat, the Tonalamatl Aubin and the Codex Féjervary-Mayer, which add greatly to our exhibit of ancient Mexican picture writings.

The Duke of Loubat having provided for another expedition to Mexico, Mr. Saville left New York about the middle of December to complete the work at Mitla, and to carry on explorations in the Oaxaca valley.

Expedition to China.—Through the generosity of a friend of the Museum, who desires to have his name withheld, our institution has been enabled to enter upon ethnological investigations in China. This work has been intrusted to Dr. Berthold Laufer. Two collections are the result of the first year's work of this expedition, one of which has been received and the other is on its way to New York. The undertaking is to continue for three years, and will furnish us with abun-

dant material for illustrating the essential features of the life of the Chinese people.

Explorations in New Jersey.—The exploration of the Delaware Valley, provided for by Dr. F. E. Hyde, has been continued by Mr. Ernest Volk, as in previous years, and many important facts relating to the occupation of the region about Trenton in very early times and bearing upon the evidence of pre-Glacial man in America have been obtained. On account of extensive excavations now being made by the Pennsylvania Railroad Co., exceptional opportunities for the further investigation of the Trenton gravel deposits are offered, and the Museum is to be congratulated upon the fact that Dr. Hyde has provided for the continuation of the research through the coming year. The vast amount of material obtained in the Delaware valley by Mr. Volk, during his long-continued explorations for the Museum, has been unpacked and assorted by him and arranged in trays according to the localities and special excavations, but it has not been catalogued, on account of the importance of having the explorer himself attend to the work.

Local Explorations.—During the summer, the work in local archæology was continued, and rock-shelters near Westchester were explored from which much of importance relating to early Indian life was learned. Most of the season was devoted to the study of several village sites and shell heaps on Long Island, especially to some near Oyster Bay and Glen Cove. At the latter place the work was greatly facilitated by the active coöperation of Mr. G. J. Price, on whose family estate many of the researches were made. The opportunities for investigations of this kind are rapidly disappearing, and every effort should be put forth to secure all available material, in order to give an accurate picture of the Indian life of the coast at the time of the arrival of our own race. Additional contributions are needed for this work.

In the North hall the whole Emmons Alaskan collection was re-arranged according to tribes and the material con-

CASE OF PREHISTORIC BASKETS AND OTHER OBJECTS FROM SOUTHEASTERN UTAH.
Hyde Expedition.

siderably condensed, changes which were made necessary by the important additions from the Jesup North Pacific expedition. The accumulation of additional material from the North American Indians made it necessary to remove part of the Lumholtz Mexican material to the temporary "Missionary Hall" in the southeast corner of the second floor. The Pueblo pottery was moved to the second floor, and the cases formerly occupied by it have been devoted to southwestern basketry. All the South Sea material, furthermore, has been removed from the West hall and replaced by Eskimo material and by the rest of the Laufer material from the Amur river. The detailed re-arrangement of the North hall is still in progress.

The West and Southwest halls on the second floor have been opened to the public. The former contains at present a portion of the material sent from China by Dr. Laufer, the Pueblo pottery, the Briggs collection of baskets and a small portion of the extensive collections made in the Southwest by the Hyde expedition. Especially noteworthy in the last-named collections, is the display of baskets and other material from the graves of the "Basket Makers" of southeastern Utah. The Southwest hall contains an exhibit illustrating in part the archæology of the United States. Among its special features there is a representation of the culture of tribes once inhabiting the Saginaw Valley, Michigan. This collection was made by Mr. Harlan I. Smith, the Assistant Curator of the department, during his residence in the region previous to his connection with this institution, and it has been presented to the Museum by him. He has arranged the collection with illustrative photographs and maps, and has prepared a descriptive guide leaflet with numerous illustrations. All of the South American archæological collections have now been placed on exhibition, except the series from Santa Marta, Colombia, recently received from Mr. F. C. Nicholas. They occupy the West Gallery hall. The acquisition of the Gaffron collection, recently purchased by the Trustees, has greatly increased the importance of the Peruvian exhibit. The Garces collection of gold and silver objects from the Lake

Titicaca region, a gift from Mr. J. Pierpont Morgan in a former year, and a number of other similar objects, none of which have been exhibited before, have been arranged in a special case in this hall. The large additions to the South American collection during the past two years makes necessary the re-arrangement of many of the cases before their final labeling can be accomplished.

In order to further the North American research work, an agreement has been made with the Bureau of Ethnology in Washington, by means of which the Bureau contributes certain sums for linguistic research, while the Museum pays for ethnological field work, a plan of coöperation which is proving very satisfactory. During the last year two expeditions were in the field working on this basis, Mr. H. H. St. Clair, Jr., collecting among the Shoshone of Wyoming and Oregon, and Mr. William Jones among the Sac and Fox Indians of Nebraska. Both these gentlemen brought back valuable collections.

Work among the caves and old village sites of British Columbia, begun in a modest way during the year, has yielded very interesting results and should be continued.

During the summer a series of casts was made at the Indian school at Carlisle, Pa., supplementing our collection illustrating the physiology and ethnology of the North American Indians.

In connection with the North American Archæological exhibit in the Southwest hall, there have been arranged two cases, illustrating the artifacts of the Iroquois and Algonkin Indians of New York State, and in other cases are exhibited the collections from village sites, rock shelters, shell heaps and various places in and near the city of New York, which had been explored under the direction of the department. Furthermore, a model of one of the rock-shelters explored in Westchester has been made in order to illustrate one phase in the life of the New York Indians. To make this exhibit still more instructive, there has been prepared a model showing the layers of accumulated material in the shelter, near

which have been placed the objects found in the upper and lower deposits.

The human skulls which have been obtained in connection with the Hyde expedition in the southwest, and the Villard and other expeditions in Peru have been arranged geographically and studied by Dr. Hrdlička, who has prepared for publication an elaborate memoir on the physical characters of the peoples of the southwest.

Special attention is called to the Ainu collection secured by Professor Bashford Dean of Columbia University during his recent visit to Japan. By the kindness of Arthur Curtiss James, Esq., to whom we are indebted already for much Ainu material, this collection has been added to our series illustrating the culture of that interesting tribe.

DEPARTMENT OF ENTOMOLOGY.—The Curator of Entomology reports that the arrangement of the exhibition collection of Beetles has progressed considerably during the year, and that it is now fairly well advanced. Enlarged drawings of some of the minute forms have been made and placed in the cases near the specimens. Such illustrations enable the visitor to form an idea of the nature of objects otherwise too small for exhibition. In March the Museum issued a Memoir on the Sesiidæ, or Clearwinged Moths, of America north of Mexico, by the Curator. The monograph consists of one hundred thirty-eight pages of text, with twenty-four text cuts and eight plates.

The Very Reverend Eugene A. Hoffman has continued his generous gifts to the department by donating more than one thousand butterflies. These are being mounted on plaster of Paris exhibition tablets, ready for display as soon as cases have been provided for their reception. This calls attention to the fact that there are already more than two thousand such specimens on hand which cannot be exhibited for lack of case room. During the autumn the Curator spent his vacation in the Black Mountains of North Carolina continuing his investigations of the previous year. This expedition added to the collections of the department more than three thousand

specimens, including many new as well as many very rare species. Mr. Beutenmüller has in preparation a monograph on "The Insect Fauna of the Black Mountains, North Carolina." On account of certain peculiarities, the study of the insect fauna of this restricted region is of high importance to science, and it is to be hoped that some friend of the Museum will enable him to carry his investigations in the region to satisfactory completion. Field work in the vicinity of New York City has been done by the Curator and his assistant, Mr. C. Schæffer, and has added many specimens of several species to the local collection.

DEPARTMENT OF VERTEBRATE PALÆONTOLOGY.—The chief event of the year was the establishment of a fund by one of our Trustees, Mr. William C. Whitney, for obtaining material to illustrate the evolution of the Horse. This enabled the Curator to send two expeditions into the field—one to eastern Colorado and one to Texas, both of which were highly successful. The Colorado party found a superb skeleton of the three-toed marsh-living Horse, *Anchitherium*, besides portions of several skeletons of the plains-living Horses and Asses. The Texas party discovered a rich quarry of Horse remains of more modern type, including the ancestor of the South American *Hippidium*. The Curator hopes to secure every step in the wonderful evolution of the Horse from the small ancestor, less than four hands high, from the lower Eocene, to the larger Horses of the lower Pleistocene, which were finally destroyed during the Ice Age. A skilled osteological preparator also has been engaged upon an exhibit of the varieties of the modern Horse produced through the agency of human selection; such as the Shetland, the Percheron and the various race horses. Together with this series are preparations of the skull illustrating the growth of the teeth and of the limbs and other parts illustrating the entire mechanics of the skeleton. Mr. Charles R. Knight has painted a set of water colors of the living types of Asiatic and African horses. Altogether this exhibit promises to be one of the most popular and instructive in the Museum.

Upper Side.

PAPILIO HOMERUS. Natural size.
A Jamaican Butterfly in the Hoffmann collection.

Under Side.

Although the expeditions were planned to secure fossil horses, incidentally several splendid specimens of other animals were discovered. Among them was the shell of a great Glyptodont, or armored Edentate, the first discovered in North America. Numerous remains of Camels, Rhinoceroses and the skull and skeleton of the great fossil Dog, *Dinocyon*, were also found.

The exploration for Dinosaurs, begun by the Museum in 1897, was continued in western Colorado, in the Black Hills region of South Dakota and in the Laramie Plains of central Wyoming. At the last point, the Bone Cabin Quarry, famous for the great discoveries that have been made there, was worked for a fourth season, yielding a number of very rare Dinosaur skulls more or less complete. In this same region another quarry, together with a quantity of very large Dinosaur bones, was purchased. The car-load of material thus obtained was loaded and transported directly to the East through the courtesy of Messrs. E. H. Harriman and J. P. Morgan.

The department has been enriched not only by the expeditions, but also by exchanges with foreign museums. Chief among these is the superb specimen of an Ichthyosaur, or Fish-lizard, presented by the Royal Museum of Stuttgart through Prof. Eberhard Fraas. It is remarkable as containing seven young Ichthyosaurs. Two noteworthy purchases have been made: The first, a magnificent Cretaceous fish belonging to the genus *Portheus*, allied to *Chirocentrus*, now found only in the Indian Ocean; and the second, a skull of a southern variety of the mammoth, *Elephas imperator*, with a pair of large tusks more than thirteen feet in length.

Reproductions of restorations made in the department have been sent to museums in various parts of the world, and new series of casts have been prepared. Among these the casts illustrating the evolution of the feet of the Horse and the Camel are of special note.

The scientific work of the Department has continued, several bulletins by the Curator and his associates and a valuable memoir on the fossil mammals of eastern Colorado having been published.

Professor Osborn not only contributed largely to the maintenance of field expeditions, as shown in the Treasurer's Report, but also spent his entire salary in promoting the work of his department.

DEPARTMENT OF INVERTEBRATE ZOÖLOGY.—This department* was established in January, 1901, with Professor Hermon C. Bumpus, as Curator. George H. Sherwood, A. M., assumed the duties of Assistant Curator in the following November. The material which has come into its care was previously under the charge of Professor R. P. Whitfield, Curator of Geology and Invertebrate Palæontology, whose energy and skill have been largely instrumental in assembling a collection in this branch of natural science which is of acknowledged credit to our institution. The series of corals is particularly fine, ranking with the best in the world. The West-Indian forms were almost all obtained by Professor Whitfield during his vacations. The most important accession to the department during the past year was a remarkable series of siliceous sponges which was purchased for the Museum by Professor Bashford Dean of Columbia University, during his recent visit to the Orient. The collection comprises thirty-seven specimens, representing twenty-six species distributed among sixteen genera. Among the specimens are several fine examples of the beautiful "Venus' Flower Basket" and related forms.

This Department has been given the charge of reptiles, batrachians and fishes, in addition to the invertebrate animals, and the Curator reports that much work has been done in the line of overhauling the large amount of material which had accumulated in the preceding thirty years. For lack of available exhibition space, almost all the specimens in these three great branches of Natural History have been relegated to storage, until the hall in the southeast corner of the ground floor can be fitted up with suitable cases for their reception and exhibition. The principal additions to the collection of

* Insects are under the care of Wm. Beutenmüller, Curator of Entomology, and molluscs are retained by L. P. Gratacap, Curator of Mineralogy.

reptiles and batrachians have come from the New York Zoölogical Society, the Central Park Managerie and the New York Aquarium.

The collection of fishes on exhibition in the Museum is very small, and consists mainly of painted wax and plaster models, resembling but slightly the fish in nature. All known methods of preserving and exhibiting fishes are unsatisfactory, but experiments for the purpose of devising some suitable means of presenting them in their natural environment and natural colors are under way, and we are warranted in saying that progress toward this desirable end has been made. Popular interest in the fishes is great, and a large exhibit of them is needed.

The acquisitions to this section of the Department have been considerable during the year. Through the courtesy of the Honorable George M. Bowers, the United States Commissioner of Fish and Fisheries, we have received a fine collection of Puerto Rican fishes, collected by the United States Fish Commission Steamer "Fish Hawk" during the investigation of the fisheries of Puerto Rico by the Government, in 1899. There are nearly two hundred specimens in the collection, representing eighty-four species, and all are in a good state of preservation. From the Jesup North Pacific expedition there have been received one hundred forty-three fishes and several reptiles and invertebrates, which were collected by Mr. N. G. Buxton in Vladivostok Harbor and Lake Khanka, in eastern Siberia. Since the fauna of that region is little known, doubtless several new species will be found in the collection. One of the most striking needs of the various sections of this department is a series of local collections of familiar forms, arranged in groups to correspond with those which are used to such good effect in several other parts of the Museum.

DEPARTMENT OF CONCHOLOGY.—At the beginning of the year, when the departments, which, for many years, had been under the care of the Curator of Geology, were subdivided, the collection of shells was removed to the charge of Mr.

Gratacap, the Curator of Mineralogy. He reports that, on account of the devotion of the central hall on the fourth floor of the Museum to the Bement collection of minerals, the shells formerly exhibited there were removed to the fifth floor, and most of them were placed in drawers for storage. The present condition of the conchological collection emphasizes in very marked manner the need of a much larger hall for its appropriate exhibition. The famous Binney and Bland collection of American land shells, for instance, which contains many type specimens, is necessarily kept in storage drawers from lack of space for displaying it.

The work done on the shell collection has included the preparation and placing of more than 2,000 individual labels in addition to maps, photographs and diagrams. The experiment is being tried of placing on exhibition aquaria showing some of the more familiar molluscs in their natural surroundings. The popularity of this feature of the Hall of Conchology is marked, and indicates the desirability of increasing the number of such exhibits. On account of the number of type specimens which it contains, the Binney and Bland collection of land shells was made the subject of an extended article by the Curator, which was published in the *Museum Bulletin*, with five maps showing distribution.

The department is indebted to Mr. Frederick A. Constable for a valuable accession to its collections, consisting of about 18,000 specimens, representing about 4,000 species. The same gentleman has given to the Library a large number of much-needed works on conchology.

NORTH AMERICAN FORESTRY.—The chief event in the history of the Jesup collection of North American Forestry was the addition of twenty-one water-color paintings by Mrs. C. S. Sargent to the series illustrative of leaves, flowers and fruits, which has been prepared at the expense of your President.

PUBLICATIONS.—In the line of publications the scientific staff of the Museum has been very active during the past year

ICHTHYOSAURUS QUADRISCISSUS Quenstedt. THE GREAT FISH-LIZARD CONTAINING YOUNG ONES.

Received by exchange with the Royal Museum, Stuttgart, Germany.

and the amount of matter issued was greater than during any other like period in our history. Of the octavo *Bulletin* there were published Part IV of Vol. XI, with 160 pages of text, comprising the catalogue of type and figured fossils noticed at greater length in another part of this Report; Vol. XIV, consisting of 422 pages, with 63 text figures and 46 plates, and Part I of Vol. XV, consisting of 370 pages, with 172 text figures and 4 plates, descriptive of the Eskimo of Baffin Land and Hudson Bay. Six parts of the quarto *Memoirs*, belonging to different volumes, were put through the press, though three of them were not actually issued until a few days after the end of the year, and therefore bear date of January, 1902. These parts contain in all 766 pages of text; and are illustrated with 82 text figures and 49 plates.

The publication of *The American Museum Journal*, which was begun in April, 1900, has been continued, and may now be considered to have passed the experimental stage. Mr. W. K. Gregory, who served the periodical as managing editor during the early and trying portion of its career, desiring to take up work exclusively in the line of vertebrate palæontology, Dr. E. O. Hovey was asked to assume the editorship of the *Journal* in September, with Messrs. Chapman, Gratacap and Gregory as an advisory board. Certain changes were instituted in the publication, the principal of which was the addition of an illustrated supplement to each number in the shape of a popular guide leaflet to some exhibit or group of exhibits in the Museum. Before the end of the year two numbers were issued, one with a guide leaflet on the Bird Rock Group, by Frank M. Chapman, and one with a similar description of the Saginaw Valley collection in the Anthropological Department, by Harlan I. Smith. These brochures evidently meet a popular want, for there is constant demand for them on the part of visitors.

The distribution of the articles in the *Bulletin* and the *Memoirs*, according to the departments from which they have emanated, is as follows:

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALÆONTOLOGY.

Bulletin, Volume XI.

R. P. Whitfield, assisted by E. O. Hovey. "Catalogue of the Types and Figured Specimens in the Palæontological Collections of the Geological Department of the American Museum of Natural History." (Pages 357-500, with title-page, table of contents, preface, etc., for the whole volume.)

Volume XIV.

R. P. Whitfield. "Notice of a New Sponge from Bermuda." (Pages 47-50, plates i-v.)

R. P. Whitfield. "Note on a Very Fine Example of *Helicoceras stevensoni* preserving the Outer Chamber." (Pages 219-220, plates xxix and xxx.)

R. P. Whitfield. "Notice of a Remarkable Case of Combination between Two Different Genera of Living Corals." (Pages 221-222, plates xxxi and xxxii.)

R. P. Whitfield. "Some Observations on Corals from the Bahamas, with Description of a New Species." (Pages 223-224, plates xxxiii and xxxiv.)

DEPARTMENT OF MAMMALOLOGY AND ORNITHOLOGY.

Bulletin, Volume XIV.

J. A. Allen. "Description of Two New Species of South American Muridæ." (Pages 39-40.)

J. A. Allen. "On a Further Collection of Mammals from Southeastern Peru, collected by Mr. H. H. Keays, with Descriptions of New Species." (Pages 41-46.)

J. A. Allen. "The Musk-Oxen of Arctic America and Greenland." (Pages 69-86, plates xii-xvii and 7 text figures.)

J. A. Allen. "Description of a New Caribou from Kenai Peninsula, Alaska." (Pages 143-148, with 4 text figures.)

J. A. Allen. "A Preliminary Study of the North American Opossums of the Genus *Didelphys*." (Pages 149-188, plates xxii-xxv.)

J. A. Allen. "Descriptions of Two New Opossums of the Genus *Metachirus*." (Pages 213-218.)

J. A. Allen. "The Generic Names of the Mephitinæ." (Pages 325-334.)

J. A. Allen. "New South American Muridæ and a New *Metachirus*." (Pages 405-412.)

Frank M. Chapman. "A New Race of the Great Blue Heron, with Remarks on the Status and Range of *Ardea wardi*." (Pages 87-90.)

Frank M. Chapman. "Descriptions of Six Apparently New Birds from Peru." (Pages 225-228.)

Frank M. Chapman. "A Revision of the Genus *Capromys*." (Pages 313-324, plates xxxix and xl and 3 text figures.)

DEPARTMENT OF ANTHROPOLOGY.

Bulletin, Volume XIV.

Franz Boas. "A Bronze Figurine from British Columbia." (Pages 51-52, plate vi.)

Franz Boas. "A. J. Stone's Measurements of Natives of the Northwest Territories." (Pages 53-68, plates vii-xi.)

Volume XV.

Franz Boas. "The Eskimo of Baffin Land and Hudson Bay." (Pages 1-370, plates i-iv and 172 text figures.)

Memoirs, Volume IV.

Harlan I. Smith and Gerard Fowke. "Cairns of British Columbia and Washington." (Pages 55-75, plates i-iv.)

Volume IV.

Livingston Farrand, assisted by W. S. Kahnweiler. "Traditions of the Quinault Indians." (Pages 77-132.)

Volume V.

Franz Boas and George Hunt. "Kwakiutl Texts." (Pages 1-270.)

Volume VII.

Berthold Laufer. "The Decorative Art of the Amur Tribes." (Pages 1-86, plates i-xxxiii and 24 text figures.)

DEPARTMENT OF VERTEBRATE PALÆONTOLOGY.

Bulletin, Volume XIV.

Henry F. Osborn and Walter Granger. "Fore and Hind Limbs of Sauro-poda, from the Bone Cabin Quarry." (Pages 199-208, with 6 text figures.)

W. D. Matthew. "Additional Observations on the Creodonta." (Pages 1-38, with 17 text figures.)

J. W. Gidley. "Tooth Characters and Revision of the Genus *Equus*." (Pages 91-142, plates xviii-xxi and 27 text figures.)

F. B. Loomis. "On Jurassic Stratigraphy in Southeastern Wyoming." (Pages 189-198, plates xxvi and xxvii.)

Memoirs, Volume I.

W. D. Matthew. "Fossil Mammals of the Tertiary of Northeastern Colorado." (Pages 353-446, plates xxxvii-xxxix and 34 text cuts.)

DEPARTMENT OF ENTOMOLOGY.

Bulletin, Volume XIV.

William Beutenmüller. "Descriptive Catalogue of the Noctuidæ found within fifty miles of New York City." (Pages 229-312, plates xxxv-xxxviii and 1 text figure.)

Charles Schæffer. "Synopsis of the Species of *Trechus*, with the description of a New Species." (Pages 209-212, plate xxviii.)

Memoirs, Volume I.

William Beutenmüller. "Monograph of the Sesiidæ of America, North of Mexico." (Pages 215-352, plates xxix-xxxvi and 24 text cuts.)

DEPARTMENT OF CONCHOLOGY.

Bulletin, Volume XIV.

L. P. Gratacap. "Catalogue of the Binney and Bland Collection of the Terrestrial Air-Breathing Mollusks of the United States and Territories in the American Museum of Natural History, with Enumeration of Types and Figured Specimens, and Supplementary Notes." (Pages 335-404, plates xli-xlvi.)

LIBRARY.—The history of the library for the past year has been one of constant growth. The number of individual donors has increased, and there have been more accessions from the individuals and institutions on our exchange list than during the preceding year. The principal accessions have come from General Egbert L. Viele and Mr. Frederick A. Constable, the volumes from the latter pertaining specially to conchology. The total number of volumes, parts and pamphlets received is equivalent to 2,619 bound volumes, making the total number of volumes or their equivalent in the library at the present time 55,308. The books have been very extensively used by members and visitors, as well as by our scientific staff, but there have been calls for hundreds of books not on our shelves, which, however, should be in our possession. The branches of natural science which need especial development in the line of books and periodicals are: Forestry, Herpetology, Anthropology, Invertebrate Zoölogy, Mineralogy and Mining. A considerable sum, furthermore, could be used to advantage in the purchase of missing numbers and parts of scientific periodicals.

Following is a list of the most important individual accessions during the history of the library:

The John C. Jay Conchological Library. Donated in 1874 by Miss Catharine L. Wolfe, and greatly increased in later years by the donor.

The Carson Brevoort Library on Fishes and General Zoölogy. Deposited in 1879 and donated in 1881 by Robert L. Stuart.

The Jewett Library on Voyages and Travels. Donated in 1886 by Hugh J. Jewett.

The R. P. Whitfield Library on Geology and Palæontology. Purchased in 1886 by the Trustees.

The D. G. Elliot Ornithological Library. Donated in 1887 by Cornelius Vanderbilt and Percy R. Pyne.

The S. Lowell Elliot Library on Entomology, History, etc. Donated in 1891 by Mrs. M. Schuyler Elliot.

The Cotheal Library. Donated in 1892 by Alexander I. Cotheal.

The Harry Edwards Library on Entomology. Purchased in 1892 by the Trustees.

The Robert Halsted Library. Donated in 1897 by Miss Laura P. Halsted.

The Jules Marcou Library on Geology and related subjects. Donated in 1898 by Philippe and John B. Marcou.

The Viele Library. Donated in 1900 and increased in 1901 by Gen. Egbert L. Viele, U. S. A.

The Constable Library. Donated in 1901 by Frederick A. Constable.

S. P. Avery, Esq., furthermore, has been a most liberal benefactor to the Library during the past ten years.

LECTURES AND CONVENTIONS.

DEPARTMENT OF PUBLIC INSTRUCTION.—The regular courses of Lectures to Teachers, which are given by Professor Albert S. Bickmore under the terms of a contract with the State Superintendent of Public Instruction, have been continued during the year, with a marked increase of attendance, made possible by the opening of the new lecture hall. By request of the Trustees, Professor Bickmore has given two courses of four lectures each to the members of the Museum and their friends, and four lectures on legal holidays.

City Board of Education.—Even the greater accommodations afforded by the new auditorium, however, have not been sufficient to seat all the persons desiring to attend the free lectures given under the auspices of the Board of Education. In the fall, therefore, the Board decided to give, in coöperation with the Museum, a course of lectures on Saturday evenings, in addition to the regular Tuesday evening course. The Saturday evening lectures have been of a more scientific character than those given on Tuesday evenings. The total number of lectures in the Museum provided by the city was thirty-seven.

Other lectures have been given in the Museum by arrangement with Columbia University and the Linnæan Society of New York.

The annual convention of the American Ornithologists' Union was held in the halls of the Museum from the 12th to the 14th of November. The national conference of the Audubon Societies of America was held here on November 14, and many regular meetings of the Linnæan Society of New York, the New York Entomological Society and the New York Mineralogical Club have been held in the Reading Room of the Library and elsewhere in the Museum building. Arrangements have now been perfected for fitting up a small meeting room capable of seating about one hundred and fifty persons and adapted to the needs of such conventions.

THE NEW AUDITORIUM.

Showing an audience at one of the Lectures in the Members' Course, 1902.

In October, 1902, the International Congress of Americanists will hold its thirteenth session at the Museum as our guest.

LECTURES TO THE TEACHERS OF THE PUBLIC SCHOOLS.

BY PROF. ALBERT S. BICKMORE.

Winter and Spring Course, 1901.

- January 19, 26.—Paris—The Old City and the South Bank of the Seine.
February 2, 9.—Paris—The North Bank of the Seine and the Louvre.
“ 16, 23.—Paris—Fontainebleau, Chantilly and Versailles.
March 2, 9.—South America—Brazil.
“ 16, 23.—South America—Chili.
“ 30, April 6.—South America—Peru.

Autumn and Winter Course, 1901.

- October 26, November 2.—The Pan-American Exposition of 1901.
November 9, 16.—London—The “City” and the Thames.
“ 23, 30.—London—Its Museums and Galleries.
December 7, 14.—London—Its Environs.

Holiday Course, 1901.

- New Year's Day.—The Paris Exposition of 1900—The Street of Nations and the Trocadero.
Washington's Birthday.—Paris—The Banks of the Seine.
Thanksgiving Day.—The Pan-American Exposition of 1901.
Christmas Day.—London—The “City” and the Thames.

TO MEMBERS OF THE MUSEUM.

BY PROFESSOR ALBERT S. BICKMORE.

Spring Course, 1901.

- March 7.—Paris—The Banks of the Seine.
“ 14.—Paris—Fontainebleau, Chantilly and Versailles.
“ 21.—South America—Chili.
“ 28.—South America—Peru.

Autumn and Winter Course, 1901.

- November 21.—The Pan-American Exposition of 1901.
December 5.—London—The “City” and the Thames.
“ 12.—London—Its Museums and Galleries.
“ 19.—London—Its Environs.
November 26.—(Members' Day)—The Pan-American Exposition of 1901.

COLUMBIA UNIVERSITY COURSE.

MINING AND MINERALS.

Dr. David T. Day, of the United States Geological Survey.

- January 5.—The Mining Outlook of the Opening Century.
 “ 12.—The World's Mineral Wealth, as Shown at the Paris Exposition.
 “ 19.—The Petroleum Industry of the United States.
 “ 26.—The Mineral Resources of China, Puerto Rico, Hawaii and the Philippines.

TREES, PARKS AND GARDENS.

- February 2.—Trees and Plants in the Gardens of the Renaissance.
 “ 9.—The Life of a Tree and the Life of a Forest. . . . Prof. A. D. F. Hamlin
 “ 16.—How to Distinguish the Trees. . . . C. P. Warren
 “ 23.—Trees and Shrubs for Shade and Ornament in Landscape Gardening. . . . Samuel Parsons, Jr.

ASTRONOMY.

Prof. J. K. Rees, of Columbia University.

- March 2.—The Sun: A Study of Its Surface and Surroundings.
 “ 9.—The Inferior Planets: Mercury, Venus, the Earth and Mars.
 “ 16.—The Superior Planets: Jupiter, Saturn, Uranus and Neptune.
 “ 23.—The Use of the Photographic Telescope in Studying the Moon, Minor Planets, Stars and Nebulæ.
 “ 30.—Tycho Brahe: The Great Danish Astronomer of the End of the 16th Century.

THE LINNÆAN SOCIETY OF NEW YORK CITY.

- February 21.—The Sea Gardens of Bermuda.
 “ 28.—A Naturalist on the Coast of Alaska. . . . Prof. C. L. Bristol, of New York University
 Chief of the Biological Survey, U.S. Dept. of Agriculture

CITY BOARD OF EDUCATION FREE LECTURES.

Winter and Spring Courses.

- January 8.—Among the Indians of Southern California. G. Wharton James
 “ 15.—Among the Basket-Making Indians of the Southwest. G. Wharton James
 “ 22.—Across the Grand Canyon to Point Sublime. G. Wharton James
 “ 29.—The Bedouins of the Painted Desert. . . . G. Wharton James
 February 5.—The Navahos of Arizona and New Mexico. G. Wharton James
 “ 12.—The Isthmian Canal. . . . Prof. Emory R. Johnson
 “ 19.—The Antarctic; The Cruise of the “Belgica”. . . H. L. Bridgman
 “ 26.—Brazil and Guiana. . . . Mrs. Florence J. Stoddard

December	7.—Travels in a Swamp.
"	14.—Haunts of Nature.

On examining the Treasurer's report, to be found on pages 41 to 47, inclusive, you will not fail to note the very large and gratifying increase in the subscriptions for special expeditions and for the increase of the collections in other ways.

The increase, too, in the list of annual and life members is very encouraging to those who have the interests of the Museum at heart. We, nevertheless, need increased funds. Our Museum, in coöperation with the public schools, has become an important educational factor in the community. It is a place of recreation for thousands, who find an instructive value in the exhibition and lecture halls. The work of its scientific staff, both at home and in the field, is a credit to the city and a satisfaction to those who have felt the pleasure of personally assisting in the furtherance of a great enterprise.

In closing this, my twenty-first annual report, I desire to record my appreciation of the continuation of the cordial and substantial support given me by my colleagues on the Board of Trustees; of the coöperation of the city officials at the points where the Museum has come in contact with the government of the Borough of Manhattan, and of the efficient service rendered by the scientific and administrative staff of the Museum.

MORRIS K. JESUP,
President.

TREASURER'S REPORT.

- Zoologisches Adressbuch. Pt. 2. 1901.

DEPARTMENT OF GEOLOGY AND INVERTEBRATE
PALÆONTOLOGY.

BY DONATION.

- R. A. BRIEDEBACH, New York City.
A lot of small Ammonites and other fossils from the Cretaceous beds of Wyoming.
- REV. D. STUART DODGE, D.D., New York City.
8 Crates and 1 box of fossil fish and crustaceans from Northern Mt. Lebanon, Hajula and Hâkil, Syria.
- LURAY CAVE CO., Luray Cave, Va., through Lemuel Zerkel, Supt.
About 20 stalactites and stalagmites from Luray Cave, Va.
- MAMMOTH CAVE CO., Mammoth Cave, Kentucky, through H. C. Ganter, Manager.
1 Stalactite from Mammoth Cave, Ky.
- DR. F. C. NICHOLAS, New York City.
Small lot of fossils from Jamaica, W. I.
- STEWART ESTATE, Marengo, Ind.
1 Stalactite from Marengo Cave, Ind.
- W. S. SNYDER, Watervliet, N. Y.
2 Specimens of *Spirifer pertenuis*.
1 " " *S. audacula*.
3 " " *Grammysia circulus*.
1 " " *Orthoceras crotalum*.
1 " " *Grammysia bisulcata*.
5 Blocks of Graptolites.
2 " " Iron-manganese ore, all from quarry in Utica Slate near Watervliet, N. Y.
- FRANK SPRINGER, East Las Vegas, N. M.
1 Large slab of *Uintacrinus socialis* from the Niobrara Chalk, Logan Co., Kansas.
- CALVIN TOMKINS, New York City.
2 Specimens of *Stromatopora* and
1 Specimen of Fault-breccia from cement quarries near Rondout, N. Y.
- TRAITEL BROTHERS & CO., Through Professor H. C. Bumpus.
5 Specimens of *Ammonites communis*.
2 " " *Ostræa gregaria*.
1 " " *Modiola bipartita*.
2 " " *Nucula strigillata*, all from Vallera, near Truville, France.
- U. S. NATIONAL MUSEUM, Washington, D. C.
20 Specimens of *Lactira cambria* from Coosa Valley, Ala.
9 " " *Brooksella alternata* from Coosa Valley, Ala.
2 " " *Dactyloidites asteroides* from Middle Granville, N. Y.
- WYOMING HISTORICAL AND GEOLOGICAL SOCIETY, Wilkesbarre, Pa.
1 Fragment *Sigillaria pittstoniana*, Lesq.
1 Block of shale with *Pecopteris cistii*, Br.

ALBERT ZANNG.

About 50 specimens of *Rhynochonella depressa*, Sowb., from the Cretaceous beds at St. Blaise, 3 miles from Neuchâtel, Switzerland.

WM. ALEXANDER, Buffalo Gap, S. D. Through E. O. Hovey.
A large block of banded Jurassic sandstone.

BY PURCHASE.

- 37 Specimens of *Receptaculites* and other fossils from Robinett, Tenn.
 2 " " *Orthoceras* and *Asaphus*.
 9 " " Dictyophyton.
 1 " " *Orthoceras* from Deadwood, South Dakota.
 1 " " *Scaphites conradi* from Judith River, near Thunder Mts.
 2 " " Baculites from Belle Fourche River.
 4 " " *Scaphites warreni* from Black Hills.
 5 " " Trilobites from Mt. Stephen, B. C.
 1 " " *Spirophyton* from Chemung County, N. Y.
 1 " " Cycad from Black Hills.
 1 " " Cycadoidea from Isle of Portland, England.
 1 " " *Dictyophyton prismodictya* from Clarksville, Alleg. Co., N. Y.
 6 " " *Camarocrinus marylandica* from Cumberland, Md.
 10 " " *Sphaerocystites multifasciatus* from Cumberland, Md.
 4 " " *Ancylocrinus bulbosus* from Charleston, Ind.
 4 " " *Paracyclas occidentalis* from Watson Sta., Clark Co., Ind.
 1 " " *Helicoceras stevensoni* from Beaver Creek, Wyo.
 2 " " *Lytoceras batesi* from Shasta Co., Cal.
 1 Large fossil fern, *Neuropteris rarinervis*, from Cape Breton, Nova Scotia.
 1 Slab, about 4 ft. by 1 ft., of Orbicular Granite from Kartfors, Province of Örebro, Sweden.
 8 Large cycad trunks and 7 fragments from Minnekahta, South Dakota.
 6 Fragments *Teredo* borings from Ore Creek, north end of Black Hills, South Dakota.
 1 Valve of *Orthis occidentalis?* from Black Hills, South Dakota?

INCORPORATION.

AN ACT

TO INCORPORATE THE

AMERICAN MUSEUM OF NATURAL HISTORY,

Passed April 6, 1869.

The People of the State of New York, represented in Senate and Assembly, do enact as follows :

SECTION 1. John David Wolfe, Robert Colgate, Benjamin H. Field, Robert L. Stuart, Adrian Iselin, Benjamin B. Sherman, William A. Haines, Theodore Roosevelt, Howard Potter, William T. Blodgett, Morris K. Jesup, D. Jackson Steward, J. Pierpont Morgan, A. G. P. Dodge, Chas. A. Dana, Joseph H. Choate and Henry Parish, and such persons as may hereafter become members of the Corporation hereby created, are hereby created a body corporate, by the name of "The American Museum of Natural History," to be located in the City of New York, for the purpose of establishing and maintaining in said city a Museum and Library of Natural History; of encouraging and developing the study of Natural Science; of advancing the general knowledge of kindred subjects, and to that end of furnishing popular instruction and recreation.

SEC. 2. Said Corporation shall have power to make and adopt a Constitution and By-Laws, and to make rules and regulations for the admission, suspension and expulsion of its members, and their government, the number and election of its officers, and to define their duties, and for the safe keeping of its property, and, from time to time, to alter and modify such Constitution, By-Laws, Rules and Regulations. Until

an election shall be held pursuant to such Constitution and By-Laws, the persons named in the first section of this Act shall be, and are hereby declared to be, the Trustees and Managers of said Corporation and its property.

SEC. 3. Said Corporation may take and hold by gift, device, bequest, purchase or lease, either absolutely or in trust, for any purpose comprised in the objects of the Corporation, any real or personal estate, necessary or proper for the purposes of its incorporation.¹

SEC. 4. Said Corporation shall possess the general powers, and be subject to the restrictions and liabilities, prescribed in the Third Title of the Eighteenth Chapter of the First Part of the Revised Statutes.

SEC. 5. This Act shall take effect immediately.

STATE OF NEW YORK, }
OFFICE OF THE SECRETARY OF STATE. } ss.

I have compared the preceding with the original law on file in this office, and do hereby certify that the same is a correct transcript therefrom, and of the whole of said original law.

[L. S.] Given under my hand and seal of Office at the City of Albany,
 this fourteenth day of April, in the year one thousand
 eight hundred and sixty-nine.

D. WILLERS, Jr., *Deputy Secretary of State.*

¹ As amended by Chapter 303, Laws of 1898, of the State of New York, entitled "An Act to amend chapter one hundred and nineteen, laws of eighteen hundred and sixty-nine, entitled 'An Act to incorporate the American Museum of Natural History,' relative to its charter."

CONSTITUTION

OF THE

AMERICAN MUSEUM OF NATURAL HISTORY,

IN THE CITY OF NEW YORK.

ARTICLE I.

This Corporation shall be styled the AMERICAN MUSEUM OF NATURAL HISTORY.

ARTICLE II.

The several persons named in the charter, and such others as they may add to their number, which shall not exceed twenty-five in all at one time, shall be the Trustees to manage the affairs, property and business of the Corporation, and in case of the death or accepted resignation of any Trustee, a new Trustee shall be elected to fill his place by the remaining Trustees; but no election of a Trustee shall be held except at a quarterly meeting of the Trustees, on written notice of not less than one week, specifying that such election is to be held, and the vacancy which is to be filled; and every election of Trustees shall be by ballot, and no person shall be deemed to be elected a Trustee, unless he shall receive the votes of at least three-fourths of the Trustees present.

ARTICLE III.

The Trustees shall meet quarterly, on the second Monday of every February, May, August and November, at an hour and place to be designated, on at least one week's written notice from the Secretary, and shall annually, at the quarterly meeting in February, elect the officers and committees for the ensuing year. They shall also meet at any other time to transact special business on a call of the Secretary, who shall

issue such call whenever requested so to do, in writing, by five Trustees, or by the President, and give written notice to each Trustee of such special meeting, and of the object thereof, at least three days before the meeting is held.

ARTICLE IV.

SECTION 1. The officers of said Corporation shall be a President, a First Vice-President, a Second Vice-President and a Treasurer, all to be elected from the Trustees. These officers shall be elected by ballot, and the persons having a majority of the votes cast shall be deemed duly elected. They shall hold their offices for one year or until their successors shall be elected.

SEC. 2. The Board of Trustees shall appoint each year, in such manner as it may direct, the following Standing Committees: an Executive Committee, an Auditing Committee, a Finance Committee, a Nominating Committee. These Committees are all to be elected from the Trustees, and the members shall hold office for one year, or until their successors shall be elected.

The Board of Trustees shall also have authority to appoint such other committees or officers as they may at any time deem desirable, and to delegate to them such powers as may be necessary.

ARTICLE V.

SECTION 1. The President shall have a general supervision and direction over the affairs of the Corporation, and shall preside at all the meetings of the Museum and of the Trustees. In his absence or inability to act, the First or Second Vice-President shall act in his place.

SEC. 2. The Secretary shall be appointed by the Board of Trustees. He shall be present, unless otherwise ordered by the Board, at all the meetings of the Museum and Trustees, of the Executive Committee and of such other Committees as the Board may direct. He shall keep a careful record of the proceedings of such meetings, shall preserve the seal, archives

and correspondence of the Museum, shall issue notices for all meetings of the Trustees and various committees, and shall perform such other duties as the Board may direct.

The Board of Trustees shall have power to appoint an Assistant Secretary, who, under its directions, shall perform the duties of the Secretary in his absence or inability to act.

SEC. 3. The Treasurer shall receive and disburse the funds of the Museum. He shall report in writing, at each quarterly meeting of the Trustees, the balance of money on hand, and the outstanding obligations of the Museum, as far as practicable; and shall make a full report at the Annual Meeting of the receipts and disbursements of the past year, with such suggestions as to the financial management of the Museum as he may deem proper.

SEC. 4. The accounts of the Museum shall be kept at the General Office, in books belonging to it, which shall at all times be open to the inspection of the Trustees.

These accounts shall be under the care of an Assistant Treasurer, who shall be appointed by the Board of Trustees and be under their direction. He shall give such bonds for the faithful performance of his duties as the Board may direct.

SEC. 5. The offices of Secretary and Assistant Treasurer may be held by the same person.

ARTICLE VI.

The Executive Committee shall consist of nine Trustees, of whom the President, First and Second Vice-Presidents and Treasurer shall be four. The five members of the Executive Committee, elected in February, 1887, shall forthwith draw lots for terms of one, two, three, four and five years, respectively, and the terms for which those drawing the two, three, four and five years, respectively, were elected, are hereby extended to cover those periods; and hereafter at each annual election one member of the Executive Committee shall be elected to serve for five years. They shall have the control and regulation of the Collections, Library and other property of the Museum; and shall have power to purchase, sell and

exchange specimens and books, to employ agents, to regulate the manner and terms of exhibiting the Museum to the public, and generally to carry out in detail the directions of the Trustees; but the Executive Committee shall not incur any expense or liability for the Museum exceeding two thousand dollars at one time, or exceeding in all ten thousand dollars, in the interval between the quarterly meetings of the Trustees, without the express sanction of the Trustees. Five members of the Committee shall constitute a quorum for the transaction of business.

ARTICLE VII.

The Auditing Committee shall consist of three Trustees. It shall be their duty to examine and certify all bills presented against the Corporation, and no bills shall be paid unless first approved by the President, or the Chairman of the Executive Committee, in writing, and by at least one member of this Committee.

They shall also have the books of the Museum duly audited at least once in six months by an authorized public accountant to be selected by them.

ARTICLE VIII.

The Finance Committee shall consist of four, including the Treasurer. It shall be their duty to take charge of and invest the funds of the Museum in its name, and to take all proper measures to provide means for its support; and they shall have the sole custody of the securities belonging to the invested funds of the Museum, subject to the order of the Board of Trustees.

ARTICLE IX.

The Nominating Committee shall be composed of three, to whom shall be first submitted the name of any person proposed as a candidate for election to membership in the Board of Trustees. The Committee shall report on such candidates from time to time, as they may deem to be for the interest of the Museum.

ARTICLE X.

The President shall be a member, *ex-officio*, of all standing committees.

ARTICLE XI.

Nine Trustees shall constitute a quorum for the transaction of business, but five Trustees meeting may adjourn and transact current business, subject to the subsequent approval of a meeting at which a quorum shall be present.

ARTICLE XII.

By-Laws may from time to time be made by the Trustees providing for the care and management of the property of the Corporation and for the government of its affairs, and may be amended at any meeting of the Trustees by a vote of a majority of those present, after a month's notice in writing of such proposed amendment.

ARTICLE XIII.

The contribution of \$1,000 or more to the funds of the Museum, at any one time, shall entitle the person giving the same to be a patron of the Museum, who shall have the right in perpetuity to appoint the successor in such patronship.

The contribution of \$500, at one time, shall entitle the person giving the same to be a Fellow, who shall have the right to appoint one successor in such fellowship.

No appointment of a successor shall be valid unless the same shall be in writing, endorsed on the certificate, or by the last will and testament.

The contribution of \$100, at one time, shall entitle the person giving the same to be a Life Member.

Any person may be elected by the Trustees to either of the above degrees, who shall have given to the Museum books or specimens, which shall have been accepted by the Executive Committee, or by the President, to the value of twice the amount in money requisite to his admission to the same degree, and the President and Secretary shall issue diplomas accordingly under the seal of the Museum.

The Trustees may also elect Honorary Fellows of the Museum in their discretion.

ARTICLE XIV.

Any person who has held the office of President for ten or more successive years may be elected by the Trustees as Honorary President for life.

ARTICLE XV.

No alterations shall be made in this Constitution, unless at a regular quarterly meeting of the Trustees, or at a special meeting called for this purpose; nor by the votes of less than a majority of all the Trustees; nor without notice in writing of the proposed alteration, embodying the amendment proposed to be made, having been given at a regular meeting.

BY-LAWS.

I.

Patrons giving \$1,000, are each entitled to one Subscriber's Ticket, 5 Complimentary Season Tickets and 10 Tickets for a single admission.

Fellows, giving \$500, are each entitled to 1 Subscriber's Ticket and 10 Tickets for a single admission.

Life Members, giving \$100, are each entitled to 1 Subscriber's Ticket and 5 Tickets for a single admission.

Annual Members, paying \$10 yearly, are each entitled to 1 Subscriber's Ticket and 2 Tickets for a single admission.

[NOTE.—A Subscriber's Ticket admits two persons to the Museum on reserve days (Mondays and Tuesdays), and to all Receptions and Special Exhibitions, and may be used by any member of the Subscriber's family.

The Single Admission Tickets admit the bearers to the Museum on reserve days (Mondays and Tuesdays), and are issued to Subscribers for distribution among friends and visitors.]

II.

Any Trustee who shall fail to attend three consecutive Regular Quarterly Meetings of the Board shall cease to be a Trustee, unless excused by the Board.

III.

No gentleman shall hereafter be eligible to the position of a Trustee who shall not be a "Patron" of the Museum, unless by a unanimous vote of a quorum of the Board—excepting Trustees *ex-officio*—nor be eligible unless his name shall be presented by the Nominating Committee at a Regular Quarterly Meeting prior to the meeting at which said election shall take place.

IV.

No indebtedness (other than for current expenses) shall be incurred by any committee, officer or employee of the Museum,

except as provided for in the Constitution. Any desired additional expenditure shall first receive the approval of the Board of Trustees.

V.

If any Trustee shall accept a salary from this Corporation he shall thereby be disqualified for the time being from acting as a Trustee thereof; provided, that the Board of Trustees shall have power to suspend the operation of this law in any special case.

VI.

Any vacancies occurring in the membership of the several committees during the interval between the regular meetings of the Board of Trustees may be filled at a regular meeting of the Executive Committee, until the next meeting of the Board.

VII.

All bequests or legacies, not especially designated, shall hereafter be applied to the *Permanent Endowment Fund*, the interest only of which shall be applied to the use of the Museum as the Board shall direct.

VIII.

At such times as it may be impracticable to obtain the services of the members of the Auditing Committee, the members of the Executive Committee may act in their place and stead.

THIRTY-FOURTH ANNUAL REPORT.

To the Trustees and Members of the American Museum of Natural History :

I take pleasure in submitting herewith a statement of the affairs of the Museum for the year 1902.

FINANCES.—The Treasurer's Report, given on pages 32 to 39 inclusive, presents in detail the receipts and disbursements as they appear in the several accounts.

MAINTENANCE.—By the timely increase on the part of the City of its annual appropriation for maintenance (from \$135,000 to \$160,000), the Museum has completed its year's work without calling upon the Trustees for additional funds. Moreover, the City has authorized the construction of a new power and heating station and appropriated \$200,000 therefor, and our relations with the various municipal authorities have been most satisfactory. Heretofore it has been necessary to borrow money at the beginning of each year to pay the current expenses for maintenance, pending the refunding of such sums by the City, a condition which has involved a charge for interest on loans and occasional overdrafts. At the last annual meeting of the Board, one of its members very generously gave \$15,000 to be used as capital to meet the current bills, pending their repayment by the City, the only condition of the gift being that the Treasurer's report should show a credit balance of \$15,000 at the close of each year. The terms of this gift have been fully complied with.

ENDOWMENT.—At the annual meeting of the Board of Trustees held in January, 1902, expenditures from the General and Maintenance funds were authorized, to the aggregate amount of \$210,260, involving a deficit of \$19,560. The report of the Treasurer shows that the Museum has not drawn upon this deficit, and this is the second year that the limit of the authorization of the Trustees has not been reached. Our invested funds, however, have not been materially increased, and in the absence of any large income, we have been obliged to depend upon the liberality of friends for the development of our collections; and this will of necessity continue until our endowment is largely increased.

In conformity with the recommendation of the Finance Committee, the financial transactions of the Museum are now divided into three separate accounts.

First.—City Maintenance Account, covering the receipts and disbursements of the moneys received from the City.

Second.—General Account, including the receipts and disbursements of the income from invested funds, membership and admission fees, State Superintendent of Public Instruction and contributions (not for specific purposes) received from the Trustees and others.

Third.—Endowment and Investment Account, including the receipts, investments and disbursements of moneys received from bequests, and contributions for specific purposes, such as the support of expeditions, the preparation and publication of scientific papers, the purchase of specific collections, etc. The funds received from bequests and the interest thereon are invested in securities for the Permanent Endowment.

SPECIAL FUNDS.—Special funds, such as those for the support of Eastern Asiatic Research and for the Andrew J. Stone Expedition, are kept apart, the Assistant Treasurer acting as Treasurer of the same by request of the Trustees. Separate

reports of such funds are rendered to the Trustees, and the accounts are examined by the Auditor.

BEQUESTS.—The moneys received from the bequests of Mr. Oswald Ottendorfer, Mr. Henry Villard and Mr. Joel Goldenberg, deceased, were transferred to the Endowment and Investment Account, and used for the purchase of bonds for the Permanent Endowment.

By the will of the late Samuel D. Babcock, a former member of the Museum, the Trustees will receive \$5,000.

MEMBERSHIP.—The names of 123 new annual members have been enrolled; the loss by death or resignation was 58, leaving a gain of 65.

Mr. Edward M. Shepard and the Very Rev. Eugene A. Hoffman, D.D., LL.D., were elected Patrons, and the following named persons were elected Life Members: Miss Annie Stone, Miss Catherine A. Bliss, Miss Fannie Ellen Wright, Dr. Fred. Lange and Messrs. Fordham Morris, John I. Waterbury, James F. O'Shaughnessy, E. J. de Coppet, Zenas Crane, Samuel P. Avery, Jr., Charles W. McAlpin, Alan C. Harris, William L. Conyngham, James J. Higginson, Milton Robbins, Jacob Mahler, William Demuth and C. Lincoln Free.

I wish to report officially the loss by resignation of Messrs. Elbridge T. Gerry and D. Willis James, long associated with the Museum as members of the Board of Trustees.

It is with regret that I mention the decease of the following: Heber R. Bishop, a Patron and formerly a Trustee; Mrs. William H. Osborn, a Patron; the Very Rev. Eugene A. Hoffman, D.D., LL.D., a generous giver; Gen. Egbert L. Viele, U. S. A., and Henry G. Marquand, Fellows; C. M. Bell, M. D., Thomas C. Bushnell, William L. Flanagan, John T. Metcalfe, M. D., and Hugh O'Neil, Life Members.

TRANSPORTATION.—The territory covered by our field workers has broadened with each successive year, and the cost of transportation of the men and of the material collected would be a serious item of the expense of these expeditions were it not for the cordial and generous assistance accorded

by the various railroad companies. In this relation, I desire to acknowledge our indebtedness to the following corporations:

The Southern Pacific Co.
 Union Pacific Railroad.
 Oregon Short Line.
 Mexican International.
 Mexican National and Mexican Central Railroads.
 Pennsylvania Railroad System.
 Erie Railroad.
 Wabash Railroad.
 Missouri Pacific Railway.
 Denver & Rio Grande Railway.
 Northern Pacific Railway.
 Great Northern Railway.
 Chicago, Milwaukee & St. Paul Railway.
 Chicago & Northwestern Railway.
 Burlington & Missouri River Railroad.
 Southern Railway.
 Fort Worth & Denver City Railway.
 Colorado Southern Railway.
 Atchison, Topeka & Santa Fé Railway System.
 Canadian Pacific Railway.

ATTENDANCE.—The use of the collections by pupils and teachers has increased. We find that 5,000 pupils and 317 teachers (a greater number than ever before) visited the Museum for the purpose of studying the collections. The total number of visitors for the year was approximately 460,000.

The attendance on lectures to the public on holidays was 3,290; Lectures to Teachers, Spring Course, 7,232, Autumn Course, 7,420; Lectures to Members, Spring Course, 4,804, Autumn Course, 3,997.

The following scientific societies have held meetings at the Museum:

The New York Academy of Sciences.
 (Astronomy, Physics and Chemistry; Biology; Geology and Mineralogy; Anthropology and Psychology.)
 The Linnæan Society of New York.
 The New York Entomological Society.
 The New York Mineralogical Club.
 Audubon Society.

In October, 1902, the International Congress of Americanists held its thirteenth annual session at the Museum. This is the first time that the Congress has met in this country.

The subjects discussed at the meetings of the International Congress of Americanists related to: I. The Native Races of America: their Origin, Distribution, History, Physical Characteristics, Languages, Inventions, Customs and Religions; II. The History of the Early Contact between America and the Old World.

To make the preliminary arrangements for the Congress and the discussions pertaining to the foregoing topics, a special committee was appointed, consisting of the heads of the departments of Anthropology, and your President invited the American Association for the Advancement of Science through its section of Anthropology to advise and coöperate with that committee in selecting a general commission of organization, representative of the leading institutions in the United States at which work in Anthropology is being done.

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALÆONTOLOGY.—The Curator's time has been spent in the regular routine work of the Department; indeed, we feel more and more the responsibility connected with the general supervision of the large collections intrusted to our care.

The work of revising the classification strips has been completed, and the labeling and identification of the Tertiary and later collections undertaken. Certain other, unlabeled, collections and a collection of casts of important fossils, donated by the Curator, have been installed.

Among the Tertiary collections, those of Miocene fossils from Patagonia, Tierra del Fuego, and vicinity, are the most important. During the summer, these collections were all worked over, put in order and prepared for exhibition. The collections are extremely interesting and valuable, quite as much because of their peculiar faunal properties as for their geographical location.

The total number of labels added to the collection during the year was 1,969.

Dr. Hay, of the Department of Vertebrate Palæontology, has worked over all the fossils, fishes and fish remains of the chronological collection. These will be included in a catalogue of fossil fish which he is compiling for publication. He has found many new and unidentified forms among the Syrian fish, upon which he is preparing an article. The palæontological department has received many valuable accessions by purchase, and one donation is worthy of special note, that is, eight specimens of Cambrian Trilobite from Professor George H. Perking of the University of Vermont.

The Department is also under obligations to Dr. Bashford Dean for his supervision of work on the restoration of *Dinichthys*.

Two articles were published by the Curator, one on a new form of marine Algæ, fossil in the Niagara shale, and one on a new Trilobite from the Marcellus shale, the latter credited to Professor C. H. Hitchcock, who subsequently presented the specimen to the Museum.

At the arrival of the news of the disaster in Martinique, Dr. Hovey, the Associate Curator of the Department, was immediately detailed by the President to investigate the causes of the eruptions, and in May, 1902, he sailed from New York on his first expedition to Martinique and St. Vincent. His efficient field work, quick inductions and prompt publication have not only placed the name of the Museum among the leading contributors to seismology, but his rational treatment of volcanic phenomena in general, and the eruptions of Mt. Pelé in particular, have received most favorable notice throughout the scientific press. The results of his investigations have been set forth in his paper, which has already appeared in the Bulletin.

DEPARTMENT OF MAMMALOGY AND ORNITHOLOGY.—The Curator reports that the additions to the collections of mammals have exceeded in number and importance those of any previous year; 2,121 specimens have been added to the series of mammals. The specimens purchased consist mainly of a collection, made for the Museum by Mr. J. H.

Batty in the state of Chiriqui, Colombia, numbering 254 specimens; a collection of 78 small mammals from Costa Rica, made for the Museum by Mr. J. H. Carriker, Jr.; a collection of bats numbering 95 specimens, collected in the Bahamas and Cuba by Mr. S. H. Hamilton, and an important collection of arctic mammals made for the Museum by Capt. George Comer, in the region about Repulse Bay, Hudson Bay, including skeletons and skulls of musk-oxen, a large series of barren ground caribou, skins and skeletons of the bearded seal, etc.

The specimens obtained by the Andrew J. Stone Expedition form a most important addition to the North American collection of mammals. It comprises some fifty large, and about one thousand small mammals, among which are many species new to the Museum.

The gift from the Peary Arctic Club of about one hundred mammals collected by Commander Peary on his last arctic expedition, is especially noteworthy. It includes skins of caribou, musk-oxen, walrus, seals and polar bears, and many skulls of walrus and seals. The Museum is now doubtless by far the richest in the world in mammals from arctic America.

Donations of specimens in the flesh have been received from the New York Zoölogical Society and the Central Park Menagerie, including many important types. Special mention should be made of the gift from Messrs. Charles D. Cleveland and Marshall Maclean, of New York, of a fine series of Newfoundland caribou.

Mrs. Hannah H. Corbin has presented two mounted specimens of wild boar, and Mr. L. S. Thompson has given a remarkably large mounted head of the Alaska moose, and two mounted Rocky Mountain sheep. We are indebted to Mr. William F. Whitehouse, Jr., for a mounted specimen of the rare Abyssinian duyker antelope, a gift, and mounted heads of the African elephant and two-horned rhinoceros, placed in the Museum on loan.

The recent accessions of mammals and birds have been catalogued to date, and labeled with field data, but not all have been identified.

During the year 1902, 14 papers on mammals and birds have been published in the Museum Bulletin, and a guide leaflet on North American Ruminants has been issued.

Besides the scientific use of the material of this department by the Curator and by naturalists visiting the Museum, much material has been loaned to specialists and institutions in other cities, for which due credit is given in their publications, and similar courtesies are received from them in return for our loans. Specimens are made use of by artists at the Museum, to whom facilities are offered.

The Museum has had collectors in the West Indies, Costa Rica, northern Colombia, and in the Repulse Bay region of northeastern arctic America. Mr. Klages has continued his work in Venezuela. Mr. Chapman, the Associate Curator, has made trips, in the interest of the Museum, to the coast of Virginia and to the Bahamas, which were highly successful in securing material for special bird groups, etc.

The only expedition sent out exclusively for work in this department is the Andrew J. Stone Expedition, of which mention has been made in earlier reports. In 1902, Mr. Stone made a trip to the western end of the Alaska Peninsula to obtain accessories for the Grant Caribou group, specimens for which were collected in 1901.

New groups of birds have been given to the Museum by Mr. Cadwalader, as follows: "The Fish Hawk," "The Ptarmigan," "The Black Rail."

Dr. Bashford Dean, of Columbia University, has made it possible for the Department to come into possession of several long-tailed fowl from Japan. These will make valuable additions to our collections illustrating the results of artificial selection.

VERTEBRATE PALÆONTOLOGY.—Progress has been made in rearranging the collections so as to make them more intelligible to the public. New specimens of interest have been placed in the centre of the hall, and attention is called to them by explanatory labels, diagrams and models.

CENTRAL PORTION OF THE GROUP OF BEACH-BREEDING BIRDS OF CORB'S ISLAND

Valuable exchange collections have been received from the British Museum, and the Museums of Moscow, Bucharest, Tübingen and Buenos Aires. The mounting of new material has continued under Mr. Hermann.

Five expeditions have been maintained in the field: in Montana, Colorado, Wyoming and South Dakota. The most notable additions to the collections by these expeditions are a complete skeleton of an Upper Miocene Three-toed Horse, a fine skull and jaws of the horned Dinosaur Triceratops (skull between seven and eight feet long) and three complete skeletons of a rare Cretaceous Reptile, Champsosaurus.

The establishment of a fund by a member of the Board of Trustees, Mr. William C. Whitney, for providing material to illustrate the origin and development of the horse, has produced immediate results of the highest importance, and stimulated the work in many cognate lines.

The purchase of the Cope Collections has been effected, and all this material is now the property of the Museum. The collections include fossil reptiles, amphibians and fishes, presented by your President, and the Pampean Collection of fossil mammals of South America, presented by a number of the Trustees of the Museum. The great value of these collections has been noted in former reports. They contain a large number of complete or nearly complete skeletons of rare fossil species, among which the Sabre-Tooth Tiger, the Carnivorous Dinosaur, Duck-billed Dinosaur, and Amphibious Dinosaur, are now being prepared for exhibition.

DEPARTMENT OF ANTHROPOLOGY.—In order to have the halls in readiness for the meeting of the International Congress of Americanists, every effort was made by the officers and assistants of this department to arrange and label the collections. The collections were studied with interest by the members of the Congress during the week of the meetings, and many remarks were made upon their scientific importance and value.

During the year a number of collections not before exhibited have been installed, notably the Hyde collections from the ancient cliff-houses, burial-caves and ruined pueblos of Colorado, Utah and New Mexico.

Only a portion of the interesting and important material obtained from this expedition as the gift of Messrs. B. T. B. Hyde and F. E. Hyde, Jr., is on exhibition. It is to the Messrs. Hyde that we are also indebted for the publication of the volume of the Memoirs containing the Navajo ceremony of the Night Chant, written by Dr. Washington Matthews, a work of exceeding importance. Mr. B. T. B. Hyde has purchased the important library of the late Mr. Andrew E. Douglass, and it is now arranged in the office room of the expedition.

Among the new exhibits installed during the year is the special exhibit of a portion of the material obtained by Mr. Volk during the researches in the Delaware Valley which have been carried on under the direction of Professor Putnam for over twenty years. The expenses of the research for the past five years have been met by Dr. F. E. Hyde of the Board of Trustees. The exhibit is in a case in the west corner hall of the second floor. It seems to show conclusively that man was in the valley of the Delaware at the time that certain of the glacial deposits, and those immediately following, were made. The discoveries of human remains and implements are illustrated by photographs and diagrams.

The general North American archæological collection, which was in storage for several years, has been arranged by Mr. Smith, who has supplemented the exhibits by descriptive labels, maps and drawings. He has also placed considerable printed and typewritten information with a number of the collections, and in various ways has made them especially instructive.

Some of the archæological collections from New York, obtained largely through Mr. Harrington's explorations, have been arranged.

The Bandelier, Garces, Gaffron and Squier collections have been re-arranged. A large and important collection from Brazil, received in November from the Duke of Loubat, will soon be installed.

In the ethnological section the re-arrangement and installation of collections has gone on as rapidly as possible, and an exceptionally large amount of installation has been completed. The arrangement of the north hall was completed in its main features. Early in the year the north side of the west hall, second floor, was cased, and the Chinese collections made by Dr. Laufer under a grant given by Mr. Jacob H. Schiff were exhibited temporarily. In the spring, work was begun on the installation of the Siberian collections of the Jesup North Pacific Expedition. The whole west corner hall was set aside for the collections from Siberia. The arrangement of the Chukchee collections and of the Koryak collections made by Mr. Bogoras has been completed.

The Jesup North Pacific Expedition.—The work of the Jesup North Pacific Expedition has progressed satisfactorily. During the past year, collections have been received from Mr. George Hunt, Mr. Waldemar Bogoras and Mr. Waldemar Jochelson. With the return of Messrs. Bogoras and Jochelson, the Siberian part of the expedition has been closed. The results are most gratifying.

The aim of the expedition to collect very full information on all the tribes of the North Pacific coast has in the main been accomplished, and it now remains to study the relationship of these tribes by a detailed comparison of the material collected. The whole district from Columbia River in America, westward to the Lena in Siberia, has been covered fairly exhaustively; and it is already evident that the relationship between Asia and America is much closer than had hitherto been supposed. In fact, a comparison of the customs and traditions of certain of the peoples of northeastern Asia and northwestern America indicates that in culture at least they must be regarded as one group,—a conclusion of great significance for the wider problem of the origin and development of the civilizations of the two continents. A number of special questions have resulted from these studies, to which it is desirable to give further attention. They are particularly an investigation of the Salish tribes of Puget Sound, of the

Nootka of the west coast of Vancouver Island, and of the Eskimo of Kotzebue Sound.

The Huntington California Expedition was continued by Mr. Dixon, and, with the co-operation of the University of California, by Mr. Kroeber. We have received additional material from the Maidu and Shasta and a collection from the Yurok on the Lower Klamath River.

North American Research.—Professor Livingston Farrand continued the researches among the Sahaptin which were commenced two years ago. We have obtained from him a collection illustrating the life of the Nez Percés.

Dr. Clark Wissler commenced investigations on the decorative art of the Sioux, which have given very gratifying results in the way of information and collections.

The agreement with the Bureau of American Ethnology entered into in 1901 was continued during the present year. In pursuance of this agreement, Mr. William Jones continued his work among the Sauk and Fox, whose language and ethnology he studied, making at the same time collections for the Museum.

Mr. H. H. St. Clair, 2d, continued his work among the Shoshone tribes. His linguistic work was also provided for by the Bureau of Ethnology, while the ethnological work was provided for by the Museum. He sent an interesting collection of Comanche material.

Mr. John W. Chapman, who lives as a missionary among the Athapascan Indians of the Yukon region, has undertaken to study this tribe, and to make a collection illustrating their mode of life.

Two years ago Captain George Comer and Captain James S. Mutch, who command whaling-stations in Hudson Bay and Cumberland Gulf respectively, were authorized by the Museum to make ethnological collections in the districts visited by them. The results of their work have been very gratifying, and have added materially to the value of the Eskimo collections of the Museum.

Expedition to China.—The East Asiatic work provided for by Mr. Jacob H. Schiff, and carried on by Dr. Berthold Laufer, has been continued during the past year. Early in the year, Dr. Laufer moved to Peking, where he collected much material relating to the daily life of the people, and at the same time made ethnological and historical studies which promise important scientific results.

Hyde Expedition.—Dr. Hrdlička made two expeditions to the region of the Southwest and to northern Mexico during the year, both under the patronage of the Messrs. Hyde, and the material obtained is their gift to the Museum. During these expeditions Dr. Hrdlička obtained anthropometric data and many photographs relating to twenty-one tribes in the Southwestern Territories and in northern Mexico. He also secured a large number of skulls and several skeletons from the same region, including the first Yaqui skulls known; also numerous ethnological and archæological specimens, many of special importance in filling gaps in our collections.

Mexican Expedition.—Mr. Saville was absent in the field from December, 1901, until May, 1902, working in the State of Oaxaca, Mexico, with funds given by the Duke of Loubat, and completed the work that he had planned for that part of Mexico. The results throw much light on the burial customs of the ancient Zapotecans, and the collections obtained from the excavation add materially to the importance of our collection in the Museum. A visit was made to Mitla and to ruins in the southern part of the Oaxaca Valley, and also to the Mixteca mountains at Nochistlan. Rare specimens of gold, copper and jadeite secured by the expedition, added to what we already have in the Museum, make this part of our Mexican collections the best in any museum.

From the Duke of Loubat, besides the material obtained from this expedition, we have received a gem collection of great importance from the state of Oaxaca. From Mr. Maler we have received several pieces of Maya pottery from Yucatan and Tabasco; and from Mr. Chavero, a post-Columbian codex of considerable interest.

Local Explorations—Mr. Harrington visited the Shinnecock and Poosepatuck Reservations on Long Island and Staten Island, during June and July, and at Shinnecock Hills he explored an ancient village site,—a series of shell heaps. Trenches were dug, and “ash pits” opened.

Although the number of publications issued during the past year is not large, much progress has been made in the preparation of material.

DEPARTMENT OF MINERALOGY AND CONCHOLOGY.—The headquarters of this department have been removed to the fourth floor, and a room for laboratory work and storage has been provided in the basement.

The labeling of the collection of minerals on exhibition, a thorough arrangement of overflow material, now in drawers under the cases, a selection of a second, very small, group of duplicates, the completion of the explanatory rubrics throughout the cases, and a beginning upon the exhaustive card catalogue, marks the labor of the department.

The gem collection continues to be most popular. One record is given of 1,000 visitors in a day. During the past year five magnificent crusts of amethyst have been added, from Rio Grande do Sul, Brazil, and also a large yellow sapphire, two parti-colored sapphires, an immense star sapphire, and a curious archaic axe of agate, gifts of Mr. J. Pierpont Morgan. Besides these a collection of very attractive series of polished agates has been received. A card catalogue of the gems has been completed, comprising almost 2,000 cards.

A splendid collection of gold and silver coins from the Philadelphia mint, given by Mr. J. Pierpont Morgan, has been placed in the Gem Room.

DEPARTMENT OF INVERTEBRATE ZOOLOGY.—We regret that the capacity of the building and the limitation of our funds prevent the symmetrical development of all that goes to make up a Museum of Natural History. We not only have large collections that await adequate exhibition space, but there are departments of natural history that thus far have received but little attention. They have not been

forgotten, however, and it is our purpose to so plan our work that all will finally receive proper treatment.

The Department of Invertebrate Zoölogy was established two years ago, and since that time the invertebrate collections of the Museum have been gotten together; new material has been added, and the exhibit in the south-east hall of the ground floor will soon be open to the public.

Professor William Morton Wheeler, at one time Director of the Public Museum at Milwaukee, and a scientist of high standing, will soon take charge of this department.

For a long time we have felt the need of providing exhibits to illustrate in a comparative way the structure of the human body, *i. e.*, collections that will illustrate the resemblances and differences between man and the lower animals, and that will illustrate also the anatomical differences between the various races of man. We should also have material to illustrate the development and the functional activity of the special sense organs. There is a constant demand for such collections on the part of teachers, and we think no one questions their high educational value. Now that Professor Tower, a well-known physiologist, has taken a place on our scientific staff, and Professor Wheeler will soon be with us, it seems expedient to assign temporarily, until proper space can be found elsewhere, the south-west room on the main floor to collections of this nature.

The most important accession of invertebrate animals is a collection of *cœlenterates*. This collection consists of about 200 specimens of West Indian corals, Actinians and Alcyonarians, collected by Dr. Duerden in Jamaica, and includes many co-types of species described by him in various papers.

All the *cœlenterates* have been worked over by Dr. Duerden, and many of the specimens named and mounted with a view to illustrate their general biological characteristics. Arrangements have been made for several additions, including a collection of Beaufort Actinians from Dr. J. J. Hamaker, a collection of Porto Rican corals, identified by T. Wayland Vaughan for the U. S. F. C., and specimens of *cœlenterates* from Woods Hole.

Through the courtesy of Hon. George M. Bowers, of the United States Fish Commission, the Museum has received a collection of 21 duplicate specimens of named Actinians from Porto Rico. Practically all the specimens of these two collections are alcoholic, and make a most valuable addition to our already magnificent collection of West Indian coelenterates, the greater part of which was obtained by Professor R. P. Whitfield. A collection of invertebrate animals from the Gulf of California has been given to the Museum by the Duke of Loubat.

All the invertebrate material of this department has been thoroughly overhauled, classified, and placed in alcoves in the exhibition hall, and card catalogues of the various groups have been started.

The department has continued to have charge of the Reptiles, Batrachians and Fishes, in addition to the invertebrate animals.

Several interesting and important additions have been made to our collection of fishes. From Hon. George M. Bowers, the department has received specimens (co-types) of a new genus and species of fish, *Mistichthys luzonensis*, from the Philippine Islands, the smallest known vertebrate. Special mention should be made of the donations of Mr. John Hiscox, who has given many specimens which were required in experiments on the preservation of fish. A good nucleus of a collection of common food fishes was secured by Messrs. Sherwood and Figgins, who spent several weeks during the summer at Woods Hole.

The New York Zoölogical Society and the Department of Parks have been the principal donors of reptiles and batrachians.

The following papers have been published during the year: "Boring Algæ as Agents in the Disintegration of Corals," by J. E. Duerden; "The Sequoia: A Historical Review of Biological Science" by George H. Sherwood.

DEPARTMENT OF ENTOMOLOGY.—The Curator of Entomology reports that the Hoffman Collection of Butterflies has been transferred to the new cases. He states that 4,600 specimens of Coleoptera and Lepidoptera were numbered and

SCENES FROM THE PTARMIGAN GROUP

catalogued; 6,000 Coleoptera and 500 Lepidoptera were mounted. The Schauss Collection of Moths was provisionally arranged, and many species of insects identified for collectors and for those asking for the assistance of the department.

The material obtained during a five weeks' visit to the Black Mountains numbers fully 7,000 specimens. The expense of this expedition was defrayed by the Very Reverend Eugene A. Hoffman, D.D., LL.D.

The following publications have been issued by the Department: "The Butterflies of the Vicinity of New York City"; "Descriptive Catalogue of the Noctuidæ found within Fifty Miles of New York City"; "The Earlier Stages of Some Moths"; "Descriptions of some Larvæ of the Genus *Catocala*."

The death of the Very Reverend Eugene A. Hoffman removed a warm friend of the Museum, and a substantial support from the Department of Entomology. Only a few weeks before his decease, he commissioned the Director to visit Reading, Pennsylvania, to examine a large collection of Lepidoptera, and if really worth the price set upon it (\$20,000) to purchase and bring it back to the Museum. The collection was examined, but in view of the price set upon it and the large collections already in our possession, the Director did not encourage its purchase.

LIBRARY.—The development of this department of the Museum has necessitated certain administrative changes. Dr. Woodward has been appointed Curator of Maps and Charts, and Professor Ralph W. Tower, formerly of Brown University, has been appointed Curator of Books and Publications. Professor Tower took office early in December.

As in the past, the library has been in constant use by members of the scientific staff, by scientists, students and others.

Some most valuable additions have been received from Professor H. F. Osborn, the Duke of Loubat, Gen. Egbert L. Viele, Gen. J. Watts de Peyster, Frederick A. Constable, Mrs. M. Schuyler Elliot, Mrs. C. V. Riley, Hon. William Astor Chanler, the New York State Department of Public Instruction, the Indiana State Library, and the Government

of India; and numerous publications have been received in exchange for publications of the Museum.

PUBLICATIONS.—The publication of the scientific results attending the investigations carried on by the Museum has progressed as in the past.

Two numbers of the *Memoirs* have been issued. The first, *The Night Chant*, by Washington Matthews, was prepared and issued through the generosity of Mr. F. E. Hyde, Jr. The second, *Kwakiutl Texts*, by Franz Boas, was issued by the Museum.

The publication of *The American Museum Journal* has continued; nine numbers, and six illustrated leaflet supplements having been issued:

Guide Leaflets.

“The Hall of Fossil Vertebrates”.....	W. D. Matthew
“The Collection of Minerals”.....	L. P. Gratacap
“North American Ruminants”.....	J. A. Allen
“The Ancient Basket Makers of Southeastern Utah”.....	Geo. H. Pepper
“The Butterflies of the Vicinity of New York City”....	William Beutenmüller
“The Sequoia; A Historical Review of Biological Science”..	G. H. Sherwood

The *Bulletin* matter published during 1902 has exceeded that of any previous year.

The following is a complete list of the scientific publications:

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALÆONTOLOGY.

Bulletin, Volume XVI.

R. P. Whitfield. “Description of a New Form of Myalina from the Coal Measures of Texas.” (Pages 63-66, with 2 text figures.)

R. P. Whitfield. “Observations on and Emended Description of *Heteroceras simplicostatum* Whitfield.” (Pages 67-72, plates xxiii-xxvii.)

R. P. Whitfield. “Description of a New Teredo-like Shell from the Laramie Group.” (Pages 73-76, plates xxviii and xxix, and 1 text figure.)

Edmund Otis Hovey. “Martinique and St. Vincent; a Preliminary Report upon the Eruptions of 1902.” (Pages 333-372, plates xxxiii-li, and 1 text figure.)

R. P. Whitfield. “Notice of a new Genus of Marine Algæ, Fossil in the Niagara Shale.” (Pages 399-400, plate liii.)

F. B. Loomis. “On Jurassic Stratigraphy on the West Side of the Black Hills.—Second Paper on American Jurassic Stratigraphy.” (Pages 401-408, plates liv and lv.)

DEPARTMENT OF MAMMALOGY AND ORNITHOLOGY.

Bulletin, Volume XVI.

E. W. Nelson. "A New Species of Elk from Arizona." (Pages 1-12, with 7 text figures.)

J. A. Allen. "Zimmermann's 'Zoologiæ Geographicæ' and 'Geographische Geschichte' considered in their Relation to Mammalian Nomenclature." (Pages 13-22.)

J. A. Allen. "The Generic and Specific Names of some of the Otariidæ." (Pages 111-118.)

J. A. Allen. "A New Caribou from the Alaska Peninsula." (Pages 119-128, with 6 text figures.)

J. A. Allen. "A New Bear from the Alaska Peninsula." (Pages 141-144, plates xxx and xxxi.)

J. A. Allen. "A New Sheep from the Kenai Peninsula." (Pages 145-148, with 2 text figures.)

J. A. Allen. "Description of a New Caribou from Northern British Columbia, and Remarks on *Rangifer montanus*." Pages 149-158, with 6 text figures.)

J. A. Allen. "Nomenclatorial Notes on American Mammals." (Pages 159-168.)

J. A. Allen. "List of Mammals collected in Alaska by the Andrew J. Stone Expedition of 1901." (Pages 215-230.)

Frank M. Chapman. "List of Birds collected in Alaska by the Andrew J. Stone Expedition of 1901." (Pages 231-248.)

J. A. Allen. "A Preliminary Study of the South American Opossums of the Genus *Didelphis*." (Pages 249-280.)

J. A. Allen. "Mammal Names proposed by Oken in his 'Lehrbuch der Zoologie.'" (Pages 373-380.)

J. A. Allen. "A New Caribou from Ellesmere Land." (Pages 409-412, with 2 text figures.)

J. A. Allen. "The Hair Seals (Family Phocidæ) of the North Pacific Ocean and Bering Sea." (Pages 459-499.)

DEPARTMENT OF VERTEBRATE PALÆONTOLOGY.

Bulletin, Volume XVI.

Henry Fairfield Osborn. "Dolichocephaly and Brachycephaly in the lower Mammals." (Pages 77-90, with 5 text figures.)

Henry Fairfield Osborn. "The Four Phyla of Oligocene Titanotheres." Titanothere Contributions, No. 4. (Pages 91-110, with 13 text figures.)

W. D. Matthew. "A Skull of *Dinocyon* from the Miocene of Texas." (Pages 129-136, with 4 text figures.)

W. D. Matthew. "On the Skull of *Bunelurus*, a Musteline from the White River Oligocene." (Pages 137-140, with 3 text figures.)

Henry Fairfield Osborn. "American Eocene Primates, and the supposed Rodent Family Mixodectidæ." (Pages 169-214, with 40 text figures.)

W. D. Matthew. "New Canidæ from the Miocene of Colorado." (Pages 281-290, with 4 text figures.)

W. D. Matthew. "A Horned Rodent from the Colorado Miocene. With a Revision of the Mylagauli, Beavers, and Hares of the American Tertiary." (Pages 291-310, with 17 text figures.)

W. D. Matthew. "The Skull of *Hypisodus*, the smallest of the Artiodactyla, with a Revision of the Hypertragulidæ." (Pages 311-316, with 4 text figures.)

W. D. Matthew. "List of the Pleistocene Fauna from Hay Springs, Nebraska." (Pages 317-322.)

DEPARTMENT OF ANTHROPOLOGY.

Memoirs, Volume V.

Franz Boas and George Hunt. "Kwakiutl Texts." (Pages 271-402.)

Volume VI.

Washington Matthews. "The Night Chant, a Navaho Ceremony." (Pages 1-316, plates i-viii, and 19 text figures.)

Bulletin, Volume XVI.

Alès Hrdlička. "The Crania of Trenton, New Jersey, and their bearing upon the Antiquity of Man in that Region." (Pages 23-62, plates i-xxii, and 4 text figures.)

Volume XVII.

Roland B. Dixon. "Basketry Designs of the Indians of Northern California." (Pages 1-32, plates i-xxxvii.)

Roland B. Dixon. "Maidu Myths." (Pages 33-118.)

Volume XVIII.

A. L. Kroeber. "The Arapaho." (Pages 1-150, plates i-xxxi, and 46 text cuts.)

DEPARTMENT OF INVERTEBRATE ZOOLOGY.

Bulletin, Volume XVI.

J. E. Duerden. "Boring Algae as Agents in the Disintegration of Corals." (Pages 323-332, plate xxxii.)

DEPARTMENT OF ENTOMOLOGY.

Bulletin, Volume XVI.

William Beutenmüller. "Descriptions of some Larvæ of the Genus *Cato cala*." (Pages 381-394.)

William Beutenmüller. "The Earlier Stages of Some Moths." (Pages 395-398, plate lii.)

William Beutenmüller. "Descriptive Catalogue of the Noctuidæ found within Fifty Miles of New York City." Part II. (Pages 413-458, plates lvi-lix.)

LECTURES.—The different lectures that the Museum, through Professor Bickmore (and under a grant from the State) has provided for the teachers of New York now number 398, upon 205 different subjects. During 1902, the lectures were as follows:

Spring Course.

January	25—	Naples, Pompeii and Rome and their Museums.
February	1—	Naples, Pompeii and Rome and their Museums.
"	8—	The Eastern Riviera.
"	15—	The Eastern Riviera.
March	1—	The Upper Rhine.
"	8—	The Upper Rhine.
"	15—	The Lower Rhine.
"	22—	The Lower Rhine.

Autumn Course.

October	18—	The Swiss Alps.
"	25—	The Swiss Alps.
November	1—	The French Alps.
"	8—	The French Alps.
"	15—	Historic Towns of Central France.
"	22—	Historic Towns of Central France.
"	29—	Historic Towns of Southern France and the French Riviera.
December	6—	Historic Towns of Southern France and the French Riviera.

The following were delivered to members of the Museum:

February	20—	Naples, Pompeii and Rome and their Museums.
"	27—	The Eastern Riviera.
March	6—	The Upper Rhine.
"	13—	The Lower Rhine.
November	20—	The Swiss Alps.
December	4—	The French Alps.
"	11—	Historic Towns of Central France.
"	18—	Historic Towns of Southern France and the French Riviera.

The following were delivered to the general public:

New Year's Day, January 1, 1902—	London: The City and the Thames.
Washington's Birthday, February 22, 1902—	The Rhine.
Thanksgiving Day, November 27, 1902—	The Swiss Alps.
Christmas Day, December 25, 1902—	The French Alps.

In coöperation with the Audubon and Linnæan Societies, the Museum offered to teachers a series of eight informal talks on birds, illustrated by specimens which could be handled freely for purposes of comparison and discussion. The lectures were given on Saturday afternoons. The subjects and speakers were as follows:

April	5 and 12—	The Birds of Early Spring.	Frank M. Chapman
April	19 and 26—	The Birds of April.	William Dutcher
May	3 and 10—	The Birds of Early May.	Dr. J. Dwight, Jr.
May	17 and 24—	The Birds of late May, and Birds' Nests. . .	C. William Beebe

The Museum has continued to coöperate with the Board of Education. The following lectures were delivered.

Tuesday evenings.

January	7—Greenland.....	W. E. Meehan
"	14—The Yellowstone National Park.....	Miss Mary V. Worstell
"	21—The Indians of the Wild Northwest: Their Haunts; Their Sports; Their Homes.....	Egerton R. Young
"	28—The Cliff- and Cave-Dwellers of the Southwest.	F. S. Dellenbaugh
February	4—The State of New York, and its Remarkable Natural Features.....	W. C. Peckham
"	11—Flashes of Light on Yankee Land. A Description of Central New England.....	George W. Bicknell
"	18—In the Heart of the Rockies.....	Jacques W. Redway
"	25—The Black Hills and Bad Lands of South Dakota and Wyoming.....	E. O. Hovey
March	4—Alaska.....	John P. Clum
"	11—The Mississippi Valley and the Southern States..	S. T. Willis
"	18—Seeking Peary and the Pole.....	H. L. Bridgman
"	25—Pennsylvania.....	W. E. Meehan
April	1—In the Land of the Red Men, as they Were and Are. With Glimpses of Prairies, Mountains, Lakes and the Glorious Northern Auroras.....	Egerton R. Young
"	8—Florida.....	W. E. Meehan
"	15—In the Wake of the Setting Sun.....	John P. Clum
"	22—The Nicaragua Canal.....	W. E. Simmons
"	29—Hawaii.....	John C. Bowker
October	7—New Zealand.....	Dr. John C. Bowker
	14—Contrasts. (A study of the customs of people in many lands compared and contrasted by phrase and picture).....	Dr. John C. Bowker
	21—Japan.....	Dr. Wm. E. Griffis
	28—China.....	Dr. Kenneth F. Junor
November	4—Manners and Customs of Hindus. (Illustrated by costumes).....	Mrs. Helen M. Jackson
	11—New Things we have Learned about Africa...	Cyrus C. Adams
	18—The Vale of Cashmere.....	A. C. Maclay
	25—Persia.....	Joel Werda
December	2—The Bedouins of the Euphrates.....	Mrs. J. H. Haynes
	9—Jerusalem and Her Environs.....	S. W. Naylor
	16—Cairo.....	G. C. Mars

Saturday evenings.

January	4—An Evening in the American Museum of Natural History.....	Harlan I. Smith
"	11—The New York Aquarium. (A description of the fine fish collection at the Battery).....	Charles L. Bristol
"	18—Bronx Park. (A description of the Park and the New York Botanical Gardens.).....	Miss Mary V. Worstell
"	25—The Zoölogical Garden. (A description of New York's great Zoölogical Garden at Bronx Park.)..	Henry F. Osborn
February	1—The Reign of Fire. The first of a course of four lectures on "The Story of the Earth.".....	W. T. Elsing
"	8—The Warfare of Water.....	W. T. Elsing
"	15—The Great Ice Age.....	W. T. Elsing
"	22—The Earth and Man.....	W. T. Elsing

March	1—Life of a World. (An explanation of some important facts in geology).....	Jacques W. Redway
“	8—Industrial Regions of the United States..	Jacques W. Redway
“	15—Man's Relation to Rivers and River Valleys.	Richard E. Dodge
“	22—Man's Relation to Mountains and Plains..	Richard E. Dodge
“	29—Life in the Deserts.....	Richard E. Dodge
April	5—Great Ports of the World.....	Cyrus C. Adams
“	12—How to Know the Common Trees.....	John W. Moyer
“	19—Where Lumber Comes From.....	John W. Moyer
“	26—Home Gardening.....	Miss Louise Klein Miller

Four lectures by Dr. Henry E. Crampton on “Some Interesting Aspects of Evolution.”

October	18—The Problem of Evolution.	
	25—Interesting Facts showing Evolution.	
November	1—Interesting Facts showing the Method of Evolution.	
	8—Method. (Conclusion and Summary.)	
	15—Earthquakes.....	Cyrus C. Adams.
	22—Volcanoes.....	Dr. E. O. Hovey
	29—Martinique.....	George Donaldson
December	6—Ants and Bees.....	W. T. Elsing
	13—Snakes.....	Wm. Harper Davis

In concluding this my twenty-second report, I take pleasure in assuring the members of this Board that the past year has been one of achievement. The increase in the annual appropriation, the growing popularity of the lectures, the large sums spent for laboratory research, the long list of publications, the opening of new exhibition halls, the appropriation by the city of \$200,000 for a new power house, the receipt of large invoices of ethnological material from Siberia and China, the conclusion of negotiations leading to the purchase of the Cope Collection, and the departure of several exploring expeditions are only a few of the indices of activity at the Museum, of the generosity of our friends, and of appreciation on the part of the City officers and the visiting public.

The thirty-fourth year of the American Museum of Natural History is now brought to a close. With thanks to you for your cordial co-operation, I am,

Very truly yours,

MORRIS K. JESUP,

President.

 1 Amethyst, 142 5/32 carats.
 Fine large specimens of amethystine Quartz encrustations.
- J. NIEBLING, New York City.
 1 Specimen of ligniferous Serpentine.
- C. R. ORCUTT, New York City.
 1 Specimen of Orthoclase.
 3 Specimens of Lepidolite.
 1 Specimen of silicified Palm.
 Specimens of Antonite (hydrated mica).
- DR. H. B. PEARSON, Valdez, Alaska.
 1 Specimen of Chalcocite.
 1 " " Covellite.
 1 " " Chalcopyrite.
 1 " " Bornite.
- CHAS. H. ROBBINS, New York City.
 1 Specimen of Chalcopyrite and Sphalerite in Quartz.
 1 " " Pyrite.
- DR. W. SETON, New York City.
 1 Specimen of agatized Wood (polished).
- F. W. TRAPHAGEN, Montana.
 9 Pieces of Corundum.
- FRANCIS WATT, New York City.
 7 Specimens of Manhattan Island Rocks.
- J. PIERPONT MORGAN, New York City.
 A Collection of United States Coins.

BY EXCHANGE.

15 Specimens of Minerals.

BY PURCHASE.

54 Specimens of Minerals.

CONCHOLOGY.

BY DONATION.

- J. H. BATTY, New York City.
 10 Valves of *Meleagrina fimbriata*.
- WILLIAM BEUTENMÜLLER, New York City.
 Specimens of *Mesodon*, *Zonites*, *Stenotrema*, *Patula*, *Ferrusacia* and *Goniobasis*.

- BROWN BROS., Nassau, Bahama.
Specimens of *Orthalicus undatus* and *Thelidomus bayamensis*.
- GUY R. B. ELLIOTT, New York City.
A large specimen of *Modiola modiolus*.
- GEORGE H. FELT, New York City.
Specimens of *Crassatella solidissima* with young *Ostrea* attached.
- J. D. FIGGINS, New York City.
Specimens of *Donax fossor*.
- S. H. HAMILTON, New York City.
Specimens of *Cassis flammea* and *C. tuberosa*.
- A. E. HEIGHWAY, New York City.
Specimen of *Harpa ventricosa*.
- DR. G. H. HUDSON, Plattsburg, N. Y.
3 Specimens of *Lymnæa stagnalis* and 3 specimens of *Planorbis trivolvis*.
- HYDE EXPEDITION, through G. H. PEPPER, New York City.
16 Specimens of *Arionta dupetithouarsi* and 6 specimens of *Arionta californiensis*.
- DUKE OF LOUBAT, New York City.
5 Specimens of *Macoma*, 4 *Crucibulum spinosum*, 7 *Scurria mesoleuca*, 2 *Chlorostoma gallina*, 9 *Cerithidea sacrata*, 1 *Cerithium ocellatum*, 9 *Littorina planaxis*, 5 *Eupleura plicata*, 4 *Oliva reticularis*, 4 *Olivella tergina*, 1 *Chiton*.
- DR. E. A. MEARNNS, Newport, Rhode Island.
Specimens of *Lymnæa*, *Columbella*, *Arca*, *Purpura*, *Nassa*, *Sycotypus*, *Lunatia*, *Janacus*, *Urosalpinx*, *Littorina*, *Melampus*, *Lacuna*, *Buccinum*, *Fulgur*, *Natica*, *Solen*, *Petricola*, *Lucina*, *Astarte*, *Ostrea*, *Modiola*, *Mytilus*, *Mercenaria*, *Hemimactra*, *Thracia*, *Cytheria* and *Mya*.
- G. H. PEPPER, New York City.
20 specimens of *Vivipara*.
- REV. R. B. POST.
Specimens of *Helix nemoralis*, and a number of Pacific Ocean shells, including *Cypræas*, *Olives*, etc.
- SIBERIAN EXPEDITION, through N. G. BUXTON.
5 Specimens of *Mytilus edulis*, 7 specimens of *Cardium nuttalli*, 2 specimens of *Mya arenaria*, 6 specimens of *Machæra*, 1 specimen of *Littorina littorea*, 7 specimens of *Purpura lapillus*, 5 specimens of *Acmæa*.
- HARLAN I. SMITH, New York City.
5 Specimens of *Unio* (two species).
- MILTON G. SMITH, New York City.
4 Specimens of *Ostrea virginiana*.
- BRYANT WALKER, Detroit, Michigan.
4 Specimens of *Aplexa hypnorum*.
- PROF. R. P. WHITFIELD, New York City.
Small larval shells of *Mactra solidissima*.
- DR. R. A. WITTHAUS, New York City.
A Collection of shells comprising 68 genera, 674 species and 2,500 specimens, *Cypræa*, *Conus*, *Mitra*, *Oliva*, etc., conspicuous for the beauty and completeness of the species of *Cypræa*.

BY EXCHANGE.

- D. W. FERGUSON, Brooklyn, N. Y.
14 Specimens of *Helix nemoralis*.
SLOMAN ROUS, Brooklyn, N. Y.
61 Specimens, representing 9 genera, 12 species of shells.

BY PURCHASE.

- Y. HIRASE, Kyoto, Japan.
Land Shells, representing 15 genera.
Marine Shells, representing 21 genera.

 William Beutenmüller.

THE SECTION OF THE "BIG TREE" IN THE MUSEUM

- The uppermost series of cards represents events in General History ;
- The light cards immediately below represent changes of thought in the Philosophy of Biology ;
- The small black cards mark the succession of centuries in the life of the tree ;
- Of the cards below the black,
 - The first row indicates the advance of General Biology ;
 - The second, that of Comparative Anatomy ;
 - The third (one card), the discoveries of Palaeontology ;
 - The fourth, the progress of Embryology.

INCORPORATION.

AN ACT

TO INCORPORATE THE

AMERICAN MUSEUM OF NATURAL HISTORY,

Passed April 6, 1869.

The People of the State of New York, represented in Senate and Assembly, do enact as follows :

SECTION 1. John David Wolfe, Robert Colgate, Benjamin H. Field, Robert L. Stuart, Adrian Iselin, Benjamin B. Sherman, William A. Haines, Theodore Roosevelt, Howard Potter, William T. Blodgett, Morris K. Jesup, D. Jackson Steward, J. Pierpont Morgan, A. G. P. Dodge, Chas. A. Dana, Joseph H. Choate and Henry Parish, and such persons as may hereafter become members of the Corporation hereby created, are hereby created a body corporate, by the name of "The American Museum of Natural History," to be located in the City of New York, for the purpose of establishing and maintaining in said city a Museum and Library of Natural History; of encouraging and developing the study of Natural Science; of advancing the general knowledge of kindred subjects, and to that end of furnishing popular instruction and recreation.

SEC. 2. Said Corporation shall have power to make and adopt a Constitution and By-Laws, and to make rules and regulations for the admission, suspension and expulsion of its members, and their government, the number and election of its officers, and to define their duties, and for the safe keeping of its property, and, from time to time, to alter and modify such Constitution, By-Laws, Rules and Regulations. Until

an election shall be held pursuant to such Constitution and By-Laws, the persons named in the first section of this Act shall be, and are hereby declared to be, the Trustees and Managers of said Corporation and its property.

SEC. 3. Said Corporation may take and hold by gift, devise, bequest, purchase or lease, either absolutely or in trust, for any purpose comprised in the objects of the Corporation, any real or personal estate, necessary or proper for the purposes of its incorporation.¹

SEC. 4. Said Corporation shall possess the general powers, and be subject to the restrictions and liabilities, prescribed in the Third Title of the Eighteenth Chapter of the First Part of the Revised Statutes.

SEC. 5. This Act shall take effect immediately.

STATE OF NEW YORK, }
OFFICE OF THE SECRETARY OF STATE. } ss.

I have compared the preceding with the original law on file in this office, and do hereby certify that the same is a correct transcript therefrom, and of the whole of said original law.

[L. s.] Given under my hand and seal of Office at the City of Albany,
this fourteenth day of April, in the year one thousand
eight hundred and sixty-nine.

D. WILLERS, JR., *Deputy Secretary of State.*

¹ As amended by Chapter 303, Laws of 1898, of the State of New York, entitled "An Act to amend chapter one hundred and nineteen, laws of eighteen hundred and sixty-nine, entitled 'An Act to incorporate the American Museum of Natural History,' relative to its charter."

CONSTITUTION
OF THE
AMERICAN MUSEUM OF NATURAL HISTORY,
IN THE CITY OF NEW YORK.

ARTICLE I.

This Corporation shall be styled THE AMERICAN MUSEUM OF NATURAL HISTORY.

ARTICLE II.

The several persons named in the charter, and such others as they may add to their number, which shall not exceed twenty-five in all at one time, shall be the Trustees to manage the affairs, property and business of the Corporation, and in case of the death or accepted resignation of any Trustee, a new Trustee shall be elected to fill his place by the remaining Trustees; but no election of a Trustee shall be held except at a quarterly meeting of the Trustees, on written notice of not less than one week, specifying that such election is to be held, and the vacancy which is to be filled; and every election of Trustees shall be by ballot, and no person shall be deemed to be elected a Trustee, unless he shall receive the votes of at least three-fourths of the Trustees present.

ARTICLE III.

The Trustees shall meet quarterly, on the second Monday of every February, May, August and November, at an hour and place to be designated, on at least one week's written notice from the Secretary, and shall annually, at the quarterly meeting in February, elect the officers and committees for the ensuing year. They shall also meet at any other time to transact special business on a call of the Secretary, who shall

issue such call whenever requested so to do, in writing, by five Trustees, or by the President, and give written notice to each Trustee of such special meeting, and of the object thereof, at least three days before the meeting is held.

ARTICLE IV.

SECTION 1. The officers of said Corporation shall be a President, a First Vice-President, a Second Vice-President and a Treasurer, all to be elected from the Trustees. These officers shall be elected by ballot, and the persons having a majority of the votes cast shall be deemed duly elected. They shall hold their offices for one year or until their successors shall be elected.

SEC. 2. The Board of Trustees shall appoint each year, in such manner as it may direct, the following Standing Committees: an Executive Committee, an Auditing Committee, a Finance Committee, a Nominating Committee. These Committees are all to be elected from the Trustees, and the members shall hold office for one year, or until their successors shall be elected.

The Board of Trustees shall also have authority to appoint such other committees or officers as they may at any time deem desirable, and to delegate to them such powers as may be necessary.

ARTICLE V.

SECTION 1. The President shall have a general supervision and direction over the affairs of the Corporation, and shall preside at all the meetings of the Museum and of the Trustees. In his absence or inability to act, the First or Second Vice-President shall act in his place.

SEC. 2. The Secretary shall be appointed by the Board of Trustees. He shall be present, unless otherwise ordered by the Board, at all the meetings of the Museum and Trustees, of the Executive Committee and of such other Committees as the Board may direct. He shall keep a careful record of the proceedings of such meetings, shall preserve the seal, archives

and correspondence of the Museum, shall issue notices for all meetings of the Trustees and various committees, and shall perform such other duties as the Board may direct.

The Board of Trustees shall have power to appoint an Assistant Secretary, who, under its directions, shall perform the duties of the Secretary in his absence or inability to act.

SEC. 3. The Treasurer shall receive and disburse the funds of the Museum. He shall report in writing, at each quarterly meeting of the Trustees, the balance of money on hand, and the outstanding obligations of the Museum, as far as practicable; and shall make a full report at the Annual Meeting of the receipts and disbursements of the past year, with such suggestions as to the financial management of the Museum as he may deem proper.

SEC. 4. The accounts of the Museum shall be kept at the General Office, in books belonging to it, which shall at all times be open to the inspection of the Trustees.

These accounts shall be under the care of an Assistant Treasurer, who shall be appointed by the Board of Trustees and be under their direction. He shall give such bonds for the faithful performance of his duties as the Board may direct.

SEC. 5. The offices of Secretary and Assistant Treasurer may be held by the same person.

ARTICLE VI.

The Executive Committee shall consist of nine Trustees, of whom the President, First and Second Vice-Presidents and Treasurer shall be four. The five members of the Executive Committee, elected in February, 1887, shall forthwith draw lots for terms of one, two, three, four and five years, respectively, and the terms for which those drawing the two, three, four and five years, respectively, were elected, are hereby extended to cover those periods; and hereafter at each annual election one member of the Executive Committee shall be elected to serve for five years. They shall have the control and regulation of the Collections, Library and other property

of the Museum; and shall have power to purchase, sell and exchange specimens and books, to employ agents, to regulate the manner and terms of exhibiting the Museum to the public, and generally to carry out in detail the directions of the Trustees; but the Executive Committee shall not incur any expense or liability for the Museum exceeding two thousand dollars at one time, or exceeding in all ten thousand dollars, in the interval between the quarterly meetings of the Trustees, without the express sanction of the Trustees. Five members of the Committee shall constitute a quorum for the transaction of business.

ARTICLE VII.

The Auditing Committee shall consist of three Trustees. They shall have the books of the Museum duly audited, at least once in six months, by an authorized public accountant to be selected by them.

No bills shall be paid unless approved, in writing, by the President, the Chairman of the Executive Committee, or the Director.

ARTICLE VIII.

The Finance Committee shall consist of four, including the Treasurer. It shall be their duty to take charge of and invest the funds of the Museum in its name, and to take all proper measures to provide means for its support; and they shall have the sole custody of the securities belonging to the invested funds of the Museum, subject to the order of the Board of Trustees.

ARTICLE IX.

The Nominating Committee shall be composed of three, to whom shall be first submitted the name of any person proposed as a candidate for election to membership in the Board of Trustees. The Committee shall report on such candidates from time to time, as they may deem to be for the interest of the Museum.

ARTICLE X.

The President shall be a member, *ex-officio*, of all standing committees.

ARTICLE XI.

Nine Trustees shall constitute a quorum for the transaction of business, but five Trustees meeting may adjourn and transact current business, subject to the subsequent approval of a meeting at which a quorum shall be present.

ARTICLE XII.

By-Laws may from time to time be made by the Trustees providing for the care and management of the property of the Corporation and for the government of its affairs, and may be amended at any meeting of the Trustees by a vote of a majority of those present, after a month's notice in writing of such proposed amendment.

ARTICLE XIII.

The contribution of \$1,000 or more to the funds of the Museum, at any one time, shall entitle the person giving the same to be a Patron of the Museum, who shall have the right in perpetuity to appoint the successor in such patronship.

The contribution of \$500, at one time, shall entitle the person giving the same to be a Fellow, who shall have the right to appoint one successor in such fellowship.

No appointment of a successor shall be valid unless the same shall be in writing, endorsed on the certificate, or by the last will and testament.

The contribution of \$100, at one time, shall entitle the person giving the same to be a Life Member.

Any person may be elected by the Trustees to either of the above degrees, who shall have given to the Museum books or specimens, which shall have been accepted by the Executive Committee, or by the President, to the value of twice the amount in money requisite to his admission to the same degree, and the President and Secretary shall issue diplomas accordingly under the seal of the Museum.

The Trustees may also elect Honorary Fellows of the Museum in their discretion.

ARTICLE XIV.

Any person who has held the office of President for ten or more successive years may be elected by the Trustees as Honorary President for life.

ARTICLE XV.

No alterations shall be made in this Constitution, unless at a regular quarterly meeting of the Trustees, or at a special meeting called for this purpose; nor by the votes of less than a majority of all the Trustees; nor without notice in writing of the proposed alteration, embodying the amendment proposed to be made, having been given at a regular meeting.

BY-LAWS.

I.

Patrons giving \$1,000, are each entitled to one Subscriber's Ticket, 5 Complimentary Season Tickets and 10 Tickets for a single admission.

Fellows, giving \$500, are each entitled to 1 Subscriber's Ticket and 10 Tickets for a single admission.

Life Members, giving \$100, are each entitled to 1 Subscriber's Ticket and 5 Tickets for a single admission.

Annual Members, paying \$10 yearly, are each entitled to 1 Subscriber's Ticket and 2 Tickets for a single admission.

[NOTE.—A Subscriber's Ticket admits two persons to the Museum on reserve days (Mondays and Tuesdays), and to all Receptions and Special Exhibitions, and may be used by any member of the Subscriber's family.

The Single Admission Tickets admit the bearers to the Museum on reserve days (Mondays and Tuesdays), and are issued to Subscribers for distribution among friends and visitors.]

II.

Any Trustee who shall fail to attend three consecutive Regular Quarterly Meetings of the Board shall cease to be a Trustee, unless excused by the Board.

III.

No gentleman shall hereafter be eligible to the position of a Trustee who shall not be a "Patron" of the Museum, unless by a unanimous vote of a quorum of the Board—excepting Trustees *ex-officio*—nor be eligible unless his name shall be presented by the Nominating Committee at a Regular Quarterly Meeting prior to the meeting at which said election shall take place.

IV.

No indebtedness (other than for current expenses) shall be incurred by any committee, officer or employee of the Museum,

except as provided for in the Constitution. Any desired additional expenditure shall first receive the approval of the Board of Trustees.

V.

If any Trustee shall accept a salary from this Corporation he shall thereby be disqualified for the time being from acting as a Trustee thereof; provided, that the Board of Trustees shall have power to suspend the operation of this law in any special case.

VI.

Any vacancies occurring in the membership of the several committees during the interval between the regular meetings of the Board of Trustees may be filled at a regular meeting of the Executive Committee, until the next meeting of the Board.

VII.

All bequests or legacies, not especially designated, shall hereafter be applied to the *Permanent Endowment Fund*, the interest only of which shall be applied to the use of the Museum as the Board shall direct.

VIII.

At such times as it may be impracticable to obtain the services of the members of the Auditing Committee, the members of the Executive Committee may act in their place and stead.

BY THE LEGISLATURE.

CHAPTER 246.

An Act to authorize a further appropriation for the maintenance of the American Museum of Natural History in the Central Park of the City of New York.

ACCEPTED BY THE CITY.

Became a law March 26th, 1902, with the approval of the Governor.

Passed, three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The Board of Estimate and Apportionment of The City of New York may annually in its discretion include in the budget for the then next ensuing financial year a sum not exceeding twenty-five thousand dollars to be applied by the department of parks of said city through the Commissioner of Parks for the Boroughs of Manhattan and Richmond for keeping, preparing, preserving and exhibiting the collections in the buildings in the Central Park in the said city that are now or hereafter may be occupied by the American Museum of Natural History in addition to the sum or sums now authorized by law for such purposes.

2. This act shall take effect immediately.

State of New York, }
Office of the Secretary of State. } ss.

I have compared the preceding with the original law on file in this office, and do hereby certify that the same is a correct transcript therefrom and of the whole of said original law. (Signed),

JOHN T. McDONOUGH,

Secretary of State.

LEGAL ENACTMENTS OF 1902.

BY THE BOARD OF ALDERMEN.

An Ordinance to provide for an issue of Corporate Stock in the sum of two hundred thousand dollars (\$200,000) the proceeds to be used to provide means for the construction and installation of a new heating and lighting plant for the American Museum of Natural History, in the Borough of Manhattan.

Be it ordained by the Board of Aldermen of the City of New York, as follows:

SECTION 1. The Board of Aldermen hereby approves of and concurs in the following resolution adopted by the Board of Estimate and Apportionment June 13, 1902, authorizing the Comptroller to issue Corporate Stock of The City of New York to the amount and for the purposes therein specified.

“*Resolved*, That, pursuant to the provisions of Section 47 of the amended Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the issue of bonds to an amount not exceeding two hundred thousand dollars (\$200,000), for the purpose of providing means to pay for the construction and installation of a new heating and lighting plant for the American Museum of Natural History, in the Borough of Manhattan, and that when authority therefore shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue Corporate Stock of The City of New York in the manner provided by Section 169 of the Greater New York Charter, as amended by Chapter 563 of the Laws of 1902, to an amount not exceeding two hundred thousand dollars (\$200,000), the proceeds thereof to be applied to the purposes aforesaid.”

Adopted by the Board of Aldermen July 22, 1902, a majority of all the members elected voting in favor thereof.

Approved by the Mayor July 30, 1902. (Signed),

P. J. SCULLY, *Clerk.*

In Memoriam.

At the Annual Meeting of the Trustees of The American Museum of Natural History, held on the ninth day of February, 1903, the President announced the death of their late associate, Mr. Abram Stevens Hewitt, and feelingly referred to the able and valuable service given by the deceased in the upbuilding and development of the Museum, while a Trustee, during a period of twenty-nine years. The following minute offered by the President, was unanimously adopted, and the Secretary was directed to present a copy to the family of the deceased.

The Trustees of The American Museum of Natural History, at this their first meeting after the death of their beloved associate and member, Abram Stevens Hewitt, affectionately place the following minute upon their records :

“Mr. Hewitt became a member of this Board in the year 1874, when the Museum occupied the Arsenal Building in Central Park. He was identified with the selection of the Building site on Manhattan Square. He witnessed the laying of the corner-stone, and he has shared with us the responsibilities incidental to the growth of the institution to its present proportions. For more than a quarter of a century, and almost to the time of his death, January eighteenth, our deliberations have felt his encouraging influence. He has been a generous contributor, a loyal patron, a wise counselor and a sympathetic colleague. But in our sense of his loss to the American Museum, we do not forget his larger interests, defined by him as the ‘welfare of his fellow-citizens.’ Of comprehensive knowledge and broad experience, his mind was

alert, his intuition correct, his judgment quick, his speech incisive, his action final. Mere expediency exercised no influence over duty, and convictions were invariably supported by absolute fearlessness. When an individual combines such qualities as these, his removal is a real loss not to his friends alone, but to the people, the city, the state, the country, and, indeed, we may well say to the entire world. Though we may no longer listen to the charm of his conversation, or continue in the enjoyment of his congenial companionship, we feel that we are better for having known him, and we cherish his memory."

THIRTY-FIFTH ANNUAL REPORT.

To the Trustees and Members of the American Museum of Natural History :

The President submits herewith a report of the affairs of the Museum for the year 1903.

FINANCES.—In conformity with the recommendations of the Board of Trustees, the financial transactions of the Museum are divided into three separate accounts, and the details of the receipts, expenditures and investments for the year just closed, as embodied in the Treasurer's Report, will be found on pages 37 to 43 inclusive. These accounts and all books and vouchers have been duly examined and certified to by the Audit Company of New York. A few statements may help in making the details of this report clear.

THE PERMANENT ENDOWMENT—four hundred and forty thousand dollars—is far too small to approximate the needs of an institution doing the work that is attempted by the Museum. Although since the last annual meeting five thousand dollars has been added to this fund, the time has certainly arrived when the need of an endowment of at least one million dollars is urgently felt. This urgency is the more pronounced because of our peculiar relations with the City, the appropriations of which cannot be used for the purchase of specimens, for exploring expeditions or for the publication of scientific results.

SPECIAL FUNDS.—The Assistant Treasurer has continued to act as Treasurer of the Eastern Asiatic Research Fund and of the Andrew J. Stone Expedition Fund. Both of these funds, as originally provided, will soon be exhausted. The results of Dr. Laufer's explorations in China and the interest that several friends of the Museum have taken in him and his work are such as to encourage the belief that these researches will not be suspended. Mr. Stone's work among the arctic mammals of Alaska and British Columbia has

yielded substantial results, of importance far beyond our original expectation. But all of the scientific problems of the arctic are by no means solved; there remain other areas, the zoölogical, geographical and geological survey of which would well repay the investment of future appropriations.

CITY MAINTENANCE ACCOUNT.—The amount received from the City for the maintenance of the Museum (\$160,000) has remained the same as in 1902. While this is indeed a generous appropriation from the City, and is itself a substantial indication of the value that the City authorities place upon the work of the Museum, the amount is in reality too small to meet our running expenses and should be increased. For many years the Trustees have been obliged to make up deficiencies on this account, and the year 1903 has proved no exception, several members of the Board subscribing to a deficit of more than seven thousand dollars.

GENERAL ACCOUNT.—This is the account that reveals our regular sources of income and our regular expenditures for the development of the collections of the Museum at large, and it is by the examination from year to year of the receipts and expenditures as arranged under this account that one can most easily follow our general growth. The friends of the Museum are invited especially to subscribe to this general fund.

The year 1903, when compared with 1902, shows a small increase in our income from invested funds, an increase of \$1,300 in receipts from Life Members, and of \$1,490 in our receipts from Annual Members. Contributions by the Trustees make the total receipts on this account, \$78,050.30, which is approximately \$13,000 more than in 1902.

ENDOWMENT AND INVESTMENT ACCOUNT.—Friends of the Museum have often advanced the work of some particular Museum department because of their own interest in some branch of natural science, some special collection, or some particular country or locality. The sums of money thus contributed are kept apart, and an annual statement is published as the "Endowment and Investment Account." A report is also made, in the appropriate department, of the success of

field expeditions, of the value of collections or of the scientific results that have attended research.

THE BUILDING APPROPRIATIONS.—The construction on the appropriation of \$200,000 made by the City of New York, and mentioned in the Report of 1902, has progressed as rapidly as could be expected. The walls for the new power wing have been erected, the boilers installed, and the roof is in process of construction.

For several years the old lecture hall, near the main entrance, has been dismantled, and the condition of the basement grade has been such as to cause great inconvenience. Moreover, the above-mentioned appropriation for the new power plant was not sufficient to provide an adequate approach. These conditions led to our requesting the Board of Estimate and Apportionment for \$188,000, and on June 16, 1903, an ordinance was passed authorizing the expenditure of this amount. Under this appropriation work has already been started, and it is hoped that an attractive entrance hall will soon take the place of the present uninviting approach.

Early in the fall the Hon. William R. Willcox, acting as President of the Department of Parks, contracted for the grading of that portion of Manhattan Square lying to the north of the present building. The work is now well under way, although temporarily suspended because of the severity of the weather. The Park Board has wisely arranged the grades and walks of this new work so as to conform to the original plans of the Museum and to give a slightly appearance to the Square as a whole as section after section may be added to the present building.

MEMBERSHIP.—The Museum has gained 214 new annual members and has lost 67 members through death and resignation, leaving a net increase of 147. The income from membership fees is used for the purchase of collections and for the development of the educational work of the Museum. We wish to have our membership list increased, and we cordially invite those who are interested in our general work to unite with us.

The following have been elected Patrons:

MESSRS. LUDWIG MAX GOLD-	JAMES H. HYDE,
BERGER,	ARTHUR CURTISS JAMES,
CLEVELAND H. DODGE,	HENRY W. POOR,
HENRY CLAY PIERCE,	CORNELIUS C. CUYLER, and
MRS. EUGENE AUGUSTUS HOFFMAN	

The following have been elected Fellows:

MESSRS. SAMUEL N. HOYT,	CHARLES T. BARNEY,
HENRY W. POOR,	LEWIS S. THOMPSON,
JAMES C. CARTER,	H. B. HOLLINS,
F. AUGUSTUS SCHERMERHORN, and	MRS. HARRIET L. SCHUYLER

The following have been made Life Members:

MESSRS. HUGH D. AUCHINCLOSS,	JOHN S. BARNES,
DENNISTOUN M. BELL,	R. L. BURTON,
CHARLES D. CLEVELAND,	EDMUND W. DAVIS,
CHARLES S. DAVISON,	MADISON GRANT,
S. R. GUGGENHEIM,	DANIEL GUGGENHEIM,
BERNARD LOTH,	FRANCIS B. HARRISON,
EMERSON McMILLIN,	CLARENCE H. MACKAY,

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALEONTOLOGY.—Although the collections of fossil vertebrates are now so complete that large purchases of new material are not often necessary, the possession of such collections carries with it many scientific obligations, and on no department of the Museum are there more frequent calls for scientific data or expert advice.

The Associate Curator made his second trip to the West Indies early in the year, investigating the volcanic phenomena that have followed the disturbances of 1902, and has prepared and carefully illustrated the work that the Museum has thus far accomplished in Martinique and other islands of the Lesser Antilles.

In August Dr. Hovey represented the Museum at the International Congress of Geologists held in Vienna; and in December he attended the conference of the Geological Society of America, held at St. Louis. At both these places he delivered papers bearing upon the work of the Museum.

DEPARTMENT OF MAMMALOGY AND ORNITHOLOGY.—During the past year no department has more affected the general appearance of our exhibition halls than this. Early in the year the Shore Bird group was completed. It has been admired by thousands. Then followed the splendid group of Osborn Caribou, the White-fronted Musk-ox and the Sitka Deer. A small group illustrating the geographical variation of the Song Sparrow has excited considerable comment, and our illustrations of the mounted specimens of the Long-tailed Fowl have been extensively copied in various European journals.

From time to time the osteologist has added to the collection of skulls and antlers. These have been placed on panels in the corridors and exhibition halls. Those illustrating four species of Caribou, and the Black-tailed and Virginia Deer are noteworthy.

Several friends have united in the support of the work of this department. Mr. William F. Whitehouse has contributed a series of mammal skins from Abyssinia, and Messrs. Grant and Moore, several skins of the Mountain Caribou, Mountain

THE MUSEUM GEOLOGICAL EXPEDITION—MARTINOTTE
The picture shows the "Spine" of Mont Pelé, a pointed mass of rock which was thrust upward in 1902 from the crater to an elevation of over 11,000 feet, and then in a few weeks disintegrated and fell apart.

Goat, Black-tailed Deer, etc., from the Selkirks. The third year of the Andrew J. Stone Expedition has resulted in the capture of a splendid series of Bear, Sheep and Moose, not to mention more than eight hundred small mammals and several hundred birds.

An examination of the list of accessions in another part of this report will reveal our continued obligation to the New York Zoölogical Society and to the Menagerie of Central Park.

The Museum's expedition in Mexico, under Mr. J. H. Batty, has yielded most satisfactory results, and the funds made available, largely through the instrumentality of Mr. John L. Cadwalader, for the increase in the number of our bird groups, have made it possible for Mr. Chapman to spend considerable time in the field, collecting material, photographs, etc., for new groups, many of which are already well under way.

Our purchases have been noteworthy. They include the small but most interesting Collection of mammals and birds from Merida, Venezuela, and the Sennett Collection of birds (numbering nearly eight thousand specimens) from Texas and northeastern Mexico. The deposit by Dr. Jonathan Dwight, of about eight thousand specimens of North American birds, with full scientific data, materially adds to the resources of the Museum.

The Curator, Professor J. A. Allen, has completed and published a report on the Siberian mammals collected on the Jesup North Pacific Expedition; he has devoted much time to editorial work on the Museum *Bulletin*, prepared a paper describing several Patagonian rodents, written a report on the collection of mammals made by the Stone Expedition in 1902 and another report on Mr. Batty's Durango collection. He has prepared papers on other collections made by Mr. Batty; on the Carriker collection of mammals from Costa Rica, and the Colburn collection of mammals from the State of Vera Cruz, Mexico.

Mr. Chapman, besides his field work, has given much time to the general rearrangement of the study collections, made possible by the abolition of the Department of Taxidermy; and as a lecturer he has given freely of his time to the many

demands made by the Museum in connection with its educational work.

The number of mammals received during the year was 1,939; the number of bird skins was 10,237.

DEPARTMENT OF MINERALOGY AND CONCHOLOGY.—The splendid collection of minerals, one of the foremost in the world, and the extensive collection of shells, now the property of the Museum, are of such scientific completeness that large accessions of new material are simply impossible. Growth in this department must be slow, but our prestige can be maintained only by our taking advantage of every opportunity to improve and complete.

An examination of the list of accessions will show what new material has been added. Upon this list, as in previous years, we note the names of Miss Matilda W. Bruce, Mr. E. Schernikow, Mrs. Ida S. Oldroyd and Mr. F. A. Constable.

More than ever before the collections have been of scientific use, and during the summer Drs. Baskerville and Kunz examined practically every specimen in the entire collection while carrying on their investigations upon the reactions of minerals to radium, the X-rays and the ultra-violet rays. The expense of these experiments was largely borne by Mr. Edward D. Adams, whose gifts of valuable specimens of radium have kept the Museum in the front rank of those institutions which have been identified with experiments upon various radioactive agents.

DEPARTMENT OF VERTEBRATE PALÆONTOLOGY.—The chief event of the year in this department was the establishment of a Division of Fossil Fishes, of which Professor Bashford Dean was appointed Honorary Curator. The agreement of Columbia University to deposit the Newberry Collection in the Museum results in a combination of collections of fossil fishes most advantageous to the Museum, the University and students of fossil ichthyology alike.

The total collection of fossil vertebrates now numbers 14,420 specimens, including the results of the following expeditions during the summer of 1903:

Whitney expedition for fossil horses.....	36
Bridger expedition for Lower Eocene mammals.....	427
Continued excavation of Bone Cabin Quarry.....	110
Expeditions for Cretaceous Plesiosaurs and Mosasaurs.....	345
Exploration of Pleistocene cave deposit.....	243

Evolution of the Horse.—This is the third and last year of the important explorations with reference to the evolution of the horse, based on the original gift of \$15,000 by the late William C. Whitney. Altogether we have secured through these three expeditions 146 fossil horses, or 418 specimens of vertebrates altogether, including some such superb types as the Texas Glyptodon, the skulls of Mastodons, and the ancestral deer-antelope, *Merycodus*. The exhibition of the horse series has been enriched this year by adding the beautiful skeleton of *Neohipparion whitneyi* and *Mesohippus bairdii*. Casts of the specimens of fossil horses have been distributed to a large number of institutions, and the exhibition of the evolution of the horse is most popular. Researches for the monograph on the evolution of the horse are being carried on by Professor Osborn and Mr. J. W. Gidley. Some of the new osteological preparations by Mr. S. H. Chubb should be mentioned, especially a series of preparations of skulls and teeth, and of the complete skeleton of the draught horse in action.

The Bridger expedition was especially successful in demonstrating the existence of the armadillo in North America at a very early period, and in securing the complete skeleton of a fossil monkey. From the Cretaceous our series of marine reptiles or Mosasaur and Plesiosaur skeletons was greatly extended. From the Bone Cabin Quarry we were fortunate in adding to our collection of Dinosaur skulls. These are among the greatest rarities in the Museum.

The exhibition hall of fossil mammals has been completely re-arranged in a series of alcoves, each of which illustrates the evolution and distribution of a single group. This is found to greatly enhance the educational value of the exhibition.

Specimens from the Pampean Collection are beginning to find their way into the hall. In order to facilitate the prepara-

tion of this particular collection, a special subscription of \$1,200 by Messrs. James, Havemeyer, Dodge and Osborn was contributed. The fine Sabre-tooth Tiger skeleton has been mounted with this fund, and one of the large sloths is almost ready for mounting.

The hall has also been enriched by a number of additions to Knight's series of restorations of the extinct animals of North America, presented by Mr. J. Pierpont Morgan. Each restoration is now accompanied by a model; and the reproductions of both the models and the pictures are spreading the reputation of the Museum abroad and in this country.

We are indebted to Mr. Morgan also for the gift of the skull of the rare white rhinoceros.

Through exchange several casts have been received from Yale University Museum, and foot-tracks from the Middle Triassic, through Mr. Gordon.

The increasing scientific value of the collection is indicated by the increasing number of scientific visitors and of special students. A large number of scientific papers has been published by various members of the department.

Dr. O. P. Hay has been honored by a grant from the Carnegie Institution, enabling him to devote all his time to researches upon the evolution of the Testudinata. In return for the special privileges extended to Dr. Hay, the Institution has given him a special grant, so that our entire collection of Testudinata is now being prepared and will shortly be rearranged. In connection with this work for the Museum, Dr. Hay has received the title of Associate Curator in charge of Chelonia.

DEPARTMENT OF ARCHÆOLOGY.—With the beginning of the college year, Mr. Saville, the acting head of this department, accepted an appointment at Columbia University as Loubat Professor of American Archæology, his time and attendance at the Museum being so adjusted as to enable him to assume the new obligations incident to this appointment. In June, as a representative of the Museum, he went to Mexico and arranged for important exchanges with the authorities of the National

The JESUP ARCHAEOLOGICAL EXPEDITION.—COLUMBIA RIVER, WASHINGTON
A characteristic view in the valley of the Yakima. In the distance are the foot-hills of the Cascade range. The loose stones in the foreground mark an Indian grave.

Museum, secured data bearing upon Mexican archæology, and re-examined the Ruins of Monte Alban.

The collections in the Loubat Hall have been arranged so as to show the geographical sequence of the several special culture areas of the ancient people of Mexico and Central America and the progress made by the various prehistoric nations. This has necessitated the provision of several new cases and the printing of a large number of descriptive labels. A guide to the hall is in process of preparation.

The general exhibits of the archæology of the United States have been enlarged through the material collected in the valley of the Columbia by Mr. Harlan I. Smith, and by minor additions, as will be noted by referring to the list of accessions. The preparation of a series of relief maps, illustrating the work of the ancient Mound Builders, has received considerable attention, and an exhibit, illustrative of the customs of the Atlantic Coast Indians, has been installed.

The return of Mr. A. F. Bandelier, after an absence of eleven years in Peru and Bolivia, has awakened interest in the Museum's large collection of archæological specimens from South America. Mr. Bandelier, assisted by Mrs. Bandelier, has undertaken the re-examination and rearrangement of all the material exhibited in the Peruvian gallery, and has added to the Museum's records scientific data, historical matter and incidental information, which greatly enhance their value.—

Mr. C. W. Mead has selected a series from the South American collections to illustrate the use of musical instruments by the Incas, and has written a very creditable guide leaflet on this subject.

In May, Dr. Aleš Hrdlička, who, through the liberality of the Messrs. Hyde, has for several years been attached to the Museum, received an appointment at the National Museum, Washington. While his departure from New York leaves a distinct vacancy in our scientific ranks, which may retard the development of the Museum's contemplated work in Physical Anthropology for a while, we are glad that the toil of one of our scientific men has received such prompt acknowledgment, and we wish him every success in his new undertaking.

Through the continued generosity of Dr. Frederick E. Hyde, Mr. Volk has gathered and finally arranged the vast quantity of material bearing upon the early appearance of man in the Trenton Gravel, and it is probable that this work, which was begun several years ago and has been carried on with the utmost patience and care, will soon be finished, the material installed and the results ready for publication.

Mr. George H. Pepper, in charge of the archæological and certain phases of the ethnological work in the southwest, has assiduously cared for the instructive display of the material in the exhibition halls; and through his work among the Indians during the past summer has brought to the Museum collections of pottery, blankets, photographs, etc., supplementing and enlarging the collections which were already in our possession, and largely the gift of Mr. B. Talbot B. Hyde and Frederick E. Hyde, Jr.

In concluding this the tenth report of this department, and in view of the appointment of its former curator, Professor F. W. Putnam, to a position in many respects of greater responsibility—viz., that of Director of the Department of Anthropology at the University of California—it is fitting that we should outline briefly the development at the American Museum of those departments which have been instituted under his advice and the administration of which has been assigned to his direction:

Professor Putnam was appointed Curator of Anthropology in the spring of 1894. At that time the exhibition of the collections relating to Man was confined to what is now the "Shell Hall," on the fifth floor, and the western half of the "Bird Gallery" on the third floor. There had been no systematic explorations, no scientific publications, and the head of the department had but a single assistant. Within these ten years the department has grown until, at the present time, the collections occupy eight large exhibition halls and twelve storage rooms. Explorations have been made throughout America and parts of Asia, the scientific publications fill a score of volumes, and the present department staff includes no less

than seven men of recognized scientific attainments. The Museum has lost a valuable aid from the scientific staff and a good friend and companion.

DEPARTMENT OF ETHNOLOGY.—The department has received notable accessions during the year, both from Museum expeditions and by exchange. The following deserve especial mention: From North America, the Kwakiutl collection obtained by Mr. Hunt, the Blackfoot, Gros Ventres and Sioux collection by Dr. Wissler, the Ojibwa by Mr. Jones, a collection illustrating Maidu ceremonials by Dr. Dixon, the Lower Thompson by Mr. Teit, a small collection from southern California by Miss DuBois and one from Oaxaca by Mr. Saville.

By arrangement with the Bureau of Missions, an interesting collection of African material from Angola and the Congo, made by Rev. Frank T. Lea, has been deposited with the Museum.

The Chinese collections by Dr. Laufer, made under the auspices of the East Asiatic Committee, have been largely increased by various shipments.

An especially valuable collection from central Australia has been obtained by exchange from the National Museum at Melbourne, Victoria.

The above, all except the Chinese and African collections, are installed, and on exhibition. The extensive material from Siberia, obtained by Messrs. Bogoras and Jochelson for the Jesup North Pacific Expedition, was placed in the Siberian Hall on the ground floor and opened to the public in September. The Demuth collection of pipes, with accessions received during the year, has been placed in the west wing on the second floor.

The Chinese collection has been placed temporarily in the cases in the corner gallery of the west wing, and is now in process of permanent installation.

Much attention has also been given to the preparation of models and figures illustrative of the life of the tribes of Siberia and of North America. Several of these groups are now ready for exhibition.

The Huntington California Expedition was continued during the summer by Dr. Dixon assisted by Mr. Howard B. Wilson. Mr. Wilson was attacked by typhoid fever shortly after reaching the field, and, when apparently convalescent, suffered a relapse and died. Mr. Wilson was a recent graduate of Harvard University, and had already shown marked promise as a worker in anthropology. His death is a loss both to the Museum and to science. Dr. Dixon continued his researches on the Maidu, Pit River and Shasta Indians, and brought back a mass of valuable information and specimens. It is gratifying to note that the scientific results of the Huntington Expedition are attracting wide and increasing interest among ethnologists.

North American Research.—Dr. Wissler proceeded in the spring of 1903 to Montana and Canada to continue his work among the Sioux, Gros Ventres and Blackfeet. He spent the summer among these Indians, and was again notably successful, his collection illustrative of the development of decorative art throwing much light upon a problem to which the department has given particular attention during recent years.

Mr. William Jones visited the Ojibwa of Canada, the Menominee and the Sauk and Fox, and made extensive collections both of material and information.

Both Dr. Wissler's and Mr. Jones's expeditions were conducted in coöperation with the Royal Ethnographical Museum of Berlin.

Mr. James Teit has continued his work among the tribes of the Lower Fraser and the Upper Thompson and Nicola Valleys.

Miss Constance Goddard DuBois visited the Diegueno of southern California, and obtained information with regard to their ceremonials and also a small collection of material for exhibition.

Rev. J. W. Chapman has been continuing his work for the Museum among the Indians of the Lower Yukon in Alaska.

Mr. Henry W. Tate is furnishing material for the department from the Tsimshian Indians of the North Pacific coast.

In the course of an expedition which he is conducting for the United States government, Dr. John R. Swanton has

THE JESUP NORTH PACIFIC EXPEDITION—SIBERIA

The illustration shows the method of transporting the Yakut collection across eastern Siberia. This collection is now on exhibition at the Museum.

undertaken to obtain additional information regarding Alaskan material now in the Museum.

Mr. Casper Mayer visited the Indian Congress on Long Island during the summer and succeeded in obtaining 33 casts of Indians, chiefly Sioux.

Capt. George N. Comer and Capt. James S. Mutch are in the Arctic, and are continuing their collections under the direction of the department.

Expedition in China.—During the past year Dr. Laufer has been actively pushing the work in China, carried on under the auspices of the East Asiatic Committee. Very extensive collections, referring particularly to the industrial life of the Chinese, have been received by the Museum. Dr. Laufer is expected to return to New York during the spring of 1904, and will give his personal attention to the installation of these collections.

From the *Jesup North Pacific Expedition*, the first Memoir by Mr. Bogoras on the Chukchee is now in press and will appear shortly. Mr. Bogoras is now in Europe and at work on the second part of his studies on the Chukchee, a large portion having been already completed. Mr. Jochelson has finished his first Memoir on the Koryak, and it will go to press in the near future, and Dr. Swanton has completed a lengthy Memoir on the Haida Indians, which is now ready for publication.

Although it will take some time to work up scientifically all the material that has come to the Museum as the result of this expedition, the demonstration of a close relationship existing between certain tribes of eastern Siberia and the aborigines of our own country is one of the results that it was originally hoped might come from this work.

Dr. Farrand is editing Mr. Teit's notes on the mythology of British Columbia, and it is expected that the work will be ready for the press during the first half of 1904.

Dr. Dixon has practically completed an exhaustive paper on the ethnology of the Maidu Indians of California.

Dr. Wissler has been engaged in revising his notes on the decorative art of the Sioux, in the light of information obtained by him during the summer.

Dr. A. L. Kroeber, of the University of California, is at work upon a detailed account of Arapaho ceremonials, based upon materials collected by him for the Museum.

Mr. William Jones has completed a paper upon the language of the Sauk and Fox, also based upon information collected in the course of Museum expeditions.

Lectures.—Professors Boas and Farrand have conducted a course of lectures on general ethnography for students of Columbia University, in the lecture room of the Museum, using the collections for purposes of illustration.

Dr. Wissler, assisted by Mr. Lewis, has given a course of lectures on primitive industries in connection with the extension work of Teachers College. This course has also been given at the Museum, and is based entirely upon the demonstration of specimens. Dr. Farrand will conduct a similar course during the summer of 1904, and it is hoped that work of this character will develop rapidly in the future.

DEPARTMENT OF ENTOMOLOGY.—After considerable time spent in arranging the collections, the new hall of this department (the gallery floor of the east wing) was opened on March 8, when the entire collection of butterflies, donated by the late Very Reverend Eugene A. Hoffman, was placed on exhibition for the first time. This donation consists of about five thousand specimens of *Lepidoptera*, arranged in fifteen cases on the east and the south side, and the local collection transferred from the old building to the new hall, occupying the rail cases. Excellent exhibition space has been given to specimens of insect architecture and to the Jesup collection of insects injurious to forest trees. Much time has been spent in the regular routine work of the department. The sets of insects for the use of schools have been in circulation, and many specimens from our study collections have been used by visiting scientists.

Among the notable additions to the department is a collection of over eight thousand *Diptera*, containing more than one thousand species and one hundred and seventy types, given by

Dr. William Morton Wheeler. This gift raises our collection of *Diptera* to the first rank of scientific importance.

A valuable collection of Gall Insects (*Cynipidae*), containing several thousand specimens and many types, has been donated by Mrs. Margaret Bassett.

Mr. Samuel V. Hoffman has generously continued the work begun by his father in the Black Mountains and made it possible for the Curator to spend seven weeks in this region, extending the work commenced in 1900. Mr. Hoffman has contributed also towards the purchase of *Lepidoptera*.

Mr. Beutenmüller's publications are referred to in another part of this report.

DEPARTMENT OF INVERTEBRATE ZOÖLOGY.—During the past year all the material in the department has been thoroughly overhauled, classified and catalogued, and duplicate specimens set aside for exchange and for the use of the public schools. Considerable progress has been made in the installation of specimens for exhibition. Thirty compound microscopes are mounted in the cases so as to show typical forms of the Protozoa, which are too small to be seen by the naked eye. For the material used in this exhibit the Museum is indebted to Professor Gary N. Calkins. Dr. Dahlgren has prepared a number of beautiful models of Radiolarians, Foraminifera, Planarians, Nemerteans, Hydroids, and of the Oyster and Quahog Clam. Many of the specimens in the fine collection of Japanese glass-rope sponges, secured for the Museum by Professor Bashford Dean, have been bleached and mounted. A fine large specimen of the Giant Spider Crab of Japan has been mounted and placed on the south wall of the Synoptic Hall. Small biological collections, representing geographical variation, gynandromorphism and the life-history of the boll-weevil, have been put on exhibition, and others are in course of preparation.

The following donations to the department are especially noteworthy: The department has acquired a specimen of a very rare Selachian, taken at a depth of five hundred fathoms in the Japan Sea. Four specimens of a rare form of some

of the corals were donated by Professor Whitfield. Through Commissioner George M. Bowers, a number of Hawaiian fishes were received, and Dr. Joseph Thompson, U. S. N., donated a collection of fishes from Dry Tortugas. The New York Zoological Society donated several fine specimens of snakes, which have been mounted for exhibition. From Dr. C. H. Eigenmann were received representatives of all but one of the species of cave vertebrates of the United States. Several insect preparations, representing metamorphoses, and typical forms for the synoptic collection, were purchased from the Kny-Scheerer Co. A fine collection of different species of mosquitoes, with their larvæ and pupæ, was purchased as a preliminary step toward installing a collection to illustrate the origin of malaria.

By far the most important work entrusted to and accomplished by the department was that of Mr. Sherwood, who has succeeded in putting the relations of the Museum to the public schools of the city on a firm scientific and pedagogical basis. The collections of specimens and the careful outlines of hints for the teachers in their use of the collections are an enormous advance on all former attempts of the Museum in this direction. To this fact the appreciation of the teachers is an eloquent witness. From all parts of the city have been received numerous requests from teachers for material to aid them in their nature-study work.

To meet these requests we have made up from our duplicate specimens study collections of invertebrates and birds, which are loaned for short periods to any school in the city making application for them. For this work the Department of Entomology has prepared 35 cases of insects, the Department of Mineralogy and Conchology 25 sets of mollusk shells and 20 sets of minerals, the Department of Mammalogy and Ornithology 20 sets of birds, the Department of Archæology and Ethnology 5 sets of anthropological implements. These collections have been turned over to the Department of Invertebrate Zoölogy, and, with the 80 sets of invertebrates prepared from our own specimens, make a total of 175 collections which are available as loans to the schools. Each species

of a collection is accompanied by an individual label giving common name, scientific name and locality. The collections are especially welcome in the schools of the lower East Side, where we have found as many as 4,000 children in a building and scarcely a single specimen to illustrate nature work.

A great number of school children, both singly and accompanied by their teachers, have studied the collections during the year, and a number of lectures, especially designed for school children, have been given by Mr. Sherwood and some of the teachers.

During the second quarter of the year there were many inquiries from artists, writers, business men and other visitors, especially foreign travelers, for information concerning subjects pertaining to the department.

Professor W. M. Wheeler assumed his duties as Curator of the department in September. Dr. Duerden, Honorary Curator of Coelenterates, has been engaged in negotiating exchanges in corals with some of the larger museums in England, Ireland and this country.

The following papers have been contributed by members of the department during the past year: J. E. Duerden, "West Indian Sponge-incrusting Actinians;" W. M. Wheeler, "Some Notes on the Habits of *Cerapachys*," *Psyche*, Vol. X, 1903; "Extraordinary Females in Three Species of *Formica*, etc.;" "Some New Gynandromorphous Ants, etc." *Bull. Am. Mus. Nat. Hist.*, Vol. XIX, 1903.

DEPARTMENT OF BOOKS AND PUBLICATIONS.—The adoption of the decimal system (a generally approved method of classification) and the placing of the library of the New York Academy of Sciences and that of the American Ethnological Society in our custody have necessitated the classification of the combined libraries and the rejection of much duplicate material. Some idea of the amount of labor involved may be gathered from the fact that the time of six assistants during the entire year has been devoted exclusively to this work.

The anthropological, archæological and ethnological books have been brought together and installed in the room of the

Anthropological Seminary, where they are now available for reference.

The contiguity of several large educational and scientific institutions in and about New York has made imperative the existence of a large, complete and well arranged library of science; and it seems destined that the Museum, occupying, as it does, a central position, employing a large staff of scientific workers, and offering assembly and lecture halls, laboratories and instruments to scientists and students of natural history, should be the institution to bring together and arrange for general consultation a library bearing upon the various branches of natural science. With this in view, the work of the past year may be considered as the laying of a foundation upon which such a library may be built—a library that will not duplicate the work that is being done by our neighbor on the north, the National Geographical Society, or our neighbor on the south, the New York Historical Society, but a library that nevertheless will require the expenditure of considerable sums of money for the purchase of special books of reference and for the completion of imperfect series of volumes now in our possession.

An entire set of bibliographical cards, published by the Concilium Bibliographicum at Zurich, has been received, and, what is of quite as much moment, these cards have been so classified that one desiring specific information in regard to any current zoölogical article, may find easy reference. The employment of a binder has greatly reduced the expense of keeping our books in repair and has solved the problem of the care and classification of reprints.

The reorganization of the general work of this department has necessitated a revision of our exchange list. The printing and distribution of the Bulletins and Memoirs are now carried on according to the following schedule:

1. The regular edition of the scientific publications consists of six hundred copies.
2. An author desiring copies in addition to those provided for below may have the same at cost, provided a request is made to the Editor at the time the manuscript is submitted.

THE WILLIAM C. WHITNEY EXPEDITION—SOUTH DAKOTA
The light-colored rock in the center is Upper Miocene. It was in an outcrop a little to the right that the party found a new three-toed horse (Neohippidium whitneyi). The fossil skeleton is now mounted and on exhibition.

3. The Curator of Books and Publications, on receiving an edition from the printer or binder, arranges and disposes of the publication as follows:

a. A "reserve series" of fifty copies is set apart, not for the present to be drawn upon, and for distribution in complete sets only;

b. An "author's series" of twenty-five copies is handed to the author for his private use;

c. A "reference series" not to exceed two hundred copies is issued to the leading libraries, museums and educational institutions of the world, it being the purpose to have the list of these institutions made with care, and to place, either by sale or gift, a complete set of our publications in each for reference for all future time.

d. An "exchange series" not to exceed one hundred copies is issued to such institutions, organizations and individuals as may furnish an equivalent exchange.

e. A "general series," from which are drawn copies for distribution among working men of science (as may be recommended by the heads of departments and duly approved by the Director), for the preparation of "reviews," for distribution among friends of the Museum, for use among field helpers, for use as complimentary copies, sales, etc.

Following is a list of the scientific publications of the Museum issued in 1903, as received by the Curator for distribution and exchange:

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALÆONTOLOGY.

Bulletin, Volume XIX.

C. H. Hitchcock. "Notice of a Species of *Acidaspis* from a Boulder of Marcellus Shale, Found in Drift, at West Bloomfield, New Jersey." (Pages 97-98, plate vi.)

R. P. Whitfield. "Notice of Six New Species of *Unios* from the Laramie Group." (Pages 483-487, plates xxxviii-xl.)

R. P. Whitfield. "Observations on a Remarkable Specimen of *Halysites* and Description of a New Species of the Genus." (Pages 489-490, plates xli and xlii.)

Journal, Volume III.

E. O. Hovey. "Martinique and St. Vincent Revisited." (Pages 38-56, 9 illustrations.)

DEPARTMENT OF MAMMALOGY AND ORNITHOLOGY.

Bulletin, Volume XIX.

J. A. Allen. "Description of a New Species of *Sigmodon* from Ecuador." (Pages 99-100.)

J. A. Allen. "Report on the Mammals Collected in Northeastern Siberia by the Jesup North Pacific Expedition, with Itinerary and Field Notes by N. G. Buxton." (Pages 101-184.)

J. A. Allen. "Descriptions of New Rodents from Southern Patagonia, with a Note on the Genus *Euneomys* Coues, and an Addendum to Article IV. on Siberian Mammals." (Pages 185-196.)

J. A. Allen. "Mammals Collected in Alaska and Northern British Columbia by the Andrew J. Stone Expedition of 1902." (Pages 521-567.)

J. A. Allen. "List of Mammals Collected by Mr. J. H. Batty in New Mexico and Durango, with Descriptions of New Species and Subspecies." (Pages 587-612.)

J. A. Allen. "A New Deer and a New Lynx from the State of Sinaloa, Mexico." (Pages 613-615.)

DEPARTMENT OF VERTEBRATE PALÆONTOLOGY.

Memoirs, Volume I.

H. F. Osborn. "The Reptilian Subclasses Diapsida and Synapsida and the Early History of the Diaptosauria." (Pages 449-508, plate xl, and 24 text figures.)

Bulletin, Volume XIX.

O. P. Hay. "On Certain Genera and Species of North American Cretaceous Actinopteroous Fishes." (Pages 1-95, plates i-v, and 72 text figures.)

W. D. Matthew. "The Fauna of the Titanotherium Beds at Pipestone Springs, Montana." (Pages 197-226, with 19 text figures.)

W. D. Matthew. "A Fossil Hedgehog from the American Oligocene." (Pages 227-229, with 1 text figure.)

W. K. Gregory. "Adaptive Significance of the Shortening of the Elephant's Skull." (Pages 387-394, plate xxiii, and 4 text figures.)

O. P. Hay. "On a Collection of Upper Cretaceous Fishes from Mount Lebanon, Syria, with Descriptions of Four New Genera and Nineteen New Species." (Pages 395-452, plates xxiv-xxxvii.)

Barnum Brown. "A New Species of Fossil Edentate from the Santa Cruz Formation of Patagonia." (Pages 453-457, with 2 text figures.)

Henry Fairfield Osborn. "*Ornitholestes heymanni*, A New Compsognathoid Dinosaur from the Upper Jurassic." (Pages 459-464, with 3 text figures.)

J. W. Gidley. "A New Three-toed Horse." (Pages 465-476.)

J. W. Gidley. "On Two Species of *Platygonus* from the Pliocene of Texas." (Pages 477-481, with 5 text figures.)

Henry Fairfield Osborn. "*Glyptotherium texanum*, A New Glyptodont, from the Lower Pleistocene of Texas." (Pages 491-494, plate xliii.)

Barnum Brown. "A New Genus of Ground Sloth from the Pleistocene of Nebraska." (Pages 569-583, plates I and li.)

J. W. Gidley. "The Fresh-water Tertiary of Northwestern Texas. American Museum Expeditions of 1899-1901." (Pages 617-635, plates lii-lviii, and 4 text figures.)

Richard Swann Lull. "Skull of *Triceratops serratus*." (Pages 685-695, plate lix, and 1 text figure.)

Henry Fairfield Osborn. "The Skull of *Creosaurus*." (Pages 697-701, with two text figures.)

DEPARTMENT OF ETHNOLOGY.

Memoirs, Volume III.

G. T. Emmons. "The Basketry of the Tlingit." (Pages 229-278, plates v-xviii, and 73 text figures.)

Bulletin, Volume XIX.

Aleš Hrdlička. "Divisions of the Parietal Bone in Man and Other Mammals." (Pages 231-386, plates vii-xxii, and 39 text figures.)

Journal, Vol. III.

F. Boas. "The Jesup North Pacific Expedition." (Pages 71-119, 2 maps, 20 illustrations.)

DEPARTMENT OF ARCHÆOLOGY.

Memoirs, Volume IV.

Harlan I. Smith. "Shell Heaps of the Lower Fraser River, British Columbia." (Pages 133-192, plates vi and vii, and 51 text figures.)

DEPARTMENT OF ENTOMOLOGY.

Bulletin, Volume XIX.

William Beutenmüller. "Notes on Some Species of *Catocala*." (Pages 505-510.)

William Beutenmüller. "Notes on Some Beetles from the Black Mountains, with Descriptions of New Species." (Pages 511-519, plates xlviii and xlix.)

William Beutenmüller. "Description of a New Moth from North Carolina." (Pages 585-586.)

William Beutenmüller. "A New Katydid from Florida." (Pages 637-638, with 1 text figure.)

DEPARTMENT OF INVERTEBRATE ZOOLOGY.

Bulletin, Volume XIX.

J. E. Duerden. "West Indian Sponge-incrusting Actinians." (Pages 495-503, plates xlv-xlvii.)

William Morton Wheeler. "Extraordinary Females in Three Species of *Formica*, with Remarks on Mutation in the Formicidæ." (Pages 639-651, with 3 text figures.)

William Morton Wheeler. "Some New Gynandromorphous Ants, with a Review of the Previously Recorded Cases." (Pages 653-683, with 11 text figures.)

Five numbers of *The American Museum Journal* were issued, and in connection with four of the numbers Guide Leaflets were issued as supplements, as follows:

- “The Evolution of the Horse”.....W. D. Matthew
 “The Hawk-moths of the Vicinity of New York City”....Wm. Beutenmüller
 “The Musical Instruments of the Incas”.....Charles W. Mead
 “The Collection of Fossil Vertebrates”.....W. D. Matthew

DEPARTMENT OF MAPS AND CHARTS.—Dr. Woodward has spent the entire year in the preliminary work of classifying, preparing and cataloguing the Museum’s collection of maps and charts, and by the end of another year it is hoped that these will be in such shape that they will be available for reference.

TRANSPORTATION.—The mere tabulation of the various railways and transportation companies that, through the granting of passes and special rates, have assisted our field work—indeed, one might almost say that have made this work possible—is not an adequate acknowledgment of our indebtedness. We feel that these corporations are co-workers with us, and that any credit the Museum may receive for its effort to promote science and educate the people should be shared with those who have united with us towards this common end. The list is as follows :

Atchison, Topeka & Santa Fé Railway.
 Canadian Pacific Railway.
 Chicago & Northwestern Railway.
 Chicago, Milwaukee & St. Paul Railway.
 Chicago, Burlington & Quincy Railway.
 Canadian Northern Railway.
 Chicago, Rock Island & Pacific Railway.
 Erie Railroad.
 Great Northern Railway.
 Missouri Pacific Railway.
 Illinois Central Railroad.
 Mexican International Railroad.
 Mexican Central Railway.
 Mexican National Railway.
 Northern Pacific Railway.
 Southern Pacific Company.
 Southern Railway.
 Union Pacific Railroad.
 Wabash Railway.

THE MUSEUM PALEONTOLOGICAL EXPEDITION—BAD LANDS OF WYOMING.

The view shows the camp, and in the distance the Eocene rocks, horizontally stratified. Fossils may be found in these rocks almost anywhere, from the valley to the crest.

THE ATTENDANCE.—On several occasions during the year, the attendance has been such as to tax our resources. The largest daily attendance during the history of the Museum was recorded on February 23, when 7,470 visitors entered the building. The total lecture attendance was 76,779. The number of scholars visiting the Museum for purposes of study has risen from 5,000 in 1902 to 7,032 in 1903, and the number of teachers accompanied by students, i. e., the number of formal classes meeting at the Museum has risen from 317 to 430. This is largely due to the effort that has been made to bring the Museum into active co-operation with the teachers of the City and to provide according to their requests. The total attendance for the year was 388,090.

ASSOCIATED SOCIETIES AND ORGANIZATIONS.—The Museum from year to year is becoming more and more a place for the meeting of men interested in science and education. The following organizations have held meetings during the year, and frequently have offered scientific programmes sufficiently attractive to fill the assembly rooms to overflowing:

The New York Academy of Sciences.

(Astronomy, Physics and Chemistry; Biology; Geology and Mineralogy; Anthropology and Psychology.)

The Linnaean Society of New York.

The New York Entomological Society.

The New York Mineralogical Club.

Audubon Society.

New York Historical Society.

American Ethnological Society.

American Institute of Mining Engineers.

West Side Natural History Society.

New York Council of the Sequoia League.

National Indian Association.

Prof. H. F. Osborn's class in Palæontology.

Prof. M. H. Saville's class in Archæology.

Dr. J. E. Peabody's class in Zoölogy.

Dr. Clark Wissler's class in Ethnology.

LECTURES.—The courses of lectures to teachers, provided for by a grant from the State, were continued, and Professor Bickmore delivered the following:

Spring Course.

January	24—Oxford, Westminster and the Coronation.
“	31—Oxford, Westminster and the Coronation.
February	7—Glasgow and Edinburgh.
“	14—Glasgow and Edinburgh.
“	21—The Adirondack Park.
“	28—The Adirondack Park.
March	7—American Forests.
“	14—American Forests.

Autumn Course.

October	17—The Development of New York City.
“	24—The Development of New York City.
“	31—Niagara Falls.
November	7—Niagara Falls.
“	14—Germany—Berlin.
“	21—Germany—Berlin.
“	28—Germany—Potsdam and Dresden.
December	5—Germany—Potsdam and Dresden.

The following were delivered to members of the Museum by Professor Bickmore unless otherwise indicated:

Spring Course.

March	5—Oxford, Westminster and the Coronation.
“	12—Glasgow and Edinburgh.
“	19—The Adirondack Park.
“	26—American Forests.

Autumn Course.

November	12—Mount Pelé and the Destruction of St. Pierre. (Dr. E. O. Hovey.)
“	19—The Development of New York City.
December	3—Niagara Falls.
“	10—Germany—Berlin.
“	17—Germany—Potsdam and Dresden.

The following were delivered to the public on holidays:

New Year's Day, January 1, 1903—The Western Riviera.
Washington's Birthday, February 23, 1903—The Eastern Riviera.
Labor Day, September 7, 1903—Bird Life About New York City. (Frank M. Chapman.)
Election Day, November 3, 1903—Life Among the Navajo Indians. (George H. Pepper.)
Thanksgiving Day, November 26, 1903—The Development of New York City.
Christmas Day, December 25, 1903—Germany—Berlin and Dresden.

Under the supervision of the Board of Education of the City of New York, in coöperation with the American Museum of Natural History, the following lectures were delivered:

Tuesday evenings.

January	6—London: The World's Metropolis.	Thomas Edward Potterton
"	13—Berlin and Military Life in Germany.	Prof. Henry Zick
"	20—Paris.	Ernest R. Holmes
"	27—Switzerland.	W. Torrence Stuchell
February	3—Venice.	Dr. Augusta J. Chapin
"	10—Naples and Pompeii.	Dr. Augusta J. Chapin
"	17—Spain.	William Freeland
"	24—La Belle France.	R. S. Dawson
March	3—Florida.	Arthur C. Jackson
"	10—The Bermudas.	Prof. Charles L. Bristol
"	17—Martinique and the Mt. Pelé Tragedy.	Roland S. Dawson
"	24—The Land and People of Central America.	Prof. Emory R. Johnson
"	31—The West Indies.	George Donaldson
April	7—The Land of the Incas.	Mrs. Alice D. Le Plongeon
"	14—The West Coast of South America.	Ernest C. Rost
"	21—Panama and Venezuela.	Peter MacQueen
"	28—Life in Argentine.	Dr. E. L. Corthell
October	6—Saunterings in Merrie England.	Thomas Edward Potterton
"	13—Scotland.	W. T. Dorward
"	20—Finland and Its People.	H. Montague Donner
"	27—The Netherlands.	Hon. George F. Corey
November	3—The Picturesque Rhine.	Francis L. Strickland
"	10—Nuremberg.	W. D. P. Bliss
"	17—Spain.	F. E. Partington
"	24—Rome as It Is To-day. (An interesting account of present conditions in the imperial city.)	Frank A. Gallup
December	1—Venice.	E. C. Chorley
"	8—Florence, the City of Art and Memories.	Alfred J. Talley
"	15—Constantinople.	Theo. Chopourian

Saturday evenings.

January	10—Magnetism and Diamagnetism.	Prof. E. R. von Nardroff
"	17—Electricity at Rest.	Prof. E. R. von Nardroff
"	24—Electricity in Motion: Its Chemical Effects.	Prof. E. R. von Nardroff
"	31—Electricity in Motion: Its Heating Effects.	Prof. E. R. von Nardroff
February	7—Electricity in Motion: Its Magnetic Effects.	Prof. E. R. von Nardroff
"	14—Electricity in Motion: Its Inductive Effects.	Prof. E. R. von Nardroff
"	21—Cathode Rays, X-Rays, Radium Rays.	Prof. E. R. von Nardroff
"	28—Electromagnetic Waves: Their Properties and Uses.	Prof. E. R. von Nardroff
March	7—Our Water Supply: How We Get It and How We Waste It.	Thomas A. Fulton
"	14—Fresh-water Fish and Fish Culture.	W. E. Meehan
"	21—The Message of the Flowers.	Silas H. Berry
"	28—Birds in Nature.	Frank M. Chapman

April	4—The General Principles of Organic Evolution.	Dr. Henry E. Crampton
"	11—The Physical Evolution of the Human Species.	Dr. Henry E. Crampton
"	18—The Racial Evolution of Man.	Dr. Henry E. Crampton
"	25—The Mental and Moral Evolution of Man.—Natural Selection and Ethical Evolution.	Dr. Henry E. Crampton
October	3—Plant Life: The Large Groups and Their Characteristics.	Prof. Francis E. Lloyd
"	10—Plants in Their Environment; Adaptations; the Struggle for Existence; Geographical Distribution.	Prof. Francis E. Lloyd
"	17—The Vegetation of the Arctic Regions and of Mountain Tops.	Prof. Francis E. Lloyd
"	24—The Vegetation of the Temperate Regions: The Forests.	Prof. Francis E. Lloyd
"	31—The Vegetation of the Temperate Regions: The Deserts.	Prof. Francis E. Lloyd
November	7—The Vegetation of the Tropics: The Vegetation of Dominica as a Type.	Prof. Francis E. Lloyd
"	14—Climate and Mankind: Introduction: The General Relations of People to Climate as Seen in Their Occupations, Manners and Customs, and State of Civilization.	Prof. Richard Elwood Dodge
"	21—Life in Deserts.	Prof. Richard Elwood Dodge
"	28—Life in Temperate Forest and Grass Lands, as Determined by the Conditions of Vegetation and Climate.	Prof. Richard Elwood Dodge
December	5—Life in the Tropical Forests, as Compared with that in Other Climatic Regions.	Prof. Richard Elwood Dodge
"	12—Mountains and People: The Influence of Mountains Upon Peoples as Seen in Their Customs, Trade Relations, and in the Effect Upon Their Imagination.	Prof. Richard Elwood Dodge
"	19—Plains People: Their Life, Customs, Economic Condition, State of Civilization, etc., as Determined by Their Environment.	Prof. Richard Elwood Dodge

In conclusion I would say that the essential features that have characterized the year 1903 have been the addition of many new names to our list of members, the extension of our educational work through lectures and circulating collections, the enlargement of our building, the increase in the personnel of the scientific staff and the scientific researches and announcements that have resulted from our exploring expeditions.

Very truly yours,

MORRIS K. JESUP,
President.

THE ANDREW J. STONE ZOOLOGICAL EXPEDITION—ARCTIC AMERICA

The view shows the method of transporting the specimens, and the characteristic vegetation of the north.

LIST OF ACCESSIONS, 1903.

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALÆONTOLOGY.

BY DONATION.

- CHARLES T. BEACH, Hartford, Conn.
Section of Ulodendon trunk, from Raub Mine, Kingston, Luzern
Co., Pa.
- C. P. LAURIE, Erie, Pa.
1 *Ammonites maugensitii*, 1 *Pecten æquivalvis*, 1 *Plagiostoma gigan-*
teum, 1 *Plagiostoma punctatum*.
- GEORGE A. GLAENZER, New York City.
1 Cast of *Opis Truellei*, from Cadouin, Dordogne, central France.
- REV. R. B. POST, Elizabeth, N. J.
35 Specimens of Miocene fossils, from Clinton, N. C.
- PROF. R. P. WHITFIELD, New York City.
10 Corals and 3 molluscs, Miocene fossils from Ballast Point, near
Tampa, Florida.
- REV. H. W. WINKLEY, Branford, Conn.
133 Specimens of fossils from several localities.
- J. A. MANLEY, New Brunswick, N. J.
4 Specimens of banded Trap.
- PROF. W. P. BLAKE, Tucson, Arizona.
1 Specimen of Diatomite.

BY EXCHANGE.

- 2 Stalactites from a cave near Walsingham, Bermuda.
15 Coal plants from Rhode Island.
5 *Anthracomya* from Nova Scotia.

BY PURCHASE.

- 16 Fossil sponges from Nöttlingen, Germany.
63 " " from the Misburg Clays.
14 " " skeletonized, in vials, from Misburg.
58 " " skeletonized, in vials, from Oberg.
13 " " from various localities.
1 *Lithostrotion Canadense*.
1 Slab *Favosites intertextus*.
170 Specimens of fossils.

THROUGH MUSEUM EXPEDITIONS.

- 2 *Baculites anceps*.
- 2 *Ammonites Woolgari*.
- 1 *Inoceramus problematicus*.
- 1 *Inoceramus fragilis*.
- 2 *Scaphites Warrenanus*.
- 5 *Ostrea Engelmani*.
- 6 *Camptonectes bellistriatus*.
- 1 *Camptonectes pertenuistriatus*.

About 600 specimens of lava, tuff, dust, "bombs" and ejected blocks from Martinique, St. Vincent, St. Thomas, Saba, Statia, St. Kitts, Nevis, Guadeloupe, Dominica and St. Lucia of the West Indies. Collected by E. O. Hovey.

DEPARTMENT OF MAMMALOGY AND ORNITHOLOGY.

MAMMALS.

A few Insects from Arabia.
Insects from New Mexico, collected by G. H. Pepper.
- H. F. WICKHAM, Iowa City, Iowa.
4 *Cychnus relictus*, 1 *Lachnosterna epigæa*, 4 *Eleodes longipilosa*, 4
Cicindela echo and 1 *Desmocerus wickhami*.
- OTTO SEIFERT, New York City.
5 *Arctia phalerata*.
2 *Subulodes arcasaria*.
- ERNEST THOMPSON SETON, New York City.
2 *Dytiscus harrisii*, 1 *Dytiscus* sp. ? and 3 *Belostoma americana*,
from Winnipeg, Canada.
- CAPT. WIRT ROBINSON, West Point, N. Y.
Beetles from Jamaica, B. W. I.
- R. S. WILLIAMS.
Butterflies from Bogota, Colombia.
- MISS NORTON, New York City.
Specimens of Insects from South America.
- REV. F. PETER FISCHER, Belmont, N. C.
2 *Dynastes tityus* from North Carolina.
- DR. CHARLES COLARDEAU, Guadeloupe, F. W. I. (Through Dr. Hovey).
2 *Dynastes hercules*.
- SAMUEL HENSHAW, Cambridge, Mass.
2 *Carabus nemoralis* from Massachusetts.
Eggs of Gipsy Moth " "
- EDWIN C. VAN DYKE, San Francisco, Cal.
Beetles from California.
- CHARLES W. LENG, Staten Island, N. Y.
Specimens of *Cicindela hirtilabris*, *C. scabrosa* and *C. abdominalis*,
from Florida.
- A. F. BANDELIER, New York City.
Beetles from Sicasica, Bolivia.
- J. H. COMSTOCK, Ithaca, N. Y.
Specimens of *Blepharocera capitata*.

HENRY SKINNER, Philadelphia, Pa.

- 1 *Psychophora fasciata* from Alaska.
- 1 *Tyndaris prosopis*.
- 4 *Tegrodera aloga* (cotypes).
- 1 *Chrybothris edwardsii*.
- 4 *Trichodes illustris*.

WILLIAM BEUTENMÜLLER, New York City.

- Collection of Insects from the mountains in North Carolina.
- 1 Katydid (*Crytophyllus floridensis*) from Florida.

BY PURCHASE.

- 225 Inflated Larvæ of Lepidoptera.
- 300 Cocoons, Pupæ and Eggs of Lepidoptera.
- 9 *Pamphila carolina*.
- Collection of exotic Beetles.
- Collection of Beetles from British Columbia, Canada.
- About 5,000 Insects from Merida, Venezuela.

THROUGH MUSEUM EXPEDITIONS.

- About 7,000 specimens from the Black Mountains, N. C. Collected by William Beutenmüller.

DEPARTMENT OF INVERTEBRATE ZOÖLOGY.

INVERTEBRATES.

BY DONATION.

JOHN HISCOX, New York City.

- 1 Rock Crab.

REV. M. B. CARLETON.

- Several Invertebrates.

J. A. R. DUNTZL, New York City.

- 1 Centipede.

I. B. SNIFFEN, New York City.

- Mollusk eggs.

O. SCHAERGES, New York City.

- 1 Annelid.

PROF. R. P. WHITFIELD, New York City.

- 5 Corals.

DR. E. O. HOVEY, New York City.

- 1 Land Crab.

DR. WILLIAM MORTON WHEELER, New York City.

- Collection of Invertebrates.

DR. JOSEPH SIMMS, New York City.

- 1 Scorpion.

J. C. THOMPSON, M.D., U. S. N.,

- 2 Crabs, 3 Sea-spiders.

DR. C. B. DAVENPORT, Chicago, Ill.

1 Crab.

CHESTER ABBOT, New York City.

Egg-case of Periwinkle.

H. E. CHURCH, New York City.

5 Sand-dollars.

R. WEBER, New York City.

Several Myriopods.

DR. L. O. HOWARD, Washington, D.C.

Collection illustrating the Boll-weevil.

MISS AUGUSTA RUCKER, Austin, Texas.

3 Solpugids, specimens of *Kænenia florenciæ*.

BY EXCHANGE.

4 Crayfishes.

BY PURCHASE.

Collection of Mosquitoes—eggs, larvæ, pupæ and adults.

6 Actinians.

Collection of Land Snail (*Helix alternata*), 406 specimens.

9 Insects.

7 Sets of Metamorphosis.

THE HOFFMAN ENTOMOLOGICAL EXPEDITION—BLACK MOUNTAINS OF NORTH CAROLINA

The view shows the dome of Mt. Mitchell (6710 ft.), the fir balsams with their branches bent by the prevailing winds, and the rhododendrons a mass of flowers.

INCORPORATION.

AN ACT

TO INCORPORATE THE

AMERICAN MUSEUM OF NATURAL HISTORY,

Passed April 6, 1869.

The People of the State of New York, represented in Senate and Assembly, do enact as follows :

SECTION 1. John David Wolfe, Robert Colgate, Benjamin H. Field, Robert L. Stuart, Adrian Iselin, Benjamin B. Sherman, William A. Haines, Theodore Roosevelt, Howard Potter, William T. Blodgett, Morris K. Jesup, D. Jackson Steward, J. Pierpont Morgan, A. G. P. Dodge, Chas. A. Dana, Joseph H. Choate and Henry Parish, and such persons as may hereafter become members of the Corporation hereby created, are hereby created a body corporate, by the name of "The American Museum of Natural History," to be located in the City of New York, for the purpose of establishing and maintaining in said city a Museum and Library of Natural History; of encouraging and developing the study of Natural Science; of advancing the general knowledge of kindred subjects, and to that end of furnishing popular instruction and recreation.

SEC. 2. Said Corporation shall have power to make and adopt a Constitution and By-Laws, and to make rules and regulations for the admission, suspension and expulsion of its members, and their government, the number and election of its officers, and to define their duties, and for the safe keeping of its property, and, from time to time, to alter and modify such Constitution, By-Laws, Rules and Regulations. Until

CONSTITUTION

OF THE

AMERICAN MUSEUM OF NATURAL HISTORY,

IN THE CITY OF NEW YORK.

ARTICLE I.

This Corporation shall be styled THE AMERICAN MUSEUM OF NATURAL HISTORY.

ARTICLE II.

The several persons named in the charter, and such others as they may add to their number, which shall not exceed twenty-five in all at one time, shall be the Trustees to manage the affairs, property and business of the Corporation, and in case of the death or accepted resignation of any Trustee, a new Trustee shall be elected to fill his place by the remaining Trustees; but no election of a Trustee shall be held except at a quarterly meeting of the Trustees, on written notice of not less than one week, specifying that such election is to be held, and the vacancy which is to be filled; and every election of Trustees shall be by ballot, and no person shall be deemed to be elected a Trustee, unless he shall receive the votes of at least three-fourths of the Trustees present.

ARTICLE III.

The Trustees shall meet quarterly, on the second Monday of every February, May, August and November, at an hour and place to be designated, on at least one week's written notice from the Secretary, and shall annually, at the quarterly meeting in February, elect the officers and committees for the ensuing year. They shall also meet at any other time to transact special business on a call of the Secretary, who shall

issue such call whenever requested so to do, in writing, by five Trustees, or by the President, and give written notice to each Trustee of such special meeting, and of the object thereof, at least three days before the meeting is held.

ARTICLE IV.

SECTION 1. The officers of said Corporation shall be a President, a First Vice-President, a Second Vice-President and a Treasurer, all to be elected from the Trustees. These officers shall be elected by ballot, and the persons having a majority of the votes cast shall be deemed duly elected. They shall hold their offices for one year or until their successors shall be elected.

SEC. 2. The Board of Trustees shall appoint each year, in such manner as it may direct, the following Standing Committees: an Executive Committee, an Auditing Committee, a Finance Committee, a Nominating Committee. These Committees are all to be elected from the Trustees, and the members shall hold office for one year, or until their successors shall be elected.

The Board of Trustees shall also have authority to appoint such other committees or officers as they may at any time deem desirable, and to delegate to them such powers as may be necessary.

ARTICLE V.

SECTION 1. The President shall have a general supervision and direction over the affairs of the Corporation, and shall preside at all the meetings of the Museum and of the Trustees. In his absence or inability to act, the First or Second Vice-President shall act in his place.

SEC. 2. The Secretary shall be appointed by the Board of Trustees. He shall be present, unless otherwise ordered by the Board, at all the meetings of the Museum and Trustees, of the Executive Committee and of such other Committees as the Board may direct. He shall keep a careful record of the proceedings of such meetings, shall preserve the seal, archives

and correspondence of the Museum, shall issue notices for all meetings of the Trustees and various committees, and shall perform such other duties as the Board may direct.

The Board of Trustees shall have power to appoint an Assistant Secretary, who, under its directions, shall perform the duties of the Secretary in his absence or inability to act.

SEC. 3. The Treasurer shall receive and disburse the funds of the Museum. He shall report in writing, at each quarterly meeting of the Trustees, the balance of money on hand, and the outstanding obligations of the Museum, as far as practicable; and shall make a full report at the Annual Meeting of the receipts and disbursements of the past year, with such suggestions as to the financial management of the Museum as he may deem proper.

SEC. 4. The accounts of the Museum shall be kept at the General Office, in books belonging to it, which shall at all times be open to the inspection of the Trustees.

These accounts shall be under the care of an Assistant Treasurer, who shall be appointed by the Board of Trustees and be under their direction. He shall give such bonds for the faithful performance of his duties as the Board may direct.

SEC. 5. The offices of Secretary and Assistant Treasurer may be held by the same person.

ARTICLE VI.

The Executive Committee shall consist of nine Trustees, of whom the President, First and Second Vice-Presidents and Treasurer shall be four. The five members of the Executive Committee, elected in February, 1887, shall forthwith draw lots for terms of one, two, three, four and five years, respectively, and the terms for which those drawing the two, three, four and five years, respectively, were elected, are hereby extended to cover those periods; and hereafter at each annual election one member of the Executive Committee shall be elected to serve for five years. They shall have the control and regulation of the Collections, Library and other property

of the Museum; and shall have power to purchase, sell and exchange specimens and books, to employ agents, to regulate the manner and terms of exhibiting the Museum to the public, and generally to carry out in detail the directions of the Trustees; but the Executive Committee shall not incur any expense or liability for the Museum exceeding two thousand dollars at one time, or exceeding in all ten thousand dollars, in the interval between the quarterly meetings of the Trustees, without the express sanction of the Trustees. Five members of the Committee shall constitute a quorum for the transaction of business

ARTICLE VII.

The Auditing Committee shall consist of three Trustees. They shall have the books of the Museum duly audited, at least once in six months, by an authorized public accountant to be selected by them.

No bills shall be paid unless approved, in writing, by the President, the Chairman of the Executive Committee, or the Director.

ARTICLE VIII.

The Finance Committee shall consist of four, including the Treasurer. It shall be their duty to take charge of and invest the funds of the Museum in its name, and to take all proper measures to provide means for its support; and they shall have the sole custody of the securities belonging to the invested funds of the Museum, subject to the order of the Board of Trustees.

ARTICLE IX.

The Nominating Committee shall be composed of three, to whom shall be first submitted the name of any person proposed as a candidate for election to membership in the Board of Trustees. The Committee shall report on such candidates from time to time, as they may deem to be for the interest of the Museum.

ARTICLE X.

The President shall be a member, *ex-officio*, of all standing committees.

ARTICLE XI.

Nine Trustees shall constitute a quorum for the transaction of business, but five Trustees meeting may adjourn and transact current business, subject to the subsequent approval of a meeting at which a quorum shall be present.

ARTICLE XII.

By-Laws may from time to time be made by the Trustees providing for the care and management of the property of the Corporation and for the government of its affairs, and may be amended at any meeting of the Trustees by a vote of a majority of those present, after a month's notice in writing of such proposed amendment.

ARTICLE XIII.

The contribution of \$1,000 or more to the funds of the Museum, at any one time, shall entitle the person giving the same to be a Patron of the Museum, who shall have the right in perpetuity to appoint the successor in such patronship.

The contribution of \$500, at one time, shall entitle the person giving the same to be a Fellow, who shall have the right to appoint one successor in such fellowship.

No appointment of a successor shall be valid unless the same shall be in writing, endorsed on the certificate, or by the last will and testament.

The contribution of \$100, at one time, shall entitle the person giving the same to be a Life Member.

Any person may be elected by the Trustees to either of the above degrees, who shall have given to the Museum books or specimens, which shall have been accepted by the Executive Committee, or by the President, to the value of twice the amount in money requisite to his admission to the same degree, and the President and Secretary shall issue diplomas accordingly under the seal of the Museum.

The Trustees may also elect Honorary Fellows of the Museum in their discretion.

ARTICLE XIV.

Any person who has held the office of President for ten or more successive years may be elected by the Trustees as Honorary President for life.

ARTICLE XV.

No alterations shall be made in this Constitution, unless at a regular quarterly meeting of the Trustees, or at a special meeting called for this purpose; nor by the votes of less than a majority of all the Trustees; nor without notice in writing of the proposed alteration, embodying the amendment proposed to be made, having been given at a regular meeting.

BY-LAWS.

I.

Patrons giving \$1,000, are each entitled to one Subscriber's Ticket, 5 Complimentary Season Tickets and 10 Tickets for a single admission.

Fellows, giving \$500, are each entitled to 1 Subscriber's Ticket and 10 Tickets for a single admission.

Life Members, giving \$100, are each entitled to 1 Subscriber's Ticket and 5 Tickets for a single admission.

Annual Members, paying \$10 yearly, are each entitled to 1 Subscriber's Ticket and 2 Tickets for a single admission.

[NOTE.—A Subscriber's Ticket admits two persons to the Museum on reserve days (Mondays and Tuesdays), and to all Receptions and Special Exhibitions, and may be used by any member of the Subscriber's family.

The Single Admission Tickets admit the bearers to the Museum on reserve days (Mondays and Tuesdays), and are issued to Subscribers for distribution among friends and visitors.]

II.

Any Trustee who shall fail to attend three consecutive Regular Quarterly Meetings of the Board shall cease to be a Trustee, unless excused by the Board.

III.

No gentleman shall hereafter be eligible to the position of a Trustee who shall not be a "Patron" of the Museum, unless by a unanimous vote of a quorum of the Board—excepting Trustees *ex-officio*—nor be eligible unless his name shall be presented by the Nominating Committee at a Regular Quarterly Meeting prior to the meeting at which said election shall take place.

IV.

No indebtedness (other than for current expenses) shall be incurred by any committee, officer or employee of the Museum,

except as provided for in the Constitution. Any desired additional expenditure shall first receive the approval of the Board of Trustees.

V.

If any Trustee shall accept a salary from this Corporation he shall thereby be disqualified for the time being from acting as a Trustee thereof; provided, that the Board of Trustees shall have power to suspend the operation of this law in any special case.

VI.

Any vacancies occurring in the membership of the several committees during the interval between the regular meetings of the Board of Trustees may be filled at a regular meeting of the Executive Committee, until the next meeting of the Board.

VII.

All bequests or legacies, not especially designated, shall hereafter be applied to the *Permanent Endowment Fund*, the interest only of which shall be applied to the use of the Museum as the Board shall direct.

VIII.

At such times as it may be impracticable to obtain the services of the members of the Auditing Committee, the members of the Executive Committee may act in their place and stead.

THE MAINTENANCE APPROPRIATION.

BY THE LEGISLATURE, 1902.

CHAPTER 246.

An Act to authorize a further appropriation for the maintenance of the American Museum of Natural History in the Central Park of the City of New York.

ACCEPTED BY THE CITY.

Became a law March 26th, 1902, with the approval of the Governor.

Passed, three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The Board of Estimate and Apportionment of The City of New York may annually in its discretion include in the budget for the then next ensuing financial year a sum not exceeding twenty-five thousand dollars to be applied by the department of parks of said city through the Commissioner of Parks for the Boroughs of Manhattan and Richmond for keeping, preparing, preserving and exhibiting the collections in the buildings in the Central Park in the said city that are now or hereafter may be occupied by the American Museum of Natural History in addition to the sum or sums now authorized by law for such purposes.

SECTION 2. This act shall take effect immediately.

State of New York, }
Office of the Secretary of State. } ss.

I have compared the preceding with the original law on file in this office, and do hereby certify that the same is a correct transcript therefrom and of the whole of said original law.

(Signed) JOHN T. McDONOUGH, *Secretary of State.*

CONSTRUCTION AND INSTALLATION OF A NEW HEATING AND LIGHTING PLANT.

LEGAL ENACTMENTS OF 1902.

BY THE BOARD OF ALDERMEN.

An Ordinance to provide for an issue of Corporate Stock in the sum of two hundred thousand dollars (\$200,000) the proceeds to be used to provide means for the construction and installation of a new heating and lighting plant for the American Museum of Natural History, in the Borough of Manhattan.

Be it ordained by the Board of Aldermen of the City of New York, as follows:

SECTION 1. The Board of Aldermen hereby approves of and concurs in the following resolution adopted by the Board of Estimate and Apportionment June 13, 1902, authorizing the Comptroller to issue Corporate Stock of The City of New York to the amount and for the purposes therein specified.

“Resolved, That, pursuant to the provisions of Section 47 of the amended Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the issue of bonds to an amount not exceeding two hundred thousand dollars (\$200,000), for the purpose of providing means to pay for the construction and installation of a new heating and lighting plant for the American Museum of Natural History in the Borough of Manhattan, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue Corporate Stock of The City of New York in the manner provided by Section 169 of the Greater New York Charter, as amended by Chapter 563 of the Laws of 1902, to an amount not exceeding two hundred thousand dollars (\$200,000), the proceeds thereof to be applied to the purposes aforesaid.”

Adopted by the Board of Aldermen July 22, 1902, a majority of all the members elected voting in favor thereof.

Approved by the Mayor July 30, 1902. (Signed) P. J. SCULLY, *Clerk.*

Contracts awarded to December 31, 1903.

For the Erection and Completion of a New Wing for a New Heating, Power and Electric Light Plant, for the American Museum of Natural History.

Contract awarded Thomas Cockerill & Son, May 18, 1903, \$184,500.

FOR THE COMPLETION OF THE CONSTRUCTION
OF THE UNFINISHED PORTIONS OF THE
BUILDING.

LEGAL ENACTMENTS OF 1903.

BY THE BOARD OF ALDERMEN.

AN ORDINANCE providing for an issue of Corporate Stock in the sum of one hundred and eighty-eight thousand dollars (\$188,000), to provide means for the completion of the construction of the unfinished portions of the American Museum of Natural History Building in the Borough of Manhattan.

Be it Ordained by the Board of Aldermen of The City of New York as follows:

SECTION 1. The Board of Aldermen hereby approves of and concurs in the following resolution, adopted by the Board of Estimate and Apportionment May 8, 1903, and authorizes the Comptroller to issue Corporate Stock of the City of New York to the amount and for the purposes therein specified:

“*Resolved*, That, pursuant to the provisions of Section 47 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the issue of Corporate Stock of The City of New York, to an amount not exceeding one hundred and eighty-eight thousand dollars (\$188,000) to provide means for the completion of the construction of the unfinished portions of the American Museum of Natural History Building in the Borough of Manhattan, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue Corporate Stock of The City of New York, in the manner provided by Section 169 of the Greater New York Charter, to an amount not exceeding one hundred and eighty-eight thousand dollars (\$188,000), the proceeds whereof shall be applied to the purposes aforesaid.”

Adopted by the Board of Aldermen June 16, 1903, a majority of all the members elected voting in favor thereof.

Approved by the Mayor June 22, 1903. (Signed) P. J. SCULLY, *Clerk*.

Contracts awarded to December 31, 1903.

For the Completion and Construction of Entrance Hall and Toilets, Changes to Elevator, Steam, Water and Electric Works, New Steam Mains and Construction of Rooms for Teachers for the American Museum of Natural History.

Contract awarded Louis Wechsler, November 18, 1903, \$92,500.

In Memoriam

At the Regular Quarterly Meeting of the Board of Trustees of The American Museum of Natural History, held November 9, 1903, the following Minute was adopted:

The Trustees of The American Museum of Natural History record with sadness the death of their distinguished and beloved associate,

WILLIAM EARL DODGE.

Mr. Dodge became a member of the Museum in 1870, and was elected to the Board of Trustees in 1872. He was placed on its Executive Committee in 1875; and in 1899 he was elected Second Vice-President, serving in this office until February, 1901, when he became First Vice-President. From the beginning of his connection with the Museum until his decease, August 9, 1903, he was one of its largest contributors, and took a very active interest in every measure to promote the welfare, growth, development and usefulness of the Institution. His love of the beautiful in nature found in the work of the Museum a most congenial occupation.

When the Museum made its early efforts in the cause of research and investigation, Mr. Dodge's contributions and counsel came from a knowledge of what was best and wisest to be accomplished to insure results. He often visited the Museum to ascertain its needs, and was always ready with suggestions and willing to advise and aid its officers and curators, to help make the Museum what, under its Charter, it set out to be, "to encourage and develop the study of natural science, the advancement of a general knowledge of kindred subjects and the furnishing of popular instruction, recreation and amusement."

The Trustees and officers always cherished for Mr. Dodge a real affection and esteem, because of his manly qualities of head and heart. He was a faithful friend, a wise counselor, a safe guide and a Christian gentleman. As such his example is worthy for us to imitate and follow.

This Minute is made at the first meeting of the Board of Trustees since the death of Mr. Dodge, and it is directed that it be entered on the records, and that an engrossed copy of the same be prepared and sent to Mrs. Dodge, with the respectful sympathy of the Trustees, in her loss and sorrow.

At the Annual Meeting of the Trustees of The American Museum of Natural History, held February 8, 1904, the President announced the death of their late associate, Mr. Andrew H. Green.

It was ordered that the following Minute be incorporated on the Records of the Meeting, and that the Secretary present a copy of the resolution to the family of the deceased:

The Trustees of The American Museum of Natural History, at this their Annual Meeting, desire to give formal expression to their sorrow at the loss of their associate of many years,

ANDREW HASWELL GREEN.

In 1869, Mr. Green, then Comptroller of Central Park, heartily and effectively co-operated with those who proposed to the Commissioners of Parks the formation of a Museum of Natural History.

Elected to the Board of Trustees in 1869, he was regular in his attendance at official meetings, served on the Executive Committee for several years, was a frequent visitor at the Museum, and at the time of his decease was one of the oldest members of the Board.

With a wide circle of acquaintances, occupying a prominent place among the people, of long experience in civic affairs and intimately associated with the organizations and improvements incident to municipal development, his loss is not to the members of this Board alone but to the larger interests of the community in general.

On the occasion of the Annual Meeting of the Board of Trustees of The American Museum of Natural History, held February 8, 1904, the President reported the decease, on the 2d instant, of Mr. William C. Whitney.

In speaking of Mr. Whitney, the President paid a warm tribute to his friend and colleague. No other Trustee, he said, evinced a deeper interest in the activities of the Museum; he was a frequent visitor to its halls, enthusiastic in his praise of its collections and its work of research in the field, and disclosed an intimate knowledge of the history and aims of the Museum.

The following Minute was unanimously adopted, and the Secretary was directed to enter it in full on the record of the meeting and to present an engrossed copy of the same to the family of the deceased:

The Trustees of The American Museum of Natural History record with great regret the death of their associate,

WILLIAM COLLINS WHITNEY.

The Museum loses one of its warmest and most intelligent friends. Mr. Whitney was a true lover of nature, greatly delighting in scenery, and showing a keenness of interest in animals and an extent of knowledge very unusual in American men of affairs. He took pleasure in supporting the work of the Museum, because it extended to the people of this city opportunities of education and enjoyment otherwise beyond their reach.

Elected in November, 1891, he served for more than twelve years as a Trustee. Up to the time of his death, he generously furthered the progress of the Museum in many diverse lines. In the year 1900, in connection with his personal interest in the breeding of horses, he became specially interested in and maintained on a large scale for the past three years, the special explorations, researches and artistic work connected with the evolution of the horse in America. The undertaking has been successful beyond expectation. In a few weeks more the preliminary results of these expeditions would have been on exhibition, and it is a keen regret to us that Mr. Whitney could not have lived to see their completion. His name will always be associated with the continuation of any investigations of this important subject.

We shall ever cherish the memory of his kindly and generous heart and his many manly and noble qualities.

THIRTY-SIXTH ANNUAL REPORT.

To the Trustees and Members of the American Museum of Natural History :

The President submits herewith a report of the affairs of the Museum for the year 1904.

FINANCES.—In conformity with the recommendations of the Board of Trustees, the financial transactions of the Museum are divided into three separate accounts, and the details of the receipts, expenditures and investments for the year just closed, as embodied in the Treasurer's Report, will be found on pages 43 to 49 inclusive. These accounts and all books and vouchers have been duly examined and certified to by the Audit Company of New York. A few statements may help in making the details of this report clear.

Permanent Endowment.—Attention is directed to the Treasurer's Report of the Endowment and Investment Account, wherein are detailed the gifts made for the Permanent Endowment Fund. This fund now amounts to \$1,013,000, an increase of \$573,000 since the last Report. The John B. Trevor Fund has been increased to \$15,000, through the gift of \$5,000 by Mrs. J. B. Trevor. Miss Matilda W. Bruce gave \$10,000 in bonds, the interest of which is to be used for the purchase of desirable specimens of minerals.

Special Funds.—The Andrew J. Stone Expedition Fund and the Eastern Asiatic Research Fund have been closed. The work begun under the latter is continued through contributions by the members of the East Asiatic Committee. Attention is called to the reports (page 43) of the receipts and disbursements of the funds, for which the Assistant Treasurer acts as treasurer.

City Maintenance Account.—The amount received from the City for the maintenance of the Museum, \$160,000, was

the same as in 1903 and 1902. This generous sum proved, however, insufficient to meet the running expenses, leaving a deficit of more than \$8,000 to be made up by a friend of the Museum. Naturally, with the steady and rapid growth of the Museum, the running expenses must correspondingly increase, for which provision must be made.

General Account.—The total receipts from all sources have been \$78,605.30. The interest from invested funds amounted to \$35,145, an increase of \$13,340 over the receipts from this source for 1903; \$2,400 have been received from Life Memberships and \$13,980 from Annual Members, an increase in the latter of \$2,240 over the preceding year.

Endowment and Investment Account.—The principal items of increase have already been mentioned under the head of "Permanent Endowment," and the expenditures will be found detailed under the several departments to which the gifts especially relate, and in the financial statements of this account on pages 48 and 49.

BUILDING AND GROUNDS.—The improvements in the building and grounds mentioned as in progress in last year's report, under appropriations of 1902 and 1903, have progressed. These include the new foyer, the construction of two assembly rooms for classes and for the meetings of the various scientific societies affiliated with the Museum, new toilets, and the new power house. The basement of the main building has been lowered and work is now in progress on an intermediate building between the Lecture Hall and the Power Station. New exhibition cases have been constructed in various parts of the building, and several new exhibition halls have been thrown open to the public, as noted later in the reports on the departments to which they relate.

MEMBERSHIP.—The gain in annual members has been 278, resulting in a net gain of 191, the loss through deaths and resignations having been 87. It is a pleasure to record that

THE ALASKA PENINSULA BEAR. STONE EXPEDITION.

Length of specimen in the flesh about seven and one-half feet; weight, 1500 pounds.

this is the largest number added during a single year in the Museum's history, as it indicates increased interest in the work of the Museum.

NEW MEMBERS.

The following persons were elected Patrons:

MRS. ABRAM S. HEWITT,	ROBERT W. GOELET,
MISS MATILDA W. BRUCE,	HERMON C. BUMPUS.

DR. WILLIAM W. RADLOFF was elected a Fellow.

The following have been made Life Members:

HERBERT L. SATTERLEE,	FREDERICK G. BOURNE,
HIRAM W. SIBLEY,	P. J. GOODHART,
GEORGE A. TREADWELL,	BENJAMIN P. DAVIS,
R. F. WILLIAMS,	THOMAS F. SOMERS,
ADMIRAL ALEXIEFF,	JOHN R. SLATTERY,
I. E. GATES,	MRS. CONSTANCE S. MEAD,
HENRY IDEN,	GEORGE W. COLLORD,
L. HARDING ROGERS, JR.,	NELSON ROBINSON,

HENDRICKS, HENRY H.	WIENER, DR. JOSEPH

DEPARTMENT OF GEOLOGY AND PALÆONTOLOGY.—The work of cataloguing and labeling has progressed steadily throughout the year, over five thousand catalogue entries having been made and more than eleven hundred new labels prepared. The acquisitions include an important collection of Silurian fossils from Ohio, acquired by purchase, and several minor additions, obtained partly by exchange and partly by purchase. Additions have also been made to the collection of rock specimens, designed to illustrate the geology of New York Island. Two new cases placed in the alcoves at the south end of the Geological Hall have given opportunity for a better display and more convenient arrangement of the material in that part of the hall.

The Curator, Professor Whitfield, has prepared and published several papers in the Museum Bulletin, illustrated with four plates, relating to a new genus and species of Lower

Carboniferous Bryozoa, a remarkable case of the reproduction of lost parts shown in a fossil Crinoid, and supposed worm burrows in rocks of the Chemung Group of New York. The Associate Curator, Dr. Hovey, has had charge of the Museum *Journal*, and has prepared and published various papers connected with his investigations of volcanic eruptions in the West Indies, and has given lectures in the Museum courses and elsewhere, in the interest of the Museum, on these and other subjects.

DEPARTMENT OF MAMMALOLOGY AND ORNITHOLOGY.—Several important accessions have been made during the year to the collections of both mammals and birds, partly by purchase and partly through Museum Expeditions. Of special popular interest is the installation of a number of noteworthy bird groups, and the advanced state of preparation of others. The former include the Yellow-billed Magpie, the Sierra Dusky Grouse, the Mountain Quail and the Valley Quail, illustrating interesting types of bird life peculiar to California; the latter include a large Flamingo Group, and a group illustrating the bird life of the irrigated portions of the San Joaquin Valley, California. Considerable progress has also been made in the construction of large mammal groups, as the Roosevelt or Olympic Elk, the big Alaska Peninsula Bear, and the Mexican Collared Peccary groups. Single specimens mounted for exhibition include a Central American Puma, a Crested Antelope, a Rocky Mountain Goat (presented by Mr. C. A. Moore, Jr.), and some twenty or more smaller animals, as hares, squirrels, spermophiles, wood rats, field mice, etc.

The Museum Expeditions include the trip of the Associate Curator, Mr. Chapman, to Florida and the Bahamas under the North American Ornithology Fund, which resulted in securing abundant material for a fine Flamingo Group, and also for other bird groups soon to be constructed. The Mexican Expedition under J. H. Batty has been very successful, yielding large returns in birds and mammals, including group accessories as well as valuable material for other departments of the Museum.

The accessions altogether include about 1,900 mammals and over 6,000 birds, 278 of the latter being by donation, and include 136 birds from Ecuador, presented by Dr. S. Austin Davis. The Museum is indebted to Mr. N. D. Bill, of Springfield, Mass., for the use of the schooner yacht *Gloria* for Mr. Chapman's work in Florida and the Bahamas. The Museum is also indebted to the New York Zoölogical Society and to the Central Park Menagerie for many valuable specimens received in the flesh.

The Curator, in addition to his editorial supervision of the *Bulletin*, has been able to devote considerable time to the preparation of papers on mammals, and during the year published reports on a number of important collections received during recent years and now for the first time critically identified. A list of these, twelve in number, will be found in the report of the "Department of Books and Publications" (page 33). The Associate Curator, besides his important field explorations and constant supervision of the work on the bird groups, has published a description of a new grouse from the Sierra Nevada of California and a report on the birds collected by the Andrew J. Stone Expedition to Alaska in 1903. He has also given many lectures in the Museum courses and also elsewhere in the interest of the Museum.

DEPARTMENT OF VERTEBRATE PALÆONTOLOGY.—Nearly 600 specimens of fossil vertebrates have been added to the collection during the year, principally as a result of the following expeditions:

Expeditions for Cretaceous reptiles.	17
Bridger expedition for fossil mammals.	388
Big Badlands expedition for fossil mammals	129
Completed exploration of Pleistocene cave deposit	49

The total number of catalogued specimens in the collection is now a little over 15,000.

The most important addition to the collection was the nearly complete skeleton of the Columbian Mammoth, discovered near Jonesboro, Indiana, and purchased by the Museum. This splendid specimen will be mounted and placed

BRONTOSAURUS SKELETON IN THE DINOSAUR HALL,
Mounted under the direction of Professor H. F. Osborn by A. Hermann.

on exhibition beside the Mastodon skeleton, which it considerably exceeds in height and in length of tusks. The Bridger expedition secured materials for a mounted skeleton of the remarkable six-horned Uintathere, a giant mammal of the Eocene epoch, and a number of skulls or skeletons of new or rare extinct animals of smaller size. The expedition to the Big Badlands secured a number of fine specimens of the characteristic fossils of that rich field, including several genera hitherto unknown. A nearly complete skeleton of the Oligocene ancestor of the wolf was acquired by purchase. The explorations in the fissure or open cave deposits of northern Arkansas have yielded a large collection of the forest-haunting animals of the Pleistocene epoch, probably contemporary with the earliest appearance of man in North America. The collection is peculiarly rich in small animals; it includes some sixty species, many of them extinct, the others mostly northern animals, indicating a former much colder climate than now prevails in that region.

Our collections of extinct reptiles have been enriched by two fine Plesiosaur skulls and a number of Mosasaur skeletons from South Dakota, two Marine Crocodile skulls from Montana, and a skull of the Duck-billed Dinosaur from New Mexico. Especial attention has been given in the field-work of recent years to the search for fossil reptiles, which, although more difficult to find and more expensive to collect and prepare for exhibition than fossil mammals, are yet of greater interest, as representing more ancient and less known types of life, more widely different from those of the present day, and in many respects far more extraordinary than the extinct animals shown in the Hall of Fossil Mammals.

Much progress has been made in the preparation of these extinct reptiles, and especially of the Dinosaurs, for exhibition in the new Dinosaur Hall. The skeleton of the Dwarf Carnivorous Dinosaur, or "Bird-Catcher," has been placed on exhibition, the gigantic *Brontosaurus* skeleton is nearly completed, and three other huge and remarkable Dinosaur skeletons are well under way toward mounting. A number of skulls, limbs, and incomplete specimens have been prepared and mounted, enough to go a long way toward filling the new

hall. The energies of the department have been largely devoted during the past year to the mounting of the huge *Brontosaurus* skeleton which will form the central attraction of the Dinosaur Hall. This skeleton, 67 feet long and over 15 feet high, has presented peculiar difficulties, both mechanical and scientific, in the mounting, and much study and experiment by the Curator and his staff were required to solve them. In the modeling of the missing parts of the skeleton we are indebted for many courtesies to the Museum of Yale University. Corresponding courtesies have been extended by us to the Carnegie Museum in connection with the cast of the *Diplodocus* skeleton being prepared there for exhibition in the British Museum, London.

The cessation of the Whitney Fund for the exhibit of the Evolution of the Horse has seriously crippled the work of the department in this direction. Much has been accomplished during the three years of the continuance of this fund, the Oligocene, Miocene, Pleistocene and modern horses being now well illustrated by mounted skeletons and by series of skulls, feet, etc., showing the morphology and evolution of those parts in each of the above stages in the development of the race. Several important problems, however, still remain unsolved, especially in the Eocene or earliest stages of the Ancestry of the Horses, which are as yet incompletely known and inadequately illustrated. The most important addition to the Horse Alcove during the year was the exhibit of the Rearing Horse and Man skeletons. An instructive comparison with the evolution of the Horse is furnished by the series of feet illustrating the Evolution of the Camel in North America.

The preparation of the fossil fish collections for exhibition has progressed rapidly under direction of Professor Dean; they will be displayed in the small tower hall in the southeast corner adjoining the Dinosaur Hall. Dr. Hay has continued his studies upon fossil turtles with the assistance of the grant from the Carnegie Institution, and a fine series of specimens is being prepared for exhibition.

A number of scientific papers were published during the year, and several monographic researches continued or com-

pleted by the Curator and his staff, the most important being upon the fossil horses and titanotheres.

DEPARTMENT OF ETHNOLOGY.—The department has received accessions principally through a number of expeditions sent out by the Museum. The following deserve special mention:

From North America, a Nootka collection obtained by Mr. George Hunt. The most remarkable part of this collection is a whaler's ceremonial house, which was found on a pond in the interior of Vancouver Island, and in which generations of whalers purified themselves, the house being used at the same time as a depository for the skulls of the whalers.—A Blackfoot collection obtained by Dr. Clark Wissler. Dr. Wissler paid special attention to a study of the ceremonials of the Blackfeet, and his collection illustrates in some detail the religious ceremonials of this tribe.—A collection from the interior of the State of Washington, by Mr. James Teit. This collection was made in continuance of work done in former years in British Columbia, and represents the culture of the Salish tribes near the boundary of the United States.—A collection from the Uchee, made by Mr. F. G. Speck.—A series of casts and negatives of natives of various countries, collected by Mr. Caspar Mayer during the World's Fair at St. Louis. Mr. Mayer's work was done in coöperation with the Field Columbian Museum.

During the past year Dr. Berthold Laufer closed his field-work in China. His expedition, which was provided for by Mr. Jacob H. Schiff, occupied three years, and all the collections made have been received. They cover the various aspects of the social and industrial life of China, and give a comprehensive view of Chinese culture. The collection has been installed in the Southwest Gallery, and has been arranged so as to illustrate the industrial and domestic life of the Chinese, their amusements, their religion and their arts. Special stress has been laid upon the demonstration of the historical development of various forms of Eastern life.

The Corean collections of the department were increased by a collection made by Dr. C. C. Vinton.

Rev. J. W. Chapman, Mr. Henry W. Tate, Capt. George N. Comer and Capt. James S. Mutch are continuing work for the Museum in Alaska, British Columbia, and eastern arctic America, but no collections were received during the past year.

Dr. William Jones continued the researches begun for the Museum under the auspices of the Carnegie Institution, and incidentally obtained additional explanation of material collected in previous years.

During the summer Mr. Frederick R. Burton paid a prolonged visit to the Ojibwa Indians. The Museum provided him with a phonograph, and he made an extensive collection of records of Indian songs.

Dr. Roland B. Dixon revisited California in order to clear up a number of points relating to the studies made during previous years.

The extension of the North American collections has required considerable rearrangement in the Indian Hall, the new material being placed in proper geographical sequence. A special collection has been arranged illustrating the industrial life of the Plains Indians.

The most notable addition to the William Demuth pipe collection has been the acquisition, from Mr. Francis La Flesche, of a set of ceremonial pipes of the Omaha Indians.

The results of the expeditions undertaken by the department are being pushed as rapidly as possible.

Dr. Wissler published a paper on the decorative art of the Sioux, which embodies the results of his researches during the years 1902 and 1903.

Dr. Dixon has completed a paper on the ethnology of the Maidu Indians of California, which is in the hands of the printer.

Dr. A. L. Kroeber's description of the ceremonial organization of the Arapaho has been issued. He has handed in manuscripts on the religion of the Arapaho and on the ethnology of the Gros Ventres, thus finishing the discussion of the results of his expedition to these tribes.

CEREMONIAL HOUSE USED BY WHALERS, NOOTKA, VANCOUVER ISLAND.

This Material is now in the Museum.

A memoir on the decorative art of the Huichol, by Dr. Carl Lumholtz, was also published during the past year.

From the Jesup North Pacific Expedition, Mr. Waldemar Bogoras's memoir on the Chukchee has been printed and published by E. J. Brill, Lmt.

Dr. John R. Swanton's description of the Haida of Queen Charlotte Islands has also been issued.

At the present time the first part of Mr. Waldemar Jochelson's description of the Koryak, containing the religion and myths of the tribe, is in press.

The last part of the Kwakiutl Texts, by F. Boas and G. Hunt, is also in press.

Mr. Bogoras has handed in his manuscript on the religion of the Chukchee.

Dr. John R. Swanton has handed in his volume of Haida Texts.

In the summer Dr. Boas, as a representative of the Museum, attended the Congress of Americanists held in Stuttgart.

The utilization of the Museum collections for purposes of university instruction has continued. The same courses that are mentioned in the Annual Report of 1903 were given during the present year, and many students carried on their work in the Museum.

DEPARTMENT OF ARCHÆOLOGY.—The department has received several valuable accessions during the year by purchase and gift, noteworthy among which is a collection from the prehistoric pueblo ruins of Socorro, New Mexico, the gift of Mrs. Constance S. Mead and family. Five funeral urns from Oaxaca, presented by Mrs. Robert W. De Forest, form an important addition to our exhibit of Zapotecan ceramics. We acquired 366 specimens by the purchase of the Bauer collection, chiefly illustrative of the Matlaltzincan culture, which was not represented in the Mexican collections. The purchase of a large collection of shell implements from the Barbados materially added to our West Indian collection.

From the Department of Preparation and Installation we received casts of models of the earthwork known as Fort

Ancient and the Serpent Mound in Ohio; also of the Cahokia Mound in Illinois, the largest prehistoric mound in the United States. This model was based on a clay one made for us by Mr. David I. Bushnell, Jr. A model of two effigy mounds, representing animals in Wisconsin was also constructed.

The department has begun arrangements with museums and private collectors to obtain the loan of important specimens for the purpose of making casts to fill in certain gaps in the Museum collections, and also to be used in connection with the publications resulting from our own expeditions to the North Pacific coast. The Museum has received such loan material from the Peabody Academy of Sciences, Salem, Mass.; the Oregon Historical Society, Portland; and Mr. C. P. Wilcomb, of San Francisco. Casts of these specimens have been made by the Department of Preparation and Installation.

The department has also begun the work of making casts from some of the noteworthy objects of ancient art from Mexico and Central America for exchange with other museums for casts of rare material of a like character. A set has been sent to the United States National Museum, which was exhibited at the Louisiana Purchase Exposition at St. Louis. Arrangements have recently been made for an exchange of casts with the Berlin Ethnographical Museum.

The specimens received during the year have been catalogued, and many labels, maps and drawings have been prepared and placed with the collections on exhibition. Certain rearrangements in the Mexican Hall have been undertaken, and the West Indian collections have been removed to the South American Hall.

A synoptic collection was brought together and loaned to Teachers College. This was made up so far as possible from duplicate material. A second collection was selected, labeled and loaned to the Ethical Culture School. This has been returned and is about to be installed as an exhibit for school children.

The following publications have been issued by the department:

M. H. Saville. "Funeral Urns from Oaxaca." (Museum Journal, Vol. IV, pp. 49-60, July.)

Ad. F. Bandelier. "On the Relative Antiquity of Ancient Peruvian Burials." (Bulletin, Vol. XX, Art. XIX, pp. 217-226.)

Harlan I. Smith. "A Costumed Human Figure from Tampico, Washington." (Bulletin, Vol. XX, Art. XVI, pp. 195-203, May 28.)

In addition to the above, Mr. Bandelier has published several papers in the *American Anthropologist* based on his researches in South America for the Museum.

Mr. Smith has secured additional information and illustrations for his reports on the archæology of the Northwest, and has been preparing memoirs on the archæology of Puget Sound and the archæology of central Washington.

DEPARTMENT OF ENTOMOLOGY. — During the past year the rooms of the department were provided with cases for the installation of the study collection of insects. This collection has been entirely rearranged, and the various collections, which have been kept separate heretofore, have been united so as to make a single series. The collections of North American Lepidoptera, Hymenoptera and Hemiptera have been arranged and labeled, while the work on the exotic species of these families is progressing rapidly. Considerable work on the exhibition collection has also been done. The collection of galls produced by insects has been rearranged and labeled in conformity with Guide Leaflet No. 16, "On the Insect-Galls of the Vicinity of New York," which was issued during the latter part of the year.

The following collections have been placed on exhibition: Insects injurious to evergreen trees, together with many illustrations, and parts of the trees affected by the different species; clear-winged moths (Sesiidæ), with food-plants and colored figures; household insects; insects affecting stored grains; local bees, wasps, etc. (Hymenoptera), and their nests; wasps' nests from Brazil and elsewhere; and an observation hive containing a swarm of Italian honey bees.

Through the generosity of Mr. Samuel V. Hoffman, the Curator made a trip to the Black Mountains, North Carolina, in May and June. This expedition was in continuation of the

entomological survey of the Black Mountain region, which has been carried on for some years by the Curator, under grants from the late Very Reverend E. A. Hoffman.

Mr. Samuel Hoffman also kindly provided the funds for the purchase of a collection of 3,600 specimens of North American and exotic moths.

Messrs. G. A. Goss and A. D. Dodge presented a fine collection of beetles from Mt. Kinabalu, British North Borneo.

Mr. J. Rhinelander donated a unique example of combs of the honey bee (*Apis mellifera*) built on the branch of a tree.

A collection of butterflies and moths from Sredne-Kolymsk, Province of Yakutsk, Siberia, and a number of interesting wasps' nests from Brazil have been acquired by purchase.

DEPARTMENT OF MINERALOGY AND CONCHOLOGY.—The Bement Collection of Minerals and the Morgan Gem Collection have attracted a very large number of visitors, and have proved of increasing usefulness in extending interest in the mineral products of the United States. Extensive changes in the installment of the Gems have been planned, and the ensuing year will see a general expansion in respect to their position and arrangement, which is expected to improve the appearance of this popular feature of the department.

A munificent gift from Mrs. Matilda W. Bruce has been received, in the form of an endowment of the Department of Mineralogy. It is an invested sum of \$10,000, the interest of which is to be devoted to the purchase of mineralogical specimens, except in so far as its use in the purchase of geological exhibits seems desirable.

The minerals demand more room, and projects contemplating a more complete exhibition of all the material composing this important collection will shortly be realized. It is to be hoped that in the development of the Museum, Economic Mineralogy will receive consideration, and that the remarkable mineral resources of the country, with at least a partial demonstration of their uses and treatment, will form part of the exhibits in the Museum halls. Additions by purchase and gifts are recorded in the List of Accessions.

AIHNGHITO, OR THE TENT.

The largest of the Cape York meteorites. Removal from the Cob Dock, Brooklyn Navy Yard.
Now at the American Museum.

The Shell Collections continue to increase much faster than the space allotted for their exhibition, which latter must, for some time to come, remain practically unchanged. Through the continued generosity of Mr. Frederick A. Constable, important additions of Japanese shells have been made. Through the gift of Mr. Albert H. Storer, over seven thousand handsome shells have been added to the collection, and through his liberal permission they may be used in any way helpful to the improvement of the cabinet as a whole. Numerous additions by gift and exchange are recorded in the List of Accessions.

Considerable interest is taken by a group of students and collectors in the shell collection, and it is to be regretted that this now imposing collection cannot be assigned a hall large enough for its complete display, together with facilities for illustrating local distribution and the domestic molluscan fauna.

The time of the Curator has been, apart from the effort made to finish the record of these two large collections, partially employed in the current lectures of the Museum.

DEPARTMENT OF INVERTEBRATE ZOÖLOGY.—During the past year considerable attention has been given to making the collections in the Synoptic Hall more attractive and comprehensible to the public. The specimens in nearly all of the alcoves have been provided with permanent printed labels. Dr. Dahlgren with his assistants has made some very fine models of various invertebrates, among which the models of a large *Synapta*, several species of moss-animals (Polyzoa), a giant Japanese Hydroid (*Branchiocerianthus*) and a huge Australian sea-anemone (*Discosoma*) are especially noteworthy.

During May and June Professor Wheeler accompanied Mr. Chapman on his expedition to the Florida Keys and the Bahamas. Dr. Dahlgren joined the party during the latter month. A considerable number of corals, sea-fans, insects, myriopods, mollusks, etc., were collected on Andros and New Providence Islands. Dr. Dahlgren secured material for a

group to illustrate the habits of the land-crabs of the West Indies, the accessories and one specimen for a group of Iguanas, besides color-sketches of corals, mollusks, sea-fans, etc., to be used in constructing a coral reef in the Museum. Many of these drawings have been of great value in making models of some of the larger West Indian mollusks for the synoptic collections. Some of the material collected will be of use in supplying specimens to the New York City schools. There is also a good deal of new and undescribed material among the Bahaman insects and myriopods.

Among the numerous acquisitions to the Department during the past year the following deserve special mention: A large collection of marine invertebrates from Vineyard Sound, Mass., purchased from Mr. F. W. Walmesley; forty-seven species of Cœlenterata acquired by exchange with the Dublin Museum, Ireland, through Dr. J. E. Duerden; the above-mentioned collection of corals, etc., made in the Bahamas by Professor Wheeler and Dr. Dahlgren; and a fine collection, comprising more than a thousand vials, of spiders from the United States, the work of the late Horace Britcher and donated to the Museum by the mother and the friends of the young naturalist.

Several scientific papers have been published during the past year by members of the department. Dr. J. E. Duerden has published the following: "The Antiquity of the Zoanthid Actinians," "Recent Results on the Morphology and Development of Coral Polyps," "The Morphology of the Madreporaria V. Septal Sequence," "The Coral *Siderastraea radians* and its Postlarval Development." The following have been published by Professor Wheeler: "Three New Genera of Inquiline Ants from Utah and Colorado," "The Obligations of the Student of Animal Behavior," "A Crustacean-eating Ant," "The American Ants of the Subgenus *Colobopsis*," "Ants from Catalina Island, California," "The Ants of North Carolina," "A New Type of Social Parasitism among Ants," "The Phylogeny of the Termites," etc.

Especially valuable and important has been the work accomplished by Assistant Curator Sherwood in developing and

deepening the interest of the teachers and pupils of the New York schools in the collections of the Museum and the wide range of subjects which they represent. With the opening of the public schools in the fall of the past year the Museum was prepared to loan the small sets of natural history specimens mentioned in the Annual Report for the year 1903. Soon after registration was completed applications from the teachers began to come in for the use of the collections. Few of the schools which had formerly used the collections applied, and later it was learned that, through some misunderstanding, it was thought that the Museum would send the collections without application. An announcement, giving the conditions on which the collections would be loaned, was prepared and sent to all the Manhattan schools. There was an immediate demand for the collections, and by the end of December one hundred and twenty sets were in use in the city. During the fall these have been studied by 40,000 children. To meet the needs of the schools twenty sets of common woods have been prepared. The birds prove to be the most popular with the children, the insects coming next, then the minerals and woods. In fact, the requests for birds and insects are so numerous that it will be necessary to procure additional sets as soon as possible. The circulating collections have now been in use for a year and during that time have been studied by more than 250,000 children.

During October, November and December members of the scientific staff gave a series of informal lectures for school-children. The course was arranged at the request of the New York City Teachers' Association, and the subjects were selected by the Committee on Children's Interests of the Association, with the purpose of supplementing the regular school work as outlined in the syllabus issued by the Board of Education. The hour selected—Monday, Wednesday and Friday afternoons at four o'clock—permitted pupils to attend in classes accompanied by their teachers. There were twelve lectures, each of which was delivered three times. A circular was prepared, announcing the lectures and the conditions on which seats would be reserved. These circulars, together

with coupons for making applications for the reservation of seats, were sent to all the public schools of Greater New York. At first it was thought that one of the small assembly rooms in the Museum would accommodate all that would attend, but as soon as the announcements had been generally distributed, this hall proved to be entirely inadequate, and the lectures were adjourned to the large auditorium, which seats 1428. Again and again every seat in this hall has been taken, and occasionally a special lecture had to be given in the small assembly room for those who could not gain admission to the regular lecture. Frequently several hundred applications were received after all the seats in the hall had been reserved, and the better to meet the demands of these pupils certain of the lectures were repeated Tuesdays and Thursdays. From twenty to thirty schools were represented at each lecture by classes of from ten to two hundred pupils each. There can be no doubt of the popularity of these lectures, as the attendance from October 3 to December 23 was 25,000.

The Department of Invertebrate Zoölogy has received from the Department of Preparation and Installation, during the years 1903 and 1904, the following models of marine animals for exhibition in the Synoptic Hall of the Museum: 29 models of Protozoa (Lobosa, Foraminifera, Radiolaria and Infusoria); 13 Hydroids; 1 Actinarian; 19 Planarians; 11 Nemerteans; 8 Polyzoans; 2 Holothurians; 10 Mollusks. The Department of Preparation and Installation has also mounted several crustaceans, sponges and insects for the synoptic collection.

DEPARTMENT OF PHYSIOLOGY.—The equipment of a small laboratory was begun in July. Much time has been spent in studying methods by which the soft structures of animals could be satisfactorily prepared for Museum demonstration. The older methods of preservation in various fluids have long been unsatisfactory, yet it has been impossible to make creditable preparations in a dry form. To this end a mode of artificial petrification has been used, which thus far has given good results. It is excellently shown in a preparation of the

GIANT HYDROID OF THE JAPANESE SEAS.

Twenty-eight inches in height. Model in glass and wax prepared at the Museum.

stomach of a young deer. The entire organ has preserved its natural shape; the characteristic glandular tissue of the rumen is evident; the cellular tissue of the reticulum is distinct; the muscular layers of the psalterium are readily distinguished, and the blood vessels have retained their natural color.

A modification of the same method has been extended to the preparation of osteological sections. The specimens are in every way clean and attractive, showing the structure of the bone and the joint with clearness.

Dr. C. W. F. Muenchehofe has begun a series of corrosion preparations of the liver and kidney, which are already promising excellent results. He has also instituted a tentative bacteriological demonstration showing the typical growth of many chromogenic, pathogenic and useful bacteria, which, when completed, will make an instructive display.

Acknowledgments should here be extended to the Director of the Aquarium, the Director of the New York Zoölogical Society and the Director of the Central Park Menagerie, for many courtesies received.

DEPARTMENT OF PREPARATION AND INSTALLATION.—The Department of Preparation and Installation was established at the beginning of the year 1903 for the purpose of coördinating some of the more or less similar classes of preparatory work required by the various departments of the Museum and up to that time performed by each of them separately. The function of the new department thus became the preparation of various material for the respective study collections and particularly for purposes of exhibition.

Besides this, its primary object, there has been developed in the department, under Dr. B. E. Dahlgren, a line of Museum work not heretofore seriously attempted in this country—the preparation of biological models. During the short time of its progress this work has been carried on along such lines as the needs of the synoptic zoölogical exhibit required, and a considerable number of forms have been modeled as follows:

1. Models have been made of microscopic forms, especially the Protozoa, many of them enlarged 500–800 diameters, of minute Hydroids, of Planarians, and Polyzoa.

2. Series of models showing consecutive stages in the development of different forms, as the development of a coral polyp. These series in each case embody the results of the researches of investigators of the particular subject with which they deal, and are prepared under their supervision. In exchange for duplicates, material has thus been obtained from Prof. J. S. Kingsley, Prof. C. Judson Herrick, Prof. Charles A. Bardeen, and their coöperation secured.

3. Models have been prepared, showing the structure or anatomy of some of the more complicated invertebrates, such as the clam and oyster.

4. Models have also been made of a number of invertebrate forms which, because of their perishable nature, are impossible of satisfactory preservation. The sea anemones and holothurians are good examples.

The specimens of birds and mammals received by the Museum during the year have been cared for, and from this material skins and skeletons prepared for the study collections. Some thirty mammals and over one hundred and seventy-five birds have been mounted.

A group of Alaska Brown Bears, a group of Peccaries and a group of Roosevelt Elk are under way. The material for the Elk group has been collected during the year; also, among other things, skins and accessories for a group of Beavers. Several Reptile groups are under way, and a group of Land Crabs from the Bahamas has been collected and prepared.

A number of small bird groups have been constructed from material collected by Mr. Chapman. Also two large groups of birds—one representing the bird-life of an irrigated area of the San Joaquin Valley, the other a Flamingo colony.

Experiments toward the establishment of satisfactory methods of procedure in the mounting of mammals, reptiles, etc.,

have been carried on during the actual progress of the work, and some satisfactory results have been reached.

The current work of preparing maps, labels, and lettering has been performed by the department; also the general work in photography for the Museum.

Some relief maps have been modeled and the large Antarctic charts now in the foyer have been made. A large number of piece moulds, casts, etc., have been made for various departments, as noted under the departments to which they belong.

DEPARTMENT OF BOOKS AND PUBLICATIONS.—During the past year the special work has been the cataloguing of the Library, which was necessitated by the adoption of a new and more scientific method of classification; as a result 32,872 volumes have been catalogued with both subject and author index. This work has been under the direct supervision of Miss I. R. Hood.

The accessions for the year amounted to 2,931 volumes and 3,103 pamphlets; among which are many valuable serials as well as the more important new books which have appeared during the year.

Of special interest has been the gift of the private library of Professor H. C. Bumpus and also the gift of the elephant folio edition of Audubon's "Birds of America," by Mr. Archibald Rogers. Mr. John R. Livermore has given a painting of the White-throated Sparrow, bearing the signature of J. J. Audubon. Prof. Wheeler has presented to the Museum his collections of books and pamphlets on Arachnida, and the Museum has acquired by purchase his library on North American Diptera.

On the shelves of the Library will now be found the current numbers of all the important periodicals relating to natural history, together with the larger number of the publications of the Academies and learned Societies of the world.

The book-binding department has been engaged almost entirely in the covering of separata, which have been accumulating for many years.

During the year 15,573 cards have been received from the Concilium Bibliographicum and intercalated in the original set. This has proved to be one of the most complete and practical bibliographies of biological subjects, and has been much used. In addition to this set the Concilium has recently deposited in the American Museum of Natural History a complete set of its cards. These are for the convenience of American purchasers, who can thus obtain the cards at the same price as from Zürich, but with the saving of much time. The Museum has undertaken this gratuitously for the benefit of American biologists.

During the past year the Museum has sent the following letter to one hundred Institutions in selected centers:

“The American Museum of Natural History desires to place its publications in certain institutions where they may remain as complete sets for all time. We are therefore asking you if the name of your library may be placed upon a list of one hundred institutions to receive the ‘Memoirs’ and ‘Bulletin’ of the American Museum, with the understanding, first, that these publications be sent gratis, and second, that they shall be made available for reference and study for those in your locality who may be disposed to avail themselves of the general privileges of your institution.”

Replies have been received and publications sent to ninety-eight of these institutions.

Following is a list of the scientific publications of the Museum issued in 1904, as received by the Curator for distribution and exchange:

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALÆONTOLOGY.

Bulletin, Volume XX.

R. P. Whitfield. “Notice of a New Genus and Species of Lower Carboniferous Bryozoon.” (Page 469, plate xi, fig. 2 and 3.)

R. P. Whitfield. “Notice of a Remarkable Case of Reproduction of Lost Parts Shown on a Fossil Crinoid.” (Pages 471-472, plates xi, fig. 1 and 4, xii and xiii.)

R. P. Whitfield. “Note on some Worm (?) Burrows in Rocks of the Chemung Group of New York.” (Pages 473, 474, plate xiv.)

THE SAN JOAQUIN VALLEY GROUP.

Background painted by Charles J. Hittell (landscape) and Louis Agassiz Fuertes (birds). Birds mounted by H. S. Denslow.

DEPARTMENT OF MAMMALOGY AND ORNITHOLOGY.

Bulletin, Volume XX.

- J. A. Allen. "New Forms of the Mountain Goat (*Oreamnos*)." (Pages 19-21.)
- J. A. Allen. "Mammals from Southern Mexico and Central and South America." (Pages 29-80, with 18 text figures.)
- J. A. Allen. "The External Ear-bone in Certain Rodents." (Pages 135-138, with 1 text figure.)
- J. A. Allen. "Further Notes on Mammals from Northwestern Durango." (Pages 205-210.)
- J. A. Allen. "New Bats from Tropical America, with Note on Species of *Otopterus*." (Pages 227-237.)
- J. A. Allen. "Mammals Collected in Alaska by the Andrew J. Stone Expedition of 1903." (Pages 273-292, with 9 text figures.)
- J. A. Allen. "A New Sheep from Kamchatka." (Pages 293-298, with 6 text figures.)
- J. A. Allen. "New Mammals from Venezuela and Colombia." (Pages 327-335.)
- J. A. Allen. "List of Mammals from Venezuela, Collected by Mr. Samuel M. Klages." (Pages 337-345.)
- J. A. Allen. "A Fossil Porcupine from Arizona." (Pages 383, 384.)
- J. A. Allen. "The Tamandua Anteaters." (Pages 385-398, with 4 text figures.)
- J. A. Allen. "Report of Mammals from the District of Santa Marta, Colombia, Collected by Mr. Herbert H. Smith, with Field Notes by Mr. Smith." (Pages 407-468, with 4 text figures.)
- Frank M. Chapman. "A New Grouse from California." (Pages 159-162.)
- Frank M. Chapman. "List of Birds Collected in Alaska by the Andrew J. Stone Expedition of 1903." (Pages 399-406.)

DEPARTMENT OF VERTEBRATE PALÆONTOLOGY.

Bulletin, Volume XX.

- J. W. Gidley. "Proper Generic Names of Miocene Horses." (Pages 191-194.)
- W. D. Matthew. "A Complete Skeleton of *Merycodus*." (Pages 101-129, plate iii, with 21 text figures.)
- W. D. Matthew. "Notice of Two New Oligocene Camels." (Pages 211-215.)
- W. D. Matthew and J. W. Gidley. "New or Little-Known Mammals from the Miocene of South Dakota. American Museum Expedition of 1903." (Pages 241-268, with 15 text figures.)
- H. F. Osborn. "An Armadillo from the Middle Eocene (Bridger) of North America." (Pages 163-165.)

H. F. Osborn. "New Oligocene Horses." (Pages 167-179, plates iv and v, with 8 text figures.)

H. F. Osborn. "Manus, Sacrum, and Caudals of Sauropoda." (Pages 181-190, with 6 text figures.)

H. F. Osborn. "*Teleorhinus browni*—A Teleosaur in the Fort Benton." (Pages 239, 240.)

H. F. Osborn. "New Miocene Rhinoceroses with Revision of Known Species." (Pages 307-326, with 21 text figures.)

H. F. Osborn. "The Great Cretaceous Fish *Portheus molossus* Cope." (Pages 377-381, plate x, with 4 text figures.)

"Revised Lists of Casts, Models and Photographs of Fossil Vertebrates." (Supplement, pages 1-52, with 8 text figures.)

DEPARTMENT OF ETHNOLOGY.

Memoirs.

Waldermar Bogoras. "The Chukchee—Material Culture." (Volume VII, Pt. 3, pages 1-276, plates i-xxxi, with 199 text figures and a colored map.)

Carl Lumholtz. "Decorative Art of the Huichol Indians." (Volume III, Pt. 3, pages 279-327, plates xix-xxiii, with 170 text figures.)

Bulletin.

A. L. Kroeber. "The Arapaho. III. Ceremonial Organization." (Vol. XVIII, Pt. II, pages 151-230, with 70 text figures.)

Clark Wissler. "Decorative Art of the Sioux Indians." (Vol. XVIII, Pt. III, pages 231-278, plates xxxviii-lvi, with 102 text figures.)

Harlan I. Smith. "A Costumed Human Figure from Tampico, Washington." (Vol. XX, pages 195-203, plates vi-ix, with 3 text figures.)

DEPARTMENT OF ARCHÆOLOGY.

Bulletin, Volume XX.

Ad. F. Bandelier. "On the Relative Antiquity of Ancient Peruvian Burials." (Pages 217-226.)

DEPARTMENT OF ENTOMOLOGY.

Bulletin, Volume XX.

William Beutenmüller. "The Types of Cynipidæ in the Collection of the American Museum of Natural History." (Pages 23-28.)

William Beutenmüller. "Types of Lepidoptera in the Collection of the American Museum of Natural History." (Pages 81-86.)

William Beutenmüller. "Types of Diptera in the Collection of the American Museum of Natural History." (Pages 87-99.)

Journal, Volume IV, No. 4.

William Beutenmüller. "The Insect Galls of the Vicinity of New York City." (Pages 89-124, with 87 text figures.)

DEPARTMENT OF INVERTEBRATE ZOOLOGY.

Bulletin, Volume XX.

Charles Thomas Brues. "Notes on *Trichobius* and the Systematic Position of the Streblidæ." (Pages 131-134, with 1 text figure.)

William Morton Wheeler. "Three New Genera of Inquiline Ants from Utah and Colorado." (Pages 1-17, plates i-ii.)

William Morton Wheeler. "The American Ants of the Subgenus *Colobopsis*." (Pages 139-158, with 7 text figures.)

William Morton Wheeler. "Ants from Catalina Island, California." (Pages 269-271.)

William Morton Wheeler. "The Ants of North Carolina." (Pages 299-306.)

William Morton Wheeler. "A New Type of Social Parasitism among Ants." (Pages 347-375.)

The American Museum Journal was published as a quarterly. Guide Leaflets were issued with the numbers as follows:

"A General Guide to the American Museum of Natural History." (Pages 1-54, with text illustrations.) January.

"Birds' Nests and Eggs," Frank M. Chapman. (Pages 1-31, with text illustrations.) April.

"Primitive Art." (Pages 1-39, with numerous text figures.) July.

"The Insect-Galls of the Vicinity of New York City," William Beutenmüller. (Pages 1-38, with many text figures.) October.

DEPARTMENT OF MAPS AND CHARTS.—The work of preparing and classifying the Museum's large collection of maps has been continued by Dr. Woodward. A large part of the collection is now available for use, having been placed in convenient holders, arranged by subjects, as under states, counties, etc., so as to be readily accessible. Several maps of great rarity are contained in the collection, which now ranks as fourth in importance in New York City. Much use of the collection has been made during the past year, even by persons outside of the Museum Staff.

Important donations have been received from Gen. J. Watts de Peyster, Dr. H. C. Bumpus, Prof. H. F. Osborn, and Mr. A. F. Bandelier. The accessions have been:

By Donation.....	Atlases	3.....	Maps	414.....	Charts	0
" Exchange.....	"	29.....	"	3.....	"	0
" Purchase.....	"	0.....	"	281.....	"	1
Total.....		32.....		698.....		1

ATTENDANCE.—The number of visitors to the Museum during 1904 was 402,449—a considerable increase over that of previous years. The number of pupils from the schools, public and private, increased from 7,032 in 1903 to 42,380 in 1904, a gain of about 600 per cent. This is largely the result of the establishment of new and more intimate relations between the Museum and the Public Schools. Members of the scientific staff have been detailed to give lectures especially prepared for the school children. These have been attended by fully 35,000 pupils. As stated elsewhere in this report, the Museum has kept in circulation among the schools about 140 small collections of natural history specimens, thus still further extending the educational work of the Museum among the Public Schools.

The number of visitors on holidays is often so great as to tax our resources for their management and accommodation. The attendance at the meetings of the scientific societies held in the Museum has been over 1700; at public lectures, about 44,000, besides the 35,000 present at lectures given to school children.

ASSOCIATED SOCIETIES AND ORGANIZATIONS.—As already noted on an earlier page of this report, two small assembly rooms were fitted up early in the year for the use of the scientific societies which have sought affiliations with the Museum, and also for use as small lecture halls. The following societies and classes have shared the hospitality of the Museum during the past year:

- New York Academy of Sciences.
- New York Entomological Society.
- Linnæan Society of New York.
- New York Mineralogical Club.
- West Side Natural History Society.
- American Ethnological Society.
- Sequoia League.
- Audubon Society of the State of New York.
- Eighth International Geographic Congress.
- Dr. J. E. Peabody's class in Zoölogy.
- Dr. Clark Wissler's class in Anthropology.
- Mr. Julius M. Johnson's class in Nature Study.

TRANSPORTATION.—As heretofore we have been greatly assisted in our field work by the liberality of various railways and transportation companies through the granting of passes to curators and their assistants, in reaching and returning from their distant fields of exploration, and reduced rates of transportation for their collection, without which generous aid extensive field work would be impossible. The list of railways and transportation companies to whom we have been indebted during the past year is as follows:

Atchison, Topeka & Santa Fé Railway.	Mexican Central Railway.
Chicago, Milwaukee & St. Paul Railway.	Mexican National Railway.
Chicago & Northwestern Railway.	Northern Pacific Railway.
Chicago, Burlington & Quincy Railway.	Southern Railway.
Canadian Pacific Railway.	Southern Pacific Company.
Canadian Northern Railway.	St. Louis & San Francisco Railroad.
Erie Railroad.	Union Pacific Railroad.
Great Northern Railway.	Wabash Railroad.

LECTURES.—The courses of lectures include (1) a course to teachers, (2) a course to members of the Museum, (3) a public course given on holidays, (4) lectures to the children of the public schools, (5) a course under the auspices of the Board of Education of the City of New York, in coöperation with the Museum.

The spring course to teachers was given as usual by Professor Bickmore under a grant from the State. At the end of this course the State failed to renew the grant, and the fall course, owing to the illness of Professor Bickmore, was given by other members of the Museum Staff. These courses were as follows:

LECTURES TO TEACHERS.

Spring Course. By Professor Bickmore.

January	23.—Holland—Amsterdam and Haarlem.
“	30.—Holland—Amsterdam and Haarlem.
February	6.—Holland—Rotterdam and the Hague.
“	13.—Holland—Rotterdam and the Hague.
“	20.—Belgium—Antwerp and Bruges.
“	27.—Belgium—Antwerp and Bruges.
March	5.—Belgium—Brussels and Waterloo.
“	12.—Belgium—Brussels and Waterloo.

Fall Course.

October	22.—The Birds of Autumn and their Habits. . . Frank M. Chapman
“	29.—The Most Profitable Methods of Bird Study for Teachers, Pupils and Bird Lovers. . . . Frank M. Chapman

- November 5.—The Origin of the American Continent and its Essential Physical Features. Edmund Otis Hovey
 “ 12.—Certain Facts and Methods of Physical Geography that may be of use in the Class-room. . Edmund Otis Hovey
 “ 19.—How the Parks, Highways and Buildings of our City may be used as Material for Nature Study. . Louis P. Gratacap
 “ 26.—The Industries of the Sea. Louis P. Gratacap

PUBLIC LECTURES ON HOLIDAYS.

- New Year's Day, January 1.—Germany—Berlin. . . . Prof. Albert S. Bickmore
 Lincoln's Birthday, February 12.—Mount Pelé and the Destruction of St. Pierre, Martinique, illustrated by views and specimens. Dr. Edmund Otis Hovey
 Washington's Birthday, February 22.—Holland—Amsterdam.
 Prof. Albert S. Bickmore
 Thanksgiving Day, November 24.—Russia—The Land and the People.
 Dr. Edmund Otis Hovey
 Christmas Day, December 26.—A Christmas Trip in the Tropics.
 Frank M. Chapman

LECTURES FOR MEMBERS.

Evening Courses.

- January 7.—The Evolution of the Horse. Prof. Henry F. Osborn
 “ 14.—Island Bird Life. Frank M. Chapman
 “ 21.—Mimicry and Protective Coloring in Animals.
 Prof. William Morton Wheeler
 “ 28.—The Scientific Results of the Jesup North Pacific Expedition. Prof. Franz Boas
 February 4.—The Navaho and Other Blanket Makers of the Southwest. George H. Pepper
 “ 11.—The Island of Titicaca. A. F. Bandelier
 “ 18.—The Work of the American Museum Among the Indians of California. Prof. Livingston Farrand

“ 19.—Industrial Life: Hunting and Fishing.
“ 26.—Industrial Life: Fire-making, Pottery, Weaving.
Dec. 3.—Primitive Art.
“ 10.—Primitive Religions and Ceremonials.

It gives me pleasure to call attention to the satisfactory progress of the work of the Museum during the year 1904. Important additions have been made to the collections in nearly all departments, and several notable exhibits have for

the first time been opened to the public. The educational work has been greatly extended through the special lectures of the scientific staff to the pupils of the public schools, and through the provision of additional circulating collections of natural history specimens. The publications, based on the researches of the scientific staff, have fully maintained the high standard of previous years. The appreciation of the public has been manifested by an increase in the number of visitors, in the lecture attendance and in the addition of more than the usual number of new members; the hopes and expectations of the Founders, however, will not be fully realized until a much larger number of citizens of all classes have discovered the pleasure that comes from coöperating in good work. There never has been a time when the Museum would more gladly welcome new members, or when membership fees would accomplish more than the present.

In closing this Report, and with the utmost regret, I am obliged to announce to the friends of the Museum the loss we sustain in the decease of Mr. Adrian Iselin, one of the original incorporators, for thirty-six years a member of the Board of Trustees, a generous contributor and a sincere friend.

Very truly yours,

MORRIS K. JESUP, *President.*

INCORPORATION.

AN ACT

TO INCORPORATE THE

AMERICAN MUSEUM OF NATURAL HISTORY,

Passed April 6, 1869.

The People of the State of New York, represented in Senate and Assembly, do enact as follows :

SECTION 1. John David Wolfe, Robert Colgate, Benjamin H. Field, Robert L. Stuart, Adrian Iselin, Benjamin B. Sherman, William A. Haines, Theodore Roosevelt, Howard Potter, William T. Blodgett, Morris K. Jesup, D. Jackson Steward, J. Pierpont Morgan, A. G. P. Dodge, Chas. A. Dana, Joseph H. Choate and Henry Parish, and such persons as may hereafter become members of the Corporation hereby created, are hereby created a body corporate, by the name of "The American Museum of Natural History," to be located in the City of New York, for the purpose of establishing and maintaining in said city a Museum and Library of Natural History; of encouraging and developing the study of Natural Science; of advancing the general knowledge of kindred subjects, and to that end of furnishing popular instruction and recreation.

SEC. 2. Said Corporation shall have power to make and adopt a Constitution and By-Laws, and to make rules and regulations for the admission, suspension and expulsion of its members, and their government, the number and election of its officers, and to define their duties, and for the safe keeping of its property, and, from time to time, to alter and modify such Constitution, By-Laws, Rules and Regulations. Until

an election shall be held pursuant to such Constitution and By-Laws, the persons named in the first section of this Act shall be, and are hereby declared to be, the Trustees and Managers of said Corporation and its property.

SEC. 3. Said Corporation may take and hold by gift, devise, bequest, purchase or lease, either absolutely or in trust, for any purpose comprised in the objects of the Corporation, any real or personal estate, necessary or proper for the purposes of its incorporation.¹

SEC. 4. Said Corporation shall possess the general powers, and be subject to the restrictions and liabilities, prescribed in the Third Title of the Eighteenth Chapter of the First Part of the Revised Statutes.

SEC. 5. This Act shall take effect immediately.

STATE OF NEW YORK, }
OFFICE OF THE SECRETARY OF STATE. } ss.

I have compared the preceding with the original law on file in this office, and do hereby certify that the same is a correct transcript therefrom, and of the whole of said original law.

[L. S.] Given under my hand and seal of Office at the City of Albany,
this fourteenth day of April, in the year one thousand
eight hundred and sixty-nine.

D. WILLERS, Jr., *Deputy Secretary of State.*

¹ As amended by Chapter 303, Laws of 1868, of the State of New York, entitled "An Act to amend chapter one hundred and nineteen, laws of eighteen hundred and sixty-nine, entitled 'An Act to incorporate the American Museum of Natural History,' relative to its charter."

CONTRACT

WITH THE DEPARTMENT OF PUBLIC PARKS

FOR THE OCCUPATION OF THE NEW BUILDING.

THIS AGREEMENT, made and concluded on the twenty-second day of December, in the year one thousand eight hundred and seventy-seven, between the DEPARTMENT OF PUBLIC PARKS OF THE CITY OF NEW YORK, the party of the first part, and the AMERICAN MUSEUM OF NATURAL HISTORY, party of the second part, witnesseth:

Whereas, by an Act of the Legislature of the State of New York, passed April 22d, 1876, entitled "An Act in relation to the powers and duties of the Board of Commissioners of the Department of Public Parks, in connection with the American Museum of Natural History, and the Metropolitan Museum of Art," the said party of the first part is authorized and directed to enter into a contract with the said party of the second part, for the occupation by it of the buildings erected or to be erected on that portion of the Central Park in the City of New York, known as Manhattan Square, and for transferring thereto and establishing and maintaining therein its museum, library and collections, and carrying out the objects and purposes of said party of the second part; and

Whereas, a building contemplated by said act has now been erected and nearly completed and equipped in a manner suitable for the purposes of said Museum, as provided in the first section of the Act of May 15, 1875, known as Chapter 351, of the Laws of 1875, for the purpose of establishing and maintaining therein the said Museum, as provided by the said last-named act, and by the Act of April 5, 1871, known as Chapter 290, of the Laws of 1871; and,

Whereas, it is desired as well by the said party of the first part, as by the said party of the second part, that, immediately upon the completion and equipment of said building, the said party of the second part should be established therein, and should transfer thereto its Museum, Library and Collections, and carry out the objects and purposes of the said party of the second part;

Now, therefore, it is agreed by and between the said parties as follows, namely:

First.—That the said party of the first part has granted and demised and let, and doth, by these presents, grant, demise and let, unto the said party of the second part, the said buildings and the appurtenances thereunto belonging, to have and to hold the same so long as the said party of the second part shall continue to carry out the objects and purposes defined in its charter; or such other objects and purposes as by any future amendment of said charter may be authorized; and shall faithfully keep, perform, and observe the covenants and conditions herein contained on its part to be kept, performed and observed, or until the said building shall be surrendered by the said party of the second part, as hereinafter provided.

Secondly.—That neither the party of the first part, its successor or successors, nor the Mayor, Aldermen and Commonalty of the City of New York, shall be in any manner chargeable or liable for the preservation of the said building or the property of the party of the second part which may be placed therein, against fire, or for any damage or injury that may be caused by fire to the said property; but it is agreed that, damages as aforesaid excepted, the said party of the first part will keep said building, from time to time, in repair.

Thirdly.—That as soon after the completion and equipment of said building as practicable, said party of the second part shall transfer to, and place and arrange in said building, its museum, library and collections, or such portion thereof as can be properly displayed to the public therein, and shall have

and enjoy the exclusive use of the whole of said building, subject to the provisions herein contained, and the rules and regulations herein prescribed, during the continuance of the term granted, or until a surrender thereof, as herein provided.

Fourthly.—That the exhibition halls of said building shall, on Wednesday, Thursday, Friday and Saturday of each week, and on all legal or public holidays, except Sundays, be kept open and accessible to the public, free of charge, from nine o'clock A.M. until half an hour before sunset, under such rules and regulations as the party of the second part shall from time to time prescribe; but on the remaining days of the week the same shall be only open for exhibition to such persons, upon such terms as the said party of the second part shall from time to time direct. But all professors and teachers of the public schools of the City of New York, or other institutions of learning in said city, in which instruction is given free of charge, shall be admitted to all the advantages afforded by the said party of the second part, through its Museum, Library, apparatus, and collections, or otherwise, for study, research and investigation, free of any charge therefor, and to the same extent and on the same terms and conditions as any other persons are admitted to such advantages, as aforesaid.

Fifthly.—That the Museum, Library and collections, and all other property of said party of the second part, which shall or may be placed in said building, shall continue to be and remain absolutely the property of said party of the second part, and neither the said party of the first part nor the said the Mayor, Aldermen and Commonalty, shall by reason of said property being placed in said building, or continuing therein, have any right, title, property or interest therein; nor shall the said party of the second part, by reason of its occupation and use of said building under this agreement, acquire, or be deemed to have any right, title, property or interest in said building, except so far as expressly granted by this agreement.

Sixthly.—That the said party of the second part shall, on or before the first day of May, in every year, during the con-

tinuance of this agreement, submit to the said party of the first part, its successor or successors, a detailed printed report of the operations and transactions of the said party of the second part, and all its receipts and payments, for the year ending with the 31st day of December next preceding.

Seventhly.—That said party of the first part shall have, at all times, access to every part of the said building for general visitation and supervision, and also for the purpose of the performance of the duties devolved upon it by the laws of the State of New York, or of the City of New York. That the police powers and supervision of said party of the first part shall extend in, through and about said building. That the said party of the second part may appoint, direct, control and remove all persons employed within said building, and in and about the care of said building, and the museum, library and collections therein contained.

Eighthly.—That said party of the second part may, at any time, after the expiration of three, and before the expiration of six months from the date of the service of a notice in writing to said party of the first part, its successor or successors, or to the Mayor of the City of New York, of its intention so to do, quit and surrender the said premises and remove all its property therefrom; and upon and after such notice, the said party of the second part shall and will, at the expiration of the said six months, quietly and peaceably yield up and surrender unto the said party of the first part and its successors all and singular the aforesaid demised premises. And it is expressly understood and agreed by and between the parties hereto that if the said party of the second part shall omit to do, perform, fulfill or keep any or either of the covenants, articles, clauses and agreements, matters and things herein contained, which on its part are to be done, performed, fulfilled or kept, according to the true intent and meaning of these presents, then and from thenceforth this grant and demise shall be utterly null and void. And in such case it shall and may be lawful for said Department to serve or cause to be served on the said party of the second part a notice in writing declaring that the said

grant hereinbefore made has become utterly null and void and thereupon the said party of the first part, its successor or successors (ninety days' time being first given to the said party of the second part to remove its property therefrom), may reënter, and shall again have, repossess and enjoy the premises aforementioned, the same as in their first and former estate, and in like manner as though these presents had never been made, without let or hindrance of the said party of the second part, anything here contained to the contrary notwithstanding.

Ninthly.—And it is further expressly understood and agreed, by and between the parties hereto, that this agreement may be wholly canceled and annulled, or, from time to time, altered, or modified, as may be agreed, in writing, between the said parties, or their successors, anything herein contained to the contrary in anywise notwithstanding.

In witness whereof, the party of the first part hath caused this agreement to be executed by their President and Secretary, pursuant to a resolution of the Board of Commissioners of said Department, adopted at a meeting held on the thirtieth day of January, in the year of our Lord one thousand eight hundred and seventy-eight; and the said party of the second part hath caused the same to be executed by their President, and their official seal affixed thereto, pursuant to a resolution of the Trustees of the American Museum of Natural History, adopted at a meeting held on the twelfth day of February, in the year of our Lord one thousand eight hundred and seventy-seven.

In presence of

D. PORTER LORD.

JAMES F. WENMAN,

*President Department of Public Parks
of the City of New York.*

WILLIAM IRWIN,

*Secretary Department of Public Parks
of the City of New York.*

ROBERT L. STUART,

*President American Museum of
Natural History.*

SEAL
of the American
Museum of
Natural History

STATE OF NEW YORK, }
 City and County of New York, } ss. :

On this 12th day of February, in the year 1878, before me personally came James F. Wenman, President of the Department of Public Parks of the City of New York, and William Irwin, Secretary of the said Department of Public Parks, with both of whom I am personally acquainted, and both of whom being by me duly sworn, said that they reside in the City and Country of New York ; that the said James F. Wenman is the President, and the said William Irwin is the Secretary of the said Department of Public Parks, and that they signed their names to the foregoing agreement by order of the Board of Commissioners of the said Department of Public Parks, as such President and Secretary.

[SEAL.]

W. C. BESSON,
 (73) *Notary Public N. Y. Co.*

STATE OF NEW YORK, }
 City and County of New York, } ss. :

On this 12th day of February, in the year 1878, before me personally came Robert L. Stuart, the President of the American Museum of Natural History, with whom I am personally acquainted, who being by me duly sworn, said that he resides in the City and County of New York, that he is the President of the American Museum of Natural History, and that he knows the corporate seal of said museum, that the seal affixed to the foregoing agreement is such corporate seal, that it is affixed thereto by order of the Board of Trustees of said American Museum of Natural History, and that he signed his name thereto by the like order, as President of said Museum.

[SEAL.]

W. C. BESSON,
 (73) *Notary Public N. Y. Co.*

Recorded in the office of the Register of the City and County of New York in Liber 1426 of Cons., page 402, February 16, A. D. 1878, at 9 o'clock A.M., and examined.

Witness my hand and official seal,

[SEAL.]

FREDERICK W. LOEW,
Register.

NOTE.—July 25, 1892, by consent of the Trustees, section fourth was modified to enable the Trustees to open the Museum free to the public "throughout the year, excepting Mondays, but including Sunday afternoons and two evenings of each week."

June 29, 1893, by consent of the Trustees, section fourth was modified to enable the Trustees to open the Museum free of charge to the public "throughout the year for five days in each week, one of which shall be Sunday afternoon, and also two evenings of each week."

CONSTITUTION
OF THE
AMERICAN MUSEUM OF NATURAL HISTORY,
IN THE CITY OF NEW YORK.

ARTICLE I.

This Corporation shall be styled THE AMERICAN MUSEUM OF NATURAL HISTORY.

ARTICLE II.

The several persons named in the charter, and such others as they may add to their number, which shall not exceed twenty-five in all at one time, shall be the Trustees to manage the affairs, property and business of the Corporation, and in case of the death or accepted resignation of any Trustee, a new Trustee shall be elected to fill his place by the remaining Trustees; but no election of a Trustee shall be held except at a quarterly meeting of the Trustees, on written notice of not less than one week, specifying that such election is to be held, and the vacancy which is to be filled; and every election of Trustees shall be by ballot, and no person shall be deemed to be elected a Trustee, unless he shall receive the votes of at least three-fourths of the Trustees present.

ARTICLE III.

The Trustees shall meet quarterly, on the second Monday of every February, May, August and November, at an hour and place to be designated, on at least one week's written notice from the Secretary, and shall annually, at the quarterly meeting in February, elect the officers and committees for the ensuing year. They shall also meet at any other time to transact special business on a call of the Secretary, who shall

issue such call whenever requested so to do, in writing, by five Trustees, or by the President, and give written notice to each Trustee of such special meeting, and of the object thereof, at least three days before the meeting is held.

ARTICLE IV.

SECTION 1. The officers of said Corporation shall be a President, a First Vice-President, a Second Vice-President and a Treasurer, all to be elected from the Trustees. These officers shall be elected by ballot, and the persons having a majority of the votes cast shall be deemed duly elected. They shall hold their offices for one year or until their successors shall be elected.

SEC. 2. The Board of Trustees shall appoint each year, in such manner as it may direct, the following Standing Committees: an Executive Committee, an Auditing Committee, a Finance Committee, a Nominating Committee. These Committees are all to be elected from the Trustees, and the members shall hold office for one year, or until their successors shall be elected.

The Board of Trustees shall also have authority to appoint such other committees or officers as they may at any time deem desirable, and to delegate to them such powers as may be necessary.

ARTICLE V.

SECTION 1. The President shall have a general supervision and direction over the affairs of the Corporation, and shall preside at all the meetings of the Museum and of the Trustees. In his absence or inability to act, the First or Second Vice-President shall act in his place.

SEC. 2. The Secretary shall be appointed by the Board of Trustees. He shall be present, unless otherwise ordered by the Board, at all the meetings of the Museum and Trustees, of the Executive Committee and of such other Committees as the Board may direct. He shall keep a careful record of the proceedings of such meetings, shall preserve the seal, archives

and correspondence of the Museum, shall issue notices for all meetings of the Trustees and various committees, and shall perform such other duties as the Board may direct.

The Board of Trustees shall have power to appoint an Assistant Secretary, who, under its directions, shall perform the duties of the Secretary in his absence or inability to act.

SEC. 3. The Treasurer shall receive and disburse the funds of the Museum. He shall report in writing, at each quarterly meeting of the Trustees, the balance of money on hand, and the outstanding obligations of the Museum, as far as practicable; and shall make a full report at the Annual Meeting of the receipts and disbursements of the past year, with such suggestions as to the financial management of the Museum as he may deem proper.

SEC. 4. The accounts of the Museum shall be kept at the General Office, in books belonging to it, which shall at all times be open to the inspection of the Trustees.

These accounts shall be under the care of an Assistant Treasurer, who shall be appointed by the Board of Trustees and be under their direction. He shall give such bonds for the faithful performance of his duties as the Board may direct.

SEC. 5. The offices of Secretary and Assistant Treasurer may be held by the same person.

ARTICLE VI.

The Executive Committee shall consist of nine Trustees, of whom the President, First and Second Vice-Presidents and Treasurer shall be four. The five members of the Executive Committee, elected in February, 1887, shall forthwith draw lots for terms of one, two, three, four and five years, respectively, and the terms for which those drawing the two, three, four and five years, respectively, were elected, are hereby extended to cover those periods; and hereafter at each annual election one member of the Executive Committee shall be elected to serve for five years. They shall have the control and regulation of the Collections, Library and other property

of the Museum; and shall have power to purchase, sell and exchange specimens and books, to employ agents, to regulate the manner and terms of exhibiting the Museum to the public, and generally to carry out in detail the directions of the Trustees; but the Executive Committee shall not incur any expense or liability for the Museum exceeding two thousand dollars at one time, or exceeding in all ten thousand dollars, in the interval between the quarterly meetings of the Trustees, without the express sanction of the Trustees. Five members of the Committee shall constitute a quorum for the transaction of business.

ARTICLE VII.

The Auditing Committee shall consist of three Trustees. They shall have the books of the Museum duly audited, at least once in six months, by an authorized public accountant to be selected by them.

No bills shall be paid unless approved, in writing, by the President, the Chairman of the Executive Committee, or the Director.

ARTICLE VIII.

The Finance Committee shall consist of four, including the Treasurer. It shall be their duty to take charge of and invest the funds of the Museum in its name, and to take all proper measures to provide means for its support; and they shall have the sole custody of the securities belonging to the invested funds of the Museum, subject to the order of the Board of Trustees.

ARTICLE IX.

The Nominating Committee shall be composed of three, to whom shall be first submitted the name of any person proposed as a candidate for election to membership in the Board of Trustees. The Committee shall report on such candidates from time to time, as they may deem to be for the interest of the Museum.

ARTICLE X.

The President shall be a member, *ex-officio*, of all standing committees.

ARTICLE XI.

Nine Trustees shall constitute a quorum for the transaction of business, but five Trustees meeting may adjourn and transact current business, subject to the subsequent approval of a meeting at which a quorum shall be present.

ARTICLE XII.

By-Laws may from time to time be made by the Trustees providing for the care and management of the property of the Corporation and for the government of its affairs, and may be amended at any meeting of the Trustees by a vote of a majority of those present, after a month's notice in writing of such proposed amendment.

ARTICLE XIII.

The contribution of \$1,000 or more to the funds of the Museum, at any one time, shall entitle the person giving the same to be a Patron of the Museum, who shall have the right in perpetuity to appoint the successor in such patronship.

The contribution of \$500, at one time, shall entitle the person giving the same to be a Fellow, who shall have the right to appoint one successor in such fellowship.

No appointment of a successor shall be valid unless the same shall be in writing, endorsed on the certificate, or by the last will and testament.

The contribution of \$100, at one time, shall entitle the person giving the same to be a Life Member.

Any person may be elected by the Trustees to either of the above degrees, who shall have given to the Museum books or specimens, which shall have been accepted by the Executive Committee, or by the President, to the value of twice the amount in money requisite to his admission to the same degree, and the President and Secretary shall issue diplomas accordingly under the seal of the Museum.

The Trustees may also elect Honorary Fellows of the Museum in their discretion.

ARTICLE XIV.

Any person who has held the office of President for ten or more successive years may be elected by the Trustees as Honorary President for life.

ARTICLE XV.

No alterations shall be made in this Constitution, unless at a regular quarterly meeting of the Trustees, or at a special meeting called for this purpose; nor by the votes of less than a majority of all the Trustees; nor without notice in writing of the proposed alteration, embodying the amendment proposed to be made, having been given at a regular meeting.

BY-LAWS.

I.

Patrons giving \$1,000 are each entitled to one Subscriber's Ticket, 5 Complimentary Season Tickets and 10 Tickets for a single admission.

Fellows, giving \$500, are each entitled to 1 Subscriber's Ticket and 10 Tickets for a single admission.

Life Members, giving \$100, are each entitled to 1 Subscriber's Ticket and 5 Tickets for a single admission.

Annual Members, paying \$10 yearly, are each entitled to 1 Subscriber's Ticket and 2 Tickets for a single admission.

[NOTE.—A Subscriber's Ticket admits two persons to the Museum on reserve days (Mondays and Tuesdays), and to all Receptions and Special Exhibitions, and may be used by any member of the Subscriber's family.

The Single Admission Tickets admit the bearers to the Museum on reserve days (Mondays and Tuesdays), and are issued to Subscribers for distribution among friends and visitors.]

II.

Any Trustee who shall fail to attend three consecutive Regular Quarterly Meetings of the Board shall cease to be a Trustee, unless excused by the Board.

III.

No gentleman shall hereafter be eligible to the position of a Trustee who shall not be a "Patron" of the Museum, unless by a unanimous vote of a quorum of the Board—excepting Trustees *ex-officio*—nor be eligible unless his name shall be presented by the Nominating Committee at a Regular Quarterly Meeting prior to the meeting at which said election shall take place.

IV.

No indebtedness (other than for current expenses) shall be incurred by any committee, officer or employee of the Museum,

except as provided for in the Constitution. Any desired additional expenditure shall first receive the approval of the Board of Trustees.

V.

If any Trustee shall accept a salary from this Corporation he shall thereby be disqualified for the time being from acting as a Trustee thereof; provided, that the Board of Trustees shall have power to suspend the operation of this law in any special case.

VI.

Any vacancies occurring in the membership of the several committees during the interval between the regular meetings of the Board of Trustees may be filled at a regular meeting of the Executive Committee, until the next meeting of the Board.

VII.

All bequests or legacies, not especially designated, shall hereafter be applied to the *Permanent Endowment Fund*, the interest only of which shall be applied to the use of the Museum as the Board shall direct.

VIII.

At such times as it may be impracticable to obtain the services of the members of the Auditing Committee, the members of the Executive Committee may act in their place and stead.

CONSTRUCTION AND INSTALLATION OF A NEW HEATING AND LIGHTING PLANT.

LEGAL ENACTMENTS OF 1902.

BY THE BOARD OF ALDERMEN.

AN ORDINANCE to provide for an issue of Corporate Stock in the sum of two hundred thousand dollars (\$200,000) the proceeds to be used to provide means for the construction and installation of a new heating and lighting plant for the American Museum of Natural History, in the Borough of Manhattan.

Be it ordained by the Board of Aldermen of The City of New York as follows:

SECTION 1. The Board of Aldermen hereby approves of and concurs in the following resolution adopted by the Board of Estimate and Apportionment June 13, 1902, authorizing the Comptroller to issue Corporate Stock of The City of New York to the amount and for the purposes therein specified.

Resolved, That, pursuant to the provisions of Section 47 of the amended Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the issue of bonds to an amount not exceeding two hundred thousand dollars (\$200,000), for the purpose of providing means to pay for the construction and installation of a new heating and lighting plant for the American Museum of Natural History in the Borough of Manhattan, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue Corporate Stock of The City of New York in the manner provided by Section 169 of the Greater New York Charter, as amended by Chapter 563 of the Laws of 1902, to an amount not exceeding two hundred thousand dollars (\$200,000), the proceeds thereof to be applied to the purposes aforesaid."

Adopted by the Board of Aldermen July 22, 1902, a majority of all the members elected voting in favor thereof.

Approved by the Mayor July 30, 1902. (Signed) P. J. SCULLY, *Clerk*.

Contracts awarded to December 31, 1903.

For the Erection and Completion of a New Wing for a New Heating, Power and Electric Light Plant, for the American Museum of Natural History.

Contract awarded Thomas Cockerill & Son, May 18, 1903, \$184,500.

FOR THE COMPLETION OF THE CONSTRUCTION OF THE UNFINISHED PORTIONS OF THE BUILDING.

LEGAL ENACTMENTS OF 1903.

BY THE BOARD OF ALDERMEN.

AN ORDINANCE providing for an issue of Corporate Stock in the sum of one hundred and eighty-eight thousand dollars (\$188,000), to provide means for the completion of the construction of the unfinished portions of the American Museum of Natural History Building in the Borough of Manhattan.

Be it ordained by the Board of Aldermen of the City of New York, as follows:

SECTION 1. The Board of Aldermen hereby approves of and concurs in the following resolution, adopted by the Board of Estimate and Apportionment May 8, 1903, and authorizes the Comptroller to issue Corporate Stock of the City of New York to the amount and for the purposes therein specified:

Resolved, That, pursuant to the provisions of Section 47 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the issue of Corporate Stock of The City of New York, to an amount not exceeding one hundred and eighty-eight thousand dollars (\$188,000) to provide means for the completion of the construction of the unfinished portions of the American Museum of Natural History Building in the Borough of Manhattan, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue Corporate Stock of The City of New York, in the manner provided by Section 169 of the Greater New York Charter, to an amount not exceeding one hundred and eighty-eight thousand dollars (\$188,000), the proceeds whereof shall be applied to the purposes aforesaid."

Adopted by the Board of Aldermen June 16, 1903, a majority of all the members elected voting in favor thereof.

Approved by the Mayor June 22, 1903. (Signed) P. J. SCULLY, *Clerk*.

Contracts awarded to December 31, 1903.

For the Completion and Construction of Entrance Hall and Toilets, Changes to Elevator, Steam, Water and Electric Works, New Steam Mains and Construction of Rooms for Teachers for the American Museum of Natural History.

Contract awarded Louis Wechsler, November 18, 1903, \$92,500.

FORM OF BEQUEST.

*I do hereby give and bequeath to "THE AMERICAN MUSEUM OF
NATURAL HISTORY," of the City of New York,.....*

.....

.....

THIRTY-SEVENTH ANNUAL REPORT.

To the Trustees and Members of the American Museum of Natural History :

The President submits herewith a report of the affairs of the Museum for the year 1905.

FINANCES.—The financial transactions of the Museum are divided into three separate accounts, and the details of the receipts, expenditures and investments for the year just closed, thus classified, will be found in the Treasurer's Report, pages 39 to 45 inclusive. These accounts and all books and vouchers have been duly examined and certified to by the Audit Company of New York. A few statements may help in making the details of this report clear.

Permanent Endowment.—This fund amounts to \$1,013,000, the same as noted in the last Report. The interest on this sum provides the principal source of income of the General Account, upon which is dependent the purchase of new collections, the maintenance of field parties, the publication of the results of scientific investigations, in short, the general growth of the collections and the continuation and extension of scientific work. It is not sufficient to meet our present needs and an increase of this fund is imperative.

Special Funds.—From time to time friends of the Museum have united their interest in some special researches, explorations or installations, and have provided the means therefor by subscribing to a "special fund." In such cases an officer of the Museum has generally acted as treasurer, and the scien-

HAYES, R. SOMERS	WILSON, WASHINGTON

DEPARTMENT OF PUBLIC INSTRUCTION.—The ill health of Professor Bickmore, who has faithfully and efficiently served the Museum as the head of this department, has incapacitated him for active work. The Trustees, however, were very reluctant to lose his services, and, in order to lighten his duties as much as possible, they appointed him Curator Emeritus, at the same time expressing their hope that from time to time he might be able to take his accustomed place upon the lecture platform.

During the year Professor Bickmore has given four lectures to Members of the Museum and their invited friends, and free lectures to the public on Washington's Birthday and Thanksgiving Day. He has also generously placed his valuable lantern slides at the disposal of the Curators for use in the

children's lectures, and in other ways has shown his continued devotion to the institution with which his life has been identified.

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALÆONTOLOGY.—Several investigators in this branch of science have spent considerable time at the Museum examining the collections, and assistance has been given others by loaning specimens, etc.

Early in the year, the Associate Curator, Dr. Hovey, was granted leave of absence for eleven weeks, in order that he might join an expedition to northwestern Mexico for the purpose of examining the mineral resources of the region. As the region traversed was one entirely new to geologists, Dr. Hovey secured for the Museum 325 specimens of minerals, 425 valuable negatives and data for several scientific papers.

In September, Dr. Hovey was sent to Portland, Oregon, to examine the famous "Willamette" meteorite. While on this mission, he procured valuable series of ores and other economic products from Montana, Colorado, Oregon, Wyoming, Utah, Idaho, California and Alaska, together with series of samples illustrating the separation of platinum, gold and other valuable substances from ocean and river sands.

The Curator has prepared for publication an article "Notice of Jurassic Fossils from Franz Josef Land," and the Associate Curator, besides continuing to have charge of the *Museum Journal*, has published several papers.

A series of instructive models, or relief maps, of the island of Martinique and of the volcano of Mt. Pelé has been prepared by the Department of Preparation and Installation and placed in the exhibition hall. The models represent the volcano at three stages of its history: (a) at the time of its first eruption, May 8, 1902; (b) at the close of the period of its greatest activity, August 30, 1902, and (c) in April and May, 1903, when the marvelous cone and surmounting spine found within the crater were at their maximum development.

DEPARTMENT OF MAMMALOGY AND ORNITHOLOGY.—Several important installations of groups have been finished and others are well under way. The striking Flamingo Group and a group illustrating the bird life of the irrigated portion of the San Joaquin Valley, California, have been completed and opened to the public. Two Bahama bird groups, the White-crowned Pigeon and Ani, have been installed, and considerable work has been done on the Sandhill Crane and Pelican Island groups.

Of mammals, the Mexican Collared Peccary has been completed, and progress has been made in the preparation of the Roosevelt Elk, the big Alaskan Peninsula Bear, Coati, Antelope and Polar Bear groups.

Mr. J. H. Batty has continued to collect in Mexico for the Museum, and has prepared and shipped 1,520 mammal skins and 1,680 bird skins, besides numerous reptiles and invertebrates which have been turned over to the Department of Invertebrate Zoölogy. Most of this material was collected in the State of Jalisco, and includes some very valuable species.

On an expedition to the State of Washington in search of elk, Mr. J. D. Figgins obtained accessories for the Elk Group and specimens and accessories for a Beaver Group. The beaver is particularly interesting as representing a form peculiar to the humid region of the Northwest.

Besides the accessions already noted, special mention should be made of a splendid series of skulls of the Hippopotamus and the Giraffe, the gift of Mr. George S. Bowdoin; 358 mammals and 525 birds, collected in Chiriqui, Panama, the gift of Mr. J. H. Batty, and various specimens of mammals and birds, received in the flesh, through the courtesy of the New York Zoölogical Society and the Central Park Menagerie.

A notable acquisition has been received from Miss M. R. Audubon and Miss Florence Audubon. It comprises several original colored drawings of great value and articles of dress and field equipment belonging to their grandfather, the eminent naturalist and bird lover, John James Audubon. In the collection are many sketches and paintings made by his son, J. W. Audubon.

THE SANDHILL CRANE GROUP.

The funds for collecting and mounting this group were provided by friends of the Museum who have contributed to the North Pacific Ornithological Fund. Background painted by Bruce Horsfall. Birds mounted by Herbert Lang.

The total accessions for the year are 2,172 mammals and 2,420 birds.

The general work of the department has progressed satisfactorily. The cataloguing and identification of the birds collected by Mr. J. H. Batty, and the rearrangement of the study collections of birds have been continued by Mr. Miller under Mr. Chapman's supervision. The index, or systematic catalogue of mammals, is well advanced.

DEPARTMENT OF VERTEBRATE PALÆONTOLOGY.—The most noticeable event in the work of this department was the completion of the installation of the great amphibious Dinosaur, *Brontosaurus*, discovered near Medicine Bow, Wyoming, by the Museum Expedition of 1898, and collected during the summer of 1899. This gigantic reptile is nearly 70 feet in length and over 15 feet in height; it occupies the center of the new Hall of Fossil Reptiles. The *Brontosaurus* has attracted a great deal of attention in the press, and has proved to be one of the most interesting exhibits in the Museum. Other noteworthy installations have been the skeletons of *Diplodocus*, a long-limbed Dinosaur; *Ornitholestes*, a small "bird-catching" Dinosaur; *Stegosaurus*, an armored herbivorous Dinosaur; *Hadrosaurus*, a duck-billed herbivorous Dinosaur; *Allosaurus*, a bipedal carnivorous Dinosaur; also of the great skull of *Triceratops*, a three-horned herbivorous Dinosaur, and finally of portions of the skeleton of *Tyrannosaurus*, a newly-discovered carnivorous and bipedal Dinosaur of immense size. The fine exhibit of fossil turtles and tortoises, occupying two alcoves in the Dinosaur Hall, is now nearly complete.

The mounting of the splendid mammoth skeleton from Indiana is nearing completion. This fine skeleton is a most important addition in filling in the gaps in our series of fossil mammal skeletons, and will make a striking centerpiece for the hall. It is a mammoth of the largest size, standing fully 13 feet high, considerably exceeding the skeleton in the St. Petersburg Museum, and quite as large as the skeleton in the Paris Museum. The skeleton of a four-toed horse, obtained in the Bridger Basin last summer, is being prepared. This will give

us the Middle Eocene stage in the evolution of the Horse, intermediate between the Lower Eocene and Oligocene horse skeletons now on exhibition.

The field explorations have yielded several important accessions. The Harriman expedition to Bone Cabin Quarry succeeded in obtaining a considerable part of the skeleton of another of the small Dinosaurs of the Jurassic Period. These reptiles are as yet incompletely known, but probably they were characteristic animals of the dry land during the Age of Reptiles.

The expedition to the Cretaceous of Montana was a very successful one. By dint of extensive and heavy quarrying the greater part of the skeleton of the giant carnivorous Dinosaur, *Tyrannosaurus*, was obtained.

From the Bridger Basin was obtained a number of specimens of which the most important is a mountable skeleton of the four-toed horse, *Orohippus*. Three years of exploration in this basin, the richest locality in this country for fossil vertebrates of the Eocene period, have added to our collections a splendid series of skulls and skeletons, especially of the smaller species hitherto very imperfectly known.

DEPARTMENT OF ANTHROPOLOGY.—Considerable progress has been made in cataloguing the new collections received during the year and also several not previously catalogued.

The problem of storing duplicate and study specimens has been a difficult one. Early in the fall the rooms vacated by the Department of Preparation and Installation were assigned to this department and were equipped with a number of large storage cases. This additional room has made it possible to classify a large amount of material and to arrange it satisfactorily.

The time of Dr. Clark Wissler, the Acting Curator, has been taken up with the routine duties of his office, the care of the exhibition halls and the general supervision of the work of the department. He has continued his investigations of the ethnology of the Plains Indians, giving special attention to their material culture, and in addition, he is engaged in a

general ethnographic survey of North America, in order to determine the limits of the different culture areas.

In January, Dr. Farrand resigned as Associate Curator in order to accept the executive secretaryship of the National Association for the Study and Prevention of Tuberculosis. While we extend our heartiest congratulations to Dr. Farrand on his new appointment, we feel the keenest regret that the Museum has lost the services of an efficient officer.

Dr. Laufer, Mr. Pepper and Mr. Bandelier have made progress in their respective departments.

The field work has yielded good results. Dr. William Jones is now visiting the Ojibway Indians, where he is studying their religious and industrial life. Dr. P. E. Goddard has secured important data among the Sarcee Indians, a tribe living upon the border between the plains and the forest and presenting two types of culture. Mr. Edward Sapir has made a small collection at the Yakima Indian Reservation. Mr. Frank G. Speck has been working among the Uchee Indians. Miss Constance G. DuBois has been doing volunteer work among the Mission Indians. J. B. Walker, M.D., is continuing his volunteer work among the Dakota. Mr. D. C. Duvall has added materially to our Blackfoot collections.

Perhaps the most important accession received has been the extensive and valuable collection, illustrating the ethnology of the Philippine Islands, which was secured at St. Louis and presented to the Museum by the President.

Other notable accessions are extensive African collections, the gift of Mr. George S. Bowdoin; a unique "mummy" from South America, presented by Mr. J. Pierpont Morgan; a large collection of baskets and ceremonial objects, by Mr. Adolph Lewisohn; a number of valuable Indian specimens, by Mrs. Albert Bierstadt, and a fine collection of Socorro pottery by Mr. George G. Heye.

Through the generosity of Mr. George Foster Peabody, Mr. Robert C. Ogden and Mr. Arthur Curtiss James, the Museum has received a valuable oil painting, entitled, "The Song of the Innookshuee." The painting was made in 1894, by Mr. F. W. Stokes, while in Greenland with Commander

Peary. In accordance with the wish of the donors it has been placed in the Library, where it may be seen by the public.

MEXICAN AND CENTRAL AMERICAN ARCHÆOLOGY.—Through exchanges with other institutions, material has been received which greatly strengthens the Museum's exhibit of Mexican archæology, largely given us by the Duke of Loubat. The rearrangement of the collections in the Mexican Hall has been continued with a view to bringing out the distinction between the different cultures of Mexico, South Central America and Panama.

The most important work done, however, was the painting of the cast of the sculptured side of a room in the ruins of Chichen Itza, Yucatan. Through the assistance of Miss Adela Breton, of England, we are able to show the painting of the sculptures as they probably appeared in ancient times. This painting has brought out the figures to a remarkable extent and has added a great deal of interest to the cast.

JESUP NORTH PACIFIC EXPEDITION.—Since May, Professor Boas has paid particular attention to the publication of the results of this expedition. The memoirs are being printed by E. J. Brill, of Leiden, and the following parts were issued during 1905:

Vol. III, Part III. "Kwakiutl Texts." By Franz Boas and George Hunt.

Vol. V, Part I. "Contributions to the Ethnology of the Haida of Queen Charlotte Islands." By John R. Swanton.

Vol. VI, Part I. "Religion and Myths of the Koryak." By Waldemar Jochelson.

In connection with the researches among the North American Indians, Professor Boas has discussed the anthropometric material collected by Dr. Dixon and others on expeditions to California. This paper was published as Part IV of Volume XVII of the *Bulletin*. Dr. Dixon has prepared the

THE GEM HALL.

New installation of gems and precious stones.

manuscript of the description of the Shasta, which, as Part V, will close Volume XVII.

EAST ASIATIC COMMITTEE.—During the past year the field work was concluded and Dr. Laufer has devoted his time to the classification and arrangement of the Chinese collection, and to his researches on the collection of ancient Chinese pottery. His manuscript on the pottery of the Han period is practically completed. To assist him in his studies, Dr. Laufer has made use of several collections of Chinese pottery belonging to art collectors, generously loaned to him for the purpose, and in this connection we wish especially to acknowledge the courtesies extended by Mr. Marsden J. Perry, of Providence, R. I., and Mr. Thomas B. Clarke and Mr. R. H. Williams, of New York City.

DEPARTMENT OF ENTOMOLOGY.—Good progress has been made in rearranging the collections and in installing new exhibits. Of special mention are specimens representing six races of the honey-bee; a series of queen cells; some unusual forms of comb of the domesticated honey-bee, built on branches of trees, and wax models of certain insect-galls.

There are now on exhibition 22,600 specimens of insects, nevertheless much is yet to be added to bring the collection up to a proper standard of completeness and usefulness.

The Curator has procured 1,800 insects, which he has mounted in sixty cases for circulation in the public schools. Each case illustrates the life-history of the cecropia moth, development of the monarch butterfly, life and work of the honey-bee, and common household pests.

Arrangements have been made with the following experts for the identification of special groups of insects, and their assistance is gratefully acknowledged:

- Mr. Otto Heidemann..... Washington, D. C.
- Mr. E. P. Van Duzee..... Buffalo, N. Y.
- Prof. H. Osborn..... Columbus, O.
- Prof. P. R. Uhler..... Baltimore, Md.
- Dr. W. H. Ashmead..... Washington, D. C.

Mr. Nathan Banks.....	East Falls Church, Va.
Mr. Alexander D. MacGillivray..	Ithaca, N. Y.
Mr. E. S. G. Titus.....	Washington, D. C.
Dr. W. G. Dietz.	Hazleton, Pa.
Mr. E. A. Schwarz.....	Washington, D. C.
Prof. A. D. Hopkins.....	Washington, D. C.
Mr. W. Fiske.....	Washington, D. C.
Mr. H. L. Viereck.....	Philadelphia, Pa.
Mr. A. P. Morse.....	Wellesley, Mass.
Prof. James G. Needham.....	Lake Forest, Ill.
Dr. F. C. Paulmier.....	Albany, N. Y.
Prof. P. P. Calvert.....	Philadelphia, Pa.
Mr. James A. G. Rehn.....	Philadelphia, Pa.

DEPARTMENT OF MINERALOGY AND CONCHOLOGY.—The attractiveness of the Morgan Gem Collection continues and has been increased by giving it more commodious quarters and by installing it in more appropriate cases. The entire room has been assigned to gems and to the more striking minerals. Large showy specimens have been placed in the wall cases in such a way as to bring out their beauty to the best advantage. Appropriate labels are being prepared, and in a few weeks the installation will have been completed.

Again we are indebted to Mr. J. Pierpont Morgan for his generosity in adding nearly two hundred specimens to this already priceless collection.

The income from the Bruce Fund has made possible the purchase of a number of desirable minerals, among which may be mentioned twenty-eight specimens of amber and a jade labret of remarkable character.

One of the notable acquisitions during the year was a very large number of miscellaneous shells from the Philippine Islands, which formed part of the Philippine exhibit at St. Louis secured by the Museum. With the aid of these shells, many lacunæ in the collection have been filled.

DEPARTMENT OF INVERTEBRATE ZOÖLOGY.—During the early part of the year a card catalogue of the fishes was taken up and the study collections cleaned and carefully rearranged.

Considerable work has been done in the Synoptic Hall, which is now also used as temporary quarters for the mounted collection of reptiles and batrachians. Groups of the following forms have been mounted and placed in this hall: Land-crabs of the Bahamas, Copperhead Snakes, Mexican Iguana, Mexican Heloderma, and Texas Rattlesnakes. Two collections representing the local reptiles and amphibians have also been installed. These latter were brought together to illustrate two guide leaflets, written by R. L. Ditmars, of the New York Zoölogical Park, and published by the Museum.

Dr. Dahlgren and Mr. Mueller have constructed twelve models of marine and fresh-water invertebrates, nearly completing the series of Cœlenterate types and making an important addition to the Rotiferan and Polyzoan alcoves, which hitherto have been almost empty. Descriptive labels of the new groups have been completed.

Among a number of important acquisitions, special mention should be made of a fine series of Philippine corals, a magnificent sea-fan and two enormous *Tridacna* shells, all purchased by the Museum.

During May, Dr. Wheeler, the Curator, made an expedition to New Mexico, Arizona and California for the purpose of studying the invertebrate fauna and the vegetation of the desert. The nesting habits of several interesting species were observed for the first time, and valuable photographs of nest architecture, characteristic desert environment, etc., were secured.

The Assistant Curator, Mr. Sherwood, has given all of his time to superintending and making up the school collections and organizing and participating in the lectures to the school children at the Museum. The small nature-study collections which the Museum loans to the public schools of the City proved so useful to teachers, and the demand for them was so great, that it was found necessary to increase their number. During the summer more than 600 bird skins were purchased and mounted, and new collections of insects and woods were prepared. At the present time there are 400 cabinets of specimens available for this work, representing birds, insects, mollusks, crabs, starfishes, worms, corals, sponges and native

woods. During the school year, ending June 30, 1905, these cabinets were in use in 200 schools and were studied by more than 375,000 children. These specimens are used by the teachers not only for pure nature-study work, but as models for drawing lessons, written and oral language work, conversation lessons, dictation exercises and in connection with reading.

Continuing the work inaugurated last year, a spring and a fall course of informal lectures for school children have been delivered at the Museum by members of the scientific staff. There were thirty-six lectures in each course, a detailed list of which will be found on page 33. The lectures were given on Monday, Wednesday and Friday afternoons and were very popular. More than 20,000 pupils attended the spring series, and fully 15,000 were present during the fall course.

An unusual number of classes has visited the Museum for purposes of study, and frequently teachers have asked to have the classrooms reserved, in order that they might give their pupils special lectures.

At the request of a number of teachers and principals of West Side schools, a laboratory course on birds and insects was arranged for teachers, and Mr. Jules M. Johnson, of the Morris High School, was engaged to conduct it. About 50 teachers attended.

It is gratifying to report the increased use in this manner of the Museum's collections, and the continued friendly relations which exist between this institution and the various branches of the school system of the City.

DEPARTMENT OF PHYSIOLOGY.—By an arrangement made early in the year, this department has had under its direction the care of the animals received at the Museum and the preparation of skeletons. Dr. C. W. Muenchehofe has had immediate charge of this work and has personally performed most of the autopsies.

More than two hundred animals have been received in the flesh, as noted in the list of accessions; sixty autopsies have been performed, and eighty-one complete skeletons and twenty-three skulls have been prepared.

CRESTED CASSIQUE GROUP.

The funds for collecting and mounting this group were provided by friends of the Museum who have contributed to the North American Ornithological Fund.

Birds mounted by Herbert Lang. Group prepared by J. D. Figgins.

The preparation of skeletons by the old process is very slow, several weeks being required to complete a single skeleton. This method is entirely inadequate to take care of the material received. After many experiments, the department has adopted a process of digestion with trypsin in an alkaline solution, which is not only a rapid method but leaves the bones in a perfectly sweet condition as well as avoiding many of the injuries, particularly to small bones, which occur by maceration. This work is greatly hampered, however, by the lack of proper equipment and suitable quarters.

Satisfactory progress has been made in the preparation of corrosion specimens of the various organs of the animal body.

A part of the room west of the Mexican Hall has been allotted to the department for exhibition purposes. A general plan of installation has been tentatively formulated, illustrating the chemical constitution of man and the various functions performed by the different organs of the body. Some of the material for this exhibit is well under way.

Dr. George W. Cray, a well-known specialist of this City, has given to the department the benefit of his wide experience and is making a comparative histological study of the skin of vertebrates. It is expected that from these preparations wax models can be constructed which will be valuable for Museum exhibition.

We are pleased to acknowledge the many courtesies extended to the Museum by the Director of the Aquarium, the Director of the New York Zoölogical Society and the Director of the Central Park Menagerie.

DEPARTMENT OF PREPARATION AND INSTALLATION.—The members of this department have been fully occupied. A large number of models of invertebrates have been completed, the accessories for several bird and mammal groups have been prepared, and installations of these have been made, as noted under the various departments. The making of casts and the general photographic work for the Museum have been under the direction of this department.

During the summer the laboratories in the new power wing were completed and the equipment was transferred in September to the new quarters. These rooms are commodious and well adapted to the needs of the department.

Several of those working under Dr. Dahlgren were transferred to Mr. J. D. Figgins, who now has general charge of the preparation of the higher animals and of plants for exhibition purposes, and the making of archæological models and replicas. Mr. James L. Clark has been placed in charge of the mounting of all large mammals and reptiles.

DEPARTMENT OF BOOKS AND PUBLICATIONS.—The energies of the department have been especially devoted to cataloguing, and this important work is now completed for the entire Library, with the exception of a few sections. During the year 4,948 volumes, 871 numbers, and 9,128 pamphlets have been classified and catalogued. These, added to the work previously completed, give the Library a total of 32,014 volumes and 16,584 pamphlets properly classified, catalogued and ready for use.

The more important accessions for the year are a gift from Professor J. A. Allen of 3,793 pamphlets; a gift from Dr. William M. Wheeler of many articles on entomology; a gift from Mr. J. Pierpont Morgan of seven volumes of plates of the fishes from the island of Mauritius; a purchase of 700 plates on Animal Locomotion by Muybridge; a gift of 218 volumes from the estate of the late George L. Hyslop; a gift from Miss A. A. Drummond of 24 volumes; and a gift from General J. Watts de Peyster of 15 volumes.

During the year, 15,069 cards from the Concilium Bibliographicum have been received and distributed in the Concilium System. There has also been received on deposit one complete set of cards, to which have been added 15,069 cards during the year, according to the agreement between the American Museum and the Concilium Bibliographicum.

Following is a list of the scientific publications of the Museum issued in 1905, as received by the Curator for distribution and exchange:

A RADIOLARIAN.

Model in glass representing silicious skeleton of a radiolarian, a minute animal found in the tropical Atlantic. Prepared at the Museum,

DEPARTMENT OF INVERTEBRATE ZOOLOGY.

Bulletin, Volume XXI.

- W. M. Wheeler. "An Interpretation of the Slave-Making Instincts in Ants." (Pages 1-16.)
- W. M. Wheeler. "The Ants of the Bahamas, with a List of the Known West Indian Species." (Pages 79-135, plate vii, with 23 text figures.)
- W. M. Wheeler. "New Species of *Formica*." (Pages 267-274.)
- W. M. Wheeler. "The North American Ants of the Genus *Dolichoderus*." (Pages 305-319, plates xii and xiii.)
- W. M. Wheeler. "The North American Ants of the Genus *Liometopum*." (Pages 321-333, with 3 text figures.)
- W. M. Wheeler. "An Annotated List of the Ants of New Jersey." (Pages 371-403, with 4 text figures.)
- W. M. Wheeler. "Worker Ants with Vestiges of Wings." (Pages 405-408, plate xiv.)

The American Museum Journal, Volume V, published in four numbers, with the following Guide Leaflets:

W. D. Matthew. "The Fossil Carnivores, Marsupials and Small Mammals in The American Museum of Natural History." (Leaflet No. 17, January, pages 1-41, with 27 text figures.)

W. D. Matthew. "The Mounted Skeleton of *Brontosaurus* in The American Museum of Natural History." (Leaflet No. 18, April, pages 1-12, with 4 text figures.)

R. L. Ditmars. "The Reptiles of the Vicinity of New York City." (Leaflet No. 19, July, pages 87-140, with 47 text figures.)

R. L. Ditmars. "The Batrachians of the Vicinity of New York City." (Leaflet No. 20, October, pages 155-206, with 28 text figures.)

DEPARTMENT OF MAPS AND CHARTS.—The classification and rearrangement of the maps and charts have been continued. Large fire-proof cases for storage have been constructed and equipped to receive the frames to which the maps are bound.

Contributions to this department have been received from General J. Watts de Peyster, Dr. H. C. Bumpus, Professor Henry F. Osborn and Mr. F. W. Bauer. The accessions have been:

By Donation.....	Atlases 4.....	Maps 631.....	Charts 3

ATTENDANCE.—It is gratifying to report the unusually large increase in the number of visitors to the Museum. The attendance for 1904 was 402,449, a considerable gain over that of previous years, but during 1905, 565,489 visitors were recorded, an increase of more than 25% over the figures for 1904. This growing popularity of the Museum is due in part to the opening of several striking exhibits, particularly the huge *Brontosaurus*, and the Flamingo and San Joaquin Valley bird groups; to the improvement of the installation of old collections, and to the continued intimate relations between the Museum and the Public Schools. More than 46,000 children have visited the Museum in classes for lectures and

purposes of study, and about 50,000 people have been present at the various public lectures.

ASSOCIATED SOCIETIES AND ORGANIZATIONS.—The two small assembly rooms have been improved by changes remedying, in a great measure, their defective acoustic properties, and throughout the year they have been in great demand for the meetings of various scientific societies which have sought affiliation with the Museum. Occasionally the large auditorium has been required for the accommodation of such organizations.

Early in the year the Board of Education of the City asked permission for the temporary use of one of the exhibition halls in which to install the collections illustrating the work done in the public schools, and comprising the exhibit of the Board at the St. Louis Exposition. This was desired in order that the public might become more familiar with the work that the schools are doing, and that the teachers might have an opportunity to study the methods and results of others. The East Mammal Hall was assigned for this purpose and was occupied by the school exhibit from March till August.

In November the Siberian Hall was given over to the American Tuberculosis Exhibition for the display of an instructive exhibit showing the results of the dread disease and the best methods to check its spread. In connection with the exhibition eminent men delivered lectures at the Museum on various phases of this important subject. The Board of Health of the City was given permission to use one of the small assembly rooms for the temporary installation of its exhibit at the St. Louis Exposition.

The following societies and classes have shared the hospitality of the Museum during the past year:

- New York Academy of Sciences.
- New York Entomological Society.
- Linnæan Society of New York.
- New York Mineralogical Club.
- Audubon Society of the State of New York.
- National Association of Audubon Societies for the Protection of Wild Birds and Animals.
- American Chemical Society.

MEXICAN IGUANA.

Large crested tropical lizard, often growing to a length of five or six feet. Mounted at the Museum.

Germanistic Society of America.
Torrey Botanical Club.
Sequoia League.
American Ethnological Society.
West Side Natural History Society.
American Ornithologists' Union.
American Psychological Association, New York Section.
American Tuberculosis Exhibition.
American Society of Palæontologists.
Natural Science Committee of the Associated Alumnae of the Normal
College, New York City.
Classes in Palæontology of Columbia University.
Classes of Teachers in Nature Study, University Extension.
Classes from School of Decorative and Applied Art.

TRANSPORTATION.—The increase of the scope of the Museum's work necessitates extended explorations. These explorations are too often limited in their results, especially in distant fields, because of the difficulties of transporting the material secured. The generous aid, however, of various railways in granting passes to our curators and assistants to and from their distant fields of explorations and in carrying the collections at reduced rates has made possible field operations which otherwise would not have been undertaken, and I wish to acknowledge our indebtedness to these companies. The following have extended many courtesies to us during the past year:

Atchison, Topeka and Santa Fe Railway.
Canadian Northern Railway.
Canadian Pacific Railway.
Chicago, Burlington & Quincy Railway.
Chicago, Milwaukee & St. Paul Railway.
Chicago & Northwestern Railway.
Erie Railroad.
Great Northern Railway.
Northern Pacific Railway.
Oregon Railroad & Navigation Company.
Oregon Short Line Railroad.
Pennsylvania Railroad.
Southern Pacific Company.
Union Pacific Railroad.
Wabash Railroad.

LECTURES.—Several lecture courses have been delivered during the year. These include (1) a spring and a fall course to Members of the Museum, (2) a public course given on holidays, (3) a course given in conjunction with Columbia University, (4) a spring and a fall course to pupils of the public schools, (5) a nature study course to teachers, (6) a course under the auspices of the Board of Education of the City of New York, in coöperation with the Museum.

LECTURES TO MEMBERS.

Members of the scientific staff of the Museum delivered the following lectures:

January	5.—Mines, Quarries and "Steel Construction"	Louis P. Gratacap
"	12.—Western Holland—Middleburg to Helder,	Prof. Albert S. Bickmore
"	19.—Eastern Holland—Utrecht to Groningen,	Prof. Albert S. Bickmore
February	2.—The Traveling Indian Medicine Men of Bolivia. A. F. Bandelier	
"	9.—Religious and Ceremonial Life of the North American Indians	Dr. Livingston Farrand
"	16.—Ruins of Mayan Cities in Central America,	Prof. Marshall H. Saville
"	23.—Explorations in the Southwest and in Mexico during 1904.	George H. Pepper
March	2.—The Game and Food Fishes of Our Atlantic Coast,	George H. Sherwood
"	9.—The Habits of Ants.	Dr. William Morton Wheeler
"	16.—Northern Germany—Bremen, Hamburg and Lubeck,	Prof. Albert S. Bickmore
"	23.—Southern Germany—Stuttgart, Nuremberg and Rothenburg.	Prof. Albert S. Bickmore
November	9.—The Bird Life of Florida.	Frank M. Chapman
"	16.—Newfoundland: Its Scenery and People.	Louis P. Gratacap
"	23.—Northern Mexico: Its Deserts, Plateaus and Canyons,	Dr. Edmund Otis Hovey
December	7.—The Museum's Rocky Mountain Explorations of 1905,	Prof. Henry Fairfield Osborn
"	14.—The Philippines—Manila.	Prof. Albert S. Bickmore
"	21.—The Philippines—Luzon	Prof. Albert S. Bickmore

PUBLIC LECTURES ON HOLIDAYS.

New Year's Day, January 2.—What the Lover of Nature may find in our City Parks	Louis P. Gratacap
Washington's Birthday, February 22.—Holland.	Prof. Albert S. Bickmore

Thanksgiving Day, November 30.—Antwerp, Brussels and Waterloo,
 Prof. Albert S. Bickmore
 Christmas Day, December 25.—Northern Mexico : Its Deserts, Plateaus
 and Canyons.....Dr. Edmund Otis Hovey

COLUMBIA UNIVERSITY LECTURES.

In Coöperation with the Museum.

A course of six lectures by Professor Henry Fairfield Osborn was given in coöperation with Columbia University, as follows:

- February 1.—The Horse as an Animal Mechanism.
- “ 6.—The Horse in Relation to the Idea of Evolution.
- “ 8.—The Fossil History of the Horse, especially in North America.
- “ 13.—The Fossil History of the Horse, continued.
- “ 15.—Existing Races of Horses, Asses and Zebras.
- “ 20.—Probable Origin of the Domesticated Breeds of Horses.

LECTURES FOR CHILDREN.

A spring and a fall course of lectures were given for pupils of the public schools and for the children of Members on Monday, Wednesday and Friday afternoons at four o'clock, as follows:

- March 6,*April 3* and May 8. —Russia and Japan,
 Dr. Edmund Otis Hovey
- “ 8, April 5 and May 10. —The Capitals of Europe,
 Dr. Ralph W. Tower
- “ 10, April 7 and May 12. —The Industries of the United States,
 George H. Sherwood
- “ 13, April 10 and May 15.*—The American Indian, Harlan I. Smith
- “ 15, April 12 and May 17. —In Polar Regions. .George H. Pepper
- “ 17, April 14 and May 19. —Spanish America, George H. Sherwood
- “ 20,*April 24* and May 22. —The Physical Divisions of the
 United States.....Dr. Edmund Otis Hovey
- “ 22, April 26 and May 24. —Egypt and Her Neighbors,
 Dr. William Morton Wheeler
- “ 24, April 28 and May 26. —Our Island Possessions,
 George H. Sherwood
- “ 27, and May 1 and 29.—Methods of Transportation, Past
 and PresentHarlan I. Smith

*On account of Dr. Hovey's absence from the City, the lectures on March 6 and April 3 were given by Mr. George H. Sherwood, and those on March 20 and April 24 by Mr. Barnum Brown. Mr. George H. Pepper delivered the lecture on May 15, owing to the illness of Mr. Harlan I. Smith.

March	31, May 5 and June 2.—New York City, Past and Present,	Louis P. Gratacap
May	3 and 31.—The Work of Water.....	Dr. Edmund Otis Hovey
October	16, November 13 and December 11.—A Tour of Our Philippine Possessions.....	George H. Sherwood
"	18, November 15 and December 13.—Methods of Transportation, Past and Present.....	Harlan I. Smith
"	20, November 17 and December 15.—A Trip through Mexico to Panama.....	Prof. Marshall H. Saville
"	23, November 20 and December 18.—Life Among Our Indians.....	George H. Pepper
"	25, November 22 and December 20.—City Bird Life,	Frank M. Chapman
"	27, November 24 and December 22.—The Industries of the United States.....	George H. Sherwood
"	30, and November 27.—The Development of New York City	Louis P. Gratacap
November	1 and 29.—The Work of Water.....	Dr. Edmund Otis Hovey
"	3.—Travels through Western Europe and British Isles,	R. W. Miner
"	6 and December 4.—The Physical Divisions of the United States.....	Dr. Edmund Otis Hovey
"	8 and December 6.—Our South American Neighbors..	C. W. Mead
"	10 and December 8.—In the Nile Country.....	R. W. Miner

BOARD OF EDUCATION LECTURES.

In Coöperation with the Museum.

These lectures were given on Tuesday and Saturday evenings. The Tuesday evening lectures were on geographical subjects; the Saturday evening lectures consisted of several courses more technical in character.

Tuesday Evenings.

January	3.—India: Life, Religion and Art of the Hindus,	Prof. Walter S. Perry
"	10.—India under the Great Mohammedan Conquerors; The Taj Mahal.....	Prof. Walter S. Perry
January	17.—Spain of To-day, and the Alhambra, The Fairy Palace of Moorish Art.....	Prof. Walter S. Perry
"	24.—Ceylon, "The Pearl of India"; and Chinese Cities,	Prof. Walter S. Perry
"	31.—Japan: The Life and Customs of Her Remarkable People.....	Prof. Walter S. Perry

CORMORANT GROTTO.

The funds for collecting and mounting this group were provided by friends of the Museum who have contributed to the North American Ornithological Fund.
Background painted by Charles J. Hittell. Birds mounted by Herbert Lang.

February	7.—Korea and Manchuria : The Land of the Morning Calm and the Gibraltar of China.....	Dr. John B. Devins
"	14.—The Real Filipino.....	Arthur Stanley Riggs
"	21.—Hawaii	Roland S. Dawson
"	28.—Around the Historic Mediterranean.....	Lewis Gaston Leary
March	7.—Venice of the Golden Ring.....	Gerhardt C. Mars
"	14.—Vesuvius and the Bay of Naples.....	Prof. Henry E. Northrop
"	21.—Travels in Greece.....	Dr. Clarence H. Young
"	28.—Wales and Her People	Henry H. Parry
April	4.—Scotland.....	Peter MacQueen
"	11.—Castles and Palace Homes of England... Prof. Sutton Fletcher	
"	18.—The Cathedrals and Abbeys of Britain... Prof. Sutton Fletcher	
"	25.—The St. Louis Exposition	Roland S. Dawson
October	3.—Sweden and Denmark.....	Frederick E. Partington
"	10.—Norway.....	Frederick E. Partington
"	17.—Japrusa (A comparative study of Japan and Russia), Dr. John C. Bowker	
"	24.—Imperial Austria.....	Frederick E. Partington
"	31.—Dolomite Alps and Southern Tyrol... Frederick E. Partington	
November	7.—A Tramp through Switzerland.....	E. Clowes Chorley
"	14.—The Rhine and the Black Forest	Prof. Henry Zick
"	21.—Imperial Berlin.....	Prof. Henry E. Northrop
"	28.—The Dutch at Home and their Grand Story, Dr. William E. Griffis	
December	5.—Social, Artistic and Literary Holland... Dr. William E. Griffis	
"	12.—Paris, City of Light.....	Ernest R. Holmes
"	19.—How France is Governed.....	Ernest R. Holmes

Saturday Evenings.

A course of eight lectures on "Electricity," by Professor Charles L. Harrington.

January	7.—Magnetism.
"	14.—Statical Electricity.
"	21.—Statical Electricity.
"	28.—Dynamical Electricity.
February	4.—Dynamical Electricity.
"	11.—Dynamical Electricity.
"	18.—Wireless Telegraphy.
"	25.—Roentgen Rays ; Becquerel Rays.

A course of eight lectures on "Sound and Music," by Professor E. R. von Nardroff.

March	4.—Nature of Sound.
"	11.—Musical Tone and Stringed Instruments.
"	18.—Sympathetic Tone and Musical Timbre.

- March 25.—Simple Wind Instruments.
 April 1.—Reed Wind Instruments.
 “ 8.—Miscellaneous Musical Instruments.
 “ 15.—Sound Waves and Musical Harmony.
 “ 22.—Telephone and Phonograph.

A course of six lectures on “Evolution,” by Professor Samuel C. Schmucker.

- October 7.—A Master Mind. (An account of the life and work of Charles Darwin.)
 “ 14.—His Master Idea. (Natural Selection.)
 “ 21.—Down Through the Past. (The Geological History.)
 “ 28.—What a Chicken can teach Us. (An account of embryology and domestication.)
 November 4.—The Humming Bird’s History. (The evolution of a bird.)
 “ 11.—The Flower’s Best Friend.

A course of three lectures on “The Industries of Animals,” by Professor Charles L. Bristol.

- November 18.—Hunting and Fishing.
 “ 25.—Methods of Defence and Care of Young.
 December 2.—Construction of Dwellings.

A course of three lectures on “Forestry,” by Miss Grace E. Cooley.

- December 9.—How the Forests pay their Rent.
 “ 16.—The Struggle for Existence from the Standpoint of a Tree—
 Ingenious Methods of Winning Success.
 “ 23.—Forestry and the Citizen.

In concluding this my quarter of a century of service as the President of the American Museum of Natural History, I cannot refrain from referring to the Report of twenty-five years ago, when the Trustees stated that “they most respectfully appeal to the generous citizens of New York, to aid in the effort to make our Metropolitan City the centre of the highest scientific culture in our land, and to join in adding new collections and new departments to the admirable nucleus which has been already secured.” As your President it has been my constant effort to fulfil the desires as expressed by the

Trustees which were so clearly formulated at the time of my appointment, and when we view the stately building in Manhattan Square, when we wander through the exhibition halls and study the priceless collections therein displayed, when we realize that thousands of the people of our City are assembling here to listen to prominent educators, that school children are here receiving their first love for nature and their first taste of science, and that the influence of this institution is being felt throughout the civilized world, truly we can say that the appeal of 1881 to the generous citizens of New York has not remained unanswered.

Very respectfully yours,

MORRIS K. JESUP, *President.*

CHARLES LANIER, *Treasurer.*

[E. & O. E.]
NEW YORK, December 31, 1905.

LIST OF ACCESSIONS, 1905.

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALÆONTOLOGY.

BY GIFT.

PROF. N. L. BRITTON, New York City.

- 3 Specimens of *Chama macrophylla* from Berry Islands, Bahamas.
- 8 Species of corals and shells from Lignum Vitæ Key, Berry Islands, Bahamas.
- 5 Valves of *Chama*, and group of several.
- 1 *Arca*, 1 *Pectunculus*, 1 *Hipponyx*.
- 1 Fragment of *Diploria cerebriformis*.
- 2 *Dichocania porcina* from Goat Key, Berry Islands, Bahamas.
- 5 *Lucina aurantia*, 1 valve and 1 group of *Chama*, 2 undetermined shells from Great Bahamas.

R. S. BROOKS, El Paso, Texas.

- 10 Specimens of ores from Mulatos, Sonora, Mexico.

J. H. CHASE, Buffalo, N. Y.

- 1 Small specimen of *Septaria* from Lake regions of New York.

COPPER QUEEN CONSOLIDATED MINING COMPANY, Bisbee,
Arizona.

- Specimens of ores.

D. W. FURGUSON, Staten Island, N. Y.

- 1 *Trigonia thoracica*.

STANDARD PLUNGER ELEVATOR COMPANY, New York City.

- 12-inch drill-core through garnetiferous gneiss, from Trinity Building, N. Y.

THOMAS H. GEE, New York.

INCORPORATION.

AN ACT

TO INCORPORATE THE

AMERICAN MUSEUM OF NATURAL HISTORY,

Passed April 6, 1869.

The People of the State of New York, represented in Senate and Assembly, do enact as follows :

SECTION 1. John David Wolfe, Robert Colgate, Benjamin H. Field, Robert L. Stuart, Adrian Iselin, Benjamin B. Sherman, William A. Haines, Theodore Roosevelt, Howard Potter, William T. Blodgett, Morris K. Jesup, D. Jackson Steward, J. Pierpont Morgan, A. G. P. Dodge, Chas. A. Dana, Joseph H. Choate and Henry Parish, and such persons as may hereafter become members of the Corporation hereby created, are hereby created a body corporate, by the name of "The American Museum of Natural History," to be located in the City of New York, for the purpose of establishing and maintaining in said city a Museum and Library of Natural History; of encouraging and developing the study of Natural Science; of advancing the general knowledge of kindred subjects, and to that end of furnishing popular instruction and recreation.

SEC. 2. Said Corporation shall have power to make and adopt a Constitution and By-Laws, and to make rules and regulations for the admission, suspension and expulsion of its members, and their government, the number and election of its officers, and to define their duties, and for the safe keeping of its property, and, from time to time, to alter and modify such Constitution, By-Laws, Rules and Regulations. Until

an election shall be held pursuant to such Constitution and By-Laws, the persons named in the first section of this Act shall be, and are hereby declared to be, the Trustees and Managers of said Corporation and its property.

SEC. 3. Said Corporation may take and hold by gift, devise, bequest, purchase or lease, either absolutely or in trust, for any purpose comprised in the objects of the Corporation, any real or personal estate, necessary or proper for the purposes of its incorporation.¹

SEC. 4. Said Corporation shall possess the general powers, and be subject to the restrictions and liabilities, prescribed in the Third Title of the Eighteenth Chapter of the First Part of the Revised Statutes.

SEC. 5. This Act shall take effect immediately.

STATE OF NEW YORK, }
OFFICE OF THE SECRETARY OF STATE. } ss.:

I have compared the preceding with the original law on file in this office, and do hereby certify that the same is a correct transcript therefrom, and of the whole of said original law.

[L. s.] Given under my hand and seal of Office at the City of Albany,
this fourteenth day of April, in the year one thousand
eight hundred and sixty-nine.

D. WILLERS, Jr., *Deputy Secretary of State.*

¹ As amended by Chapter 303, Laws of 1898, of the State of New York, entitled "An Act to amend chapter one hundred and nineteen, laws of eighteen hundred and sixty-nine, entitled 'An Act to incorporate the American Museum of Natural History,' relative to its charter."

CONTRACT

WITH THE DEPARTMENT OF PUBLIC PARKS

FOR THE OCCUPATION OF THE NEW BUILDING.

THIS AGREEMENT, made and concluded on the twenty-second day of December, in the year one thousand eight hundred and seventy-seven, between the DEPARTMENT OF PUBLIC PARKS OF THE CITY OF NEW YORK, the party of the first part, and the AMERICAN MUSEUM OF NATURAL HISTORY, party of the second part, witnesseth:

Whereas, by an Act of the Legislature of the State of New York, passed April 22d, 1876, entitled "An Act in relation to the powers and duties of the Board of Commissioners of the Department of Public Parks, in connection with the American Museum of Natural History, and the Metropolitan Museum of Art," the said party of the first part is authorized and directed to enter into a contract with the said party of the second part, for the occupation by it of the buildings erected or to be erected on that portion of the Central Park in the City of New York, known as Manhattan Square, and for transferring thereto and establishing and maintaining therein its museum, library and collections, and carrying out the objects and purposes of said party of the second part; and,

Whereas, a building contemplated by said act has now been erected and nearly completed and equipped in a manner suitable for the purposes of said Museum, as provided in the first section of the Act of May 15, 1875, known as Chapter 351, of the Laws of 1875, for the purpose of establishing and maintaining therein the said Museum, as provided by the said last-named act, and by the Act of April 5, 1871, known as Chapter 290, of the Laws of 1871; and,

Whereas, it is desired as well by the said party of the first part, as by the said party of the second part, that, immediately upon the completion and equipment of said building, the said party of the second part should be established therein, and should transfer thereto its museum, library and collections, and carry out the objects and purposes of the said party of the second part;

Now, therefore, it is agreed by and between the said parties as follows, namely:

First.—That the said party of the first part has granted and demised and let, and doth, by these presents, grant, demise and let, unto the said party of the second part, the said buildings and the appurtenances thereunto belonging, to have and to hold the same so long as the said party of the second part shall continue to carry out the objects and purposes defined in its charter; or such other objects and purposes as by any future amendment of said charter may be authorized; and shall faithfully keep, perform, and observe the covenants and conditions herein contained on its part to be kept, performed and observed, or until the said building shall be surrendered by the said party of the second part, as hereinafter provided.

Secondly.—That neither the party of the first part, its successor or successors, nor the Mayor, Aldermen and Commonalty of the City of New York, shall be in any manner chargeable or liable for the preservation of the said building or the property of the party of the second part which may be placed therein, against fire, or for any damage or injury that may be caused by fire to the said property; but it is agreed that, damages as aforesaid excepted, the said party of the first part will keep said building, from time to time, in repair.

Thirdly.—That as soon after the completion and equipment of said building as practicable, said party of the second part shall transfer to, and place and arrange in said building, its museum, library and collections, or such portion thereof as can be properly displayed to the public therein, and shall have

and enjoy the exclusive use of the whole of said building, subject to the provisions herein contained, and the rules and regulations herein prescribed, during the continuance of the term granted, or until a surrender thereof, as herein provided.

Fourthly.—That the exhibition halls of said building shall, on Wednesday, Thursday, Friday and Saturday of each week, and on all legal or public holidays, except Sundays, be kept open and accessible to the public, free of charge, from nine o'clock A.M. until half an hour before sunset, under such rules and regulations as the party of the second part shall from time to time prescribe; but on the remaining days of the week the same shall be only open for exhibition to such persons, upon such terms as the said party of the second part shall from time to time direct. But all professors and teachers of the public schools of the City of New York, or other institutions of learning in said city, in which instruction is given free of charge, shall be admitted to all the advantages afforded by the said party of the second part, through its museum, library, apparatus, and collections, or otherwise, for study, research and investigation, free of any charge therefor, and to the same extent and on the same terms and conditions as any other persons are admitted to such advantages, as aforesaid.

Fifthly.—That the museum, library and collections, and all other property of said party of the second part, which shall or may be placed in said building, shall continue to be and remain absolutely the property of said party of the second part, and neither the said party of the first part nor the said the Mayor, Aldermen and Commonalty, shall by reason of said property being placed in said building, or continuing therein, have any right, title, property or interest therein; nor shall the said party of the second part, by reason of its occupation and use of said building under this agreement, acquire, or be deemed to have any right, title, property or interest in said building, except so far as expressly granted by this agreement.

Sixthly.—That the said party of the second part shall, on or before the first day of May, in every year, during the con-

tinuance of this agreement, submit to the said party of the first part, its successor or successors, a detailed printed report of the operations and transactions of the said party of the second part, and all its receipts and payments, for the year ending with the 31st day of December next preceding.

Seventhly.—That said party of the first part shall have, at all times, access to every part of the said building for general visitation and supervision, and also for the purpose of the performance of the duties devolved upon it by the laws of the State of New York, or of the City of New York. That the police powers and supervision of said party of the first part shall extend in, through and about said building. That the said party of the second part may appoint, direct, control and remove all persons employed within said building, and in and about the care of said building, and the museum, library and collections therein contained.

Eighthly.—That said party of the second part may, at any time, after the expiration of three, and before the expiration of six months from the date of the service of a notice in writing to said party of the first part, its successor or successors, or to the Mayor of the City of New York, of its intention so to do, quit and surrender the said premises and remove all its property therefrom; and upon and after such notice, the said party of the second part shall and will, at the expiration of the said six months, quietly and peaceably yield up and surrender unto the said party of the first part and its successors all and singular the aforesaid demised premises. And it is expressly understood and agreed by and between the parties hereto that if the said party of the second part shall omit to do, perform, fulfill or keep any or either of the covenants, articles, clauses and agreements, matters and things herein contained, which on its part are to be done, performed, fulfilled or kept, according to the true intent and meaning of these presents, then and from thenceforth this grant and demise shall be utterly null and void. And in such case it shall and may be lawful for said Department to serve or cause to be served on the said party of the second part a notice in writing declaring that the said

grant hereinbefore made has become utterly null and void and thereupon the said party of the first part, its successor or successors (ninety days' time being first given to the said party of the second part to remove its property therefrom), may reënter, and shall again have, repossess and enjoy the premises aforementioned, the same as in their first and former estate, and in like manner as though these presents had never been made, without let or hindrance of the said party of the second part, anything here contained to the contrary notwithstanding.

Ninthly.—And it is further expressly understood and agreed, by and between the parties hereto, that this agreement may be wholly canceled and annulled, or, from time to time, altered, or modified, as may be agreed, in writing, between the said parties, or their successors, anything herein contained to the contrary in anywise notwithstanding.

In witness whereof, the party of the first part hath caused this agreement to be executed by their President and Secretary, pursuant to a resolution of the Board of Commissioners of said Department, adopted at a meeting held on the thirtieth day of January, in the year of our Lord one thousand eight hundred and seventy-eight; and the said party of the second part hath caused the same to be executed by their President, and their official seal affixed thereto, pursuant to a resolution of the Trustees of the American Museum of Natural History, adopted at a meeting held on the twelfth day of February, in the year of our Lord one thousand eight hundred and seventy-seven.

In presence of
D. PORTER LORD.

JAMES F. WENMAN,
*President Department of Public Parks
of the City of New York.*

WILLIAM IRWIN,
*Secretary Department of Public Parks
of the City of New York.*

ROBERT L. STUART,
*President American Museum of
Natural History.*

STATE OF NEW YORK, }
 City and County of New York, } ss. :

On this 12th day of February, in the year 1878, before me personally came James F. Wenman, President of the Department of Public Parks of the City of New York, and William Irwin, Secretary of the said Department of Public Parks, with both of whom I am personally acquainted, and both of whom being by me duly sworn, said that they reside in the City and County of New York ; that the said James F. Wenman is the President, and the said William Irwin is the Secretary of the said Department of Public Parks, and that they signed their names to the foregoing agreement by order of the Board of Commissioners of the said Department of Public Parks, as such President and Secretary.

[SEAL.]

W. C. BESSON,
 (73) *Notary Public N. Y. Co.*

STATE OF NEW YORK, }
 City and County of New York, } ss. :

On this 12th day of February, in the year 1878, before me personally came Robert L. Stuart, the President of the American Museum of Natural History, with whom I am personally acquainted, who being by me duly sworn, said that he resides in the City and County of New York, that he is the President of the American Museum of Natural History, and that he knows the corporate seal of said museum, that the seal affixed to the foregoing agreement is such corporate seal, that it is affixed thereto by order of the Board of Trustees of said American Museum of Natural History, and that he signed his name thereto by the like order, as President of said Museum.

[SEAL.]

W. C. BESSON,
 (73) *Notary Public N. Y. Co.*

Recorded in the office of the Register of the City and County of New York in Liber 1426 of Cons., page 402, February 16, A. D. 1878, at 9 o'clock A.M., and examined.

Witness my hand and official seal,

[SEAL.]

FREDERICK W. LOEW,
Register.

NOTE.—July 25, 1892, by consent of the Trustees, section fourth was modified to enable the Trustees to open the Museum free to the public "throughout the year, excepting Mondays, but including Sunday afternoons and two evenings of each week."

June 29, 1893, by consent of the Trustees, section fourth was modified to enable the Trustees to open the Museum free of charge to the public "throughout the year for five days in each week, one of which shall be Sunday afternoon, and also two evenings of each week."

CONSTITUTION
OF THE
AMERICAN MUSEUM OF NATURAL HISTORY,
IN THE CITY OF NEW YORK.

ARTICLE I.

This Corporation shall be styled THE AMERICAN MUSEUM OF NATURAL HISTORY.

ARTICLE II.

The several persons named in the charter, and such others as they may add to their number, which shall not exceed twenty-five in all at one time, shall be the Trustees to manage the affairs, property and business of the Corporation.

The members of the Board of Trustees holding office at the time of the regular quarterly meeting of November, 1905, shall then, or at the first meeting of the Board thereafter, be divided by lot into five classes of five members each, to serve for the terms of one, two, three, four and five years respectively from the date of the annual meeting of February, 1906. The Board of Trustees at each annual meeting thereafter, or an adjournment thereof, shall by ballot, by a majority vote of the Trustees present at the meeting, elect five Trustees to supply the places of the class whose term expires at that meeting; said newly elected Trustees to hold office for five years or until their successors are elected. In case of a vacancy in the Board by death, resignation, disqualification or otherwise, the vacancy shall be filled by ballot, in like manner, by the Board of Trustees at any regular meeting or special meeting, for the unexpired term. No person shall be eligible for election as Trustee who shall not be a "Patron" of the Museum, unless by a unanimous vote of a quorum of the Board, nor be

eligible unless his name shall be presented by the Nominating Committee at a regular or special meeting of the Board previous to the meeting at which his name shall be acted upon. Written notice of such election and the vacancy to be filled shall be sent to the Trustees at least one week prior to said meeting.

ARTICLE III.

The Trustees shall meet quarterly, on the second Monday of every February, May, August and November, at an hour and place to be designated, on at least one week's written notice from the Secretary, and shall annually, at the quarterly meeting in February, elect the officers and committees for the ensuing year. They shall also meet at any other time to transact special business on a call of the Secretary, who shall issue such call whenever requested so to do, in writing, by five Trustees, or by the President, and give written notice to each Trustee of such special meeting, and of the object thereof, at least three days before the meeting is held.

ARTICLE IV.

SECTION 1. The officers of said Corporation shall be a President, a First Vice-President, a Second Vice-President, a Treasurer and a Secretary. The President and Vice-Presidents shall be elected from among the Trustees. The Treasurer and Secretary may or may not be chosen from such Trustees. These officers shall be elected by ballot, and the persons having a majority of the votes cast shall be deemed duly elected. They shall hold their offices for one year or until their successors shall be elected.

SEC. 2. The Board of Trustees shall appoint each year, in such manner as it may direct, the following Standing Committees: an Executive Committee, an Auditing Committee, a Finance Committee, a Nominating Committee. These Committees are all to be elected from the Trustees, and the members shall hold office for one year or until their successors shall be elected.

The Board of Trustees shall also have authority to appoint such other committees or officers as they may at any time deem desirable, and to delegate to them such powers as may be necessary.

ARTICLE V.

SECTION 1. The President shall have a general supervision and direction over the affairs of the Corporation, and shall preside at all the meetings of the Museum and of the Trustees. In his absence or inability to act, the First or Second Vice-President shall act in his place.

SEC. 2. The Secretary shall be present, unless otherwise ordered by the Board, at all the meetings of the Museum and Trustees, of the Executive Committee and such other Committees as the Board may direct. He shall keep a careful record of the proceedings of such meetings, shall preserve the seal, archives and correspondence of the Museum, shall issue notices for all meetings of the Trustees and various committees, and shall perform such other duties as the Board may direct.

The Board of Trustees shall have power to appoint an Assistant Secretary, who, under its direction, shall perform the duties of the Secretary in his absence or inability to act.

SEC. 3. The Treasurer shall receive and disburse the funds of the Museum. He shall report in writing, at each quarterly meeting of the Trustees, the balance of money on hand, and the outstanding obligations of the Museum, as far as practicable; and shall make a full report at the annual meeting of the receipts and disbursements of the past year, with such suggestions as to the financial management of the Museum as he may deem proper.

SEC. 4. The accounts of the Museum shall be kept at the General Office, in books belonging to it, which shall at all times be open to the inspection of the Trustees.

These accounts shall be under the care of an Assistant Treasurer, who shall be appointed by the Board of Trustees and be under its direction. He shall give such bonds for the faithful performance of his duties as the Board may direct.

SEC. 5. The offices of Secretary and Assistant Treasurer may be held by the same person.

ARTICLE VI.

The Executive Committee shall consist of nine Trustees, of whom the President, First and Second Vice-Presidents and Treasurer, in case he be a Trustee, shall be four, and five other members to be appointed each year in the manner provided in Article IV. They shall have the control and regulation of the collections, library and other property of the Museum; and shall have power to purchase, sell and exchange specimens and books, to employ agents, to regulate the manner and terms of exhibiting the Museum to the public, and generally to carry out in detail the directions of the Trustees; but the Executive Committee shall not incur any expense or liability for the Museum exceeding two thousand dollars at one time, or exceeding in all ten thousand dollars, in the interval between the quarterly meetings of the Trustees, without the express sanction of the Trustees. Five members of the Committee shall constitute a quorum for the transaction of business.

ARTICLE VII.

The Auditing Committee shall consist of three Trustees. They shall have the books of the Museum duly audited, at least once in six months, by an authorized public accountant to be selected by them.

No bills shall be paid unless approved, in writing, by the President, the Chairman of the Executive Committee, or the Director.

ARTICLE VIII.

The Finance Committee shall consist of four Trustees, including the Treasurer in case he be a Trustee. They shall have general charge of the moneys and securities of the Endowment and other permanent funds of the Museum, and such real estate as may become the property of the Corporation, with authority to invest, sell and reinvest the same, subject to the approval of the Board of Trustees.

ARTICLE IX.

The Nominating Committee shall be composed of three Trustees, to whom shall be first submitted the names of any persons proposed as candidates for election to membership in the Board of Trustees. The Committee shall report on such candidates from time to time, as it may deem to be for the interest of the Museum. A fortnight before the annual meeting they shall prepare and mail to each member of the Board of Trustees a list of five candidates to be elected by ballot at the said meeting.

ARTICLE X.

The President shall be a member, *ex-officio*, of all standing committees.

ARTICLE XI.

Nine Trustees shall constitute a quorum for the transaction of business, but five Trustees meeting may adjourn and transact current business, subject to the subsequent approval of a meeting at which a quorum shall be present.

ARTICLE XII.

By-Laws may be made from time to time by the Trustees providing for the care and management of the property of the Corporation and for the government of its affairs, and may be amended at any meeting of the Trustees by a vote of a majority of those present, after a month's notice in writing of such proposed amendment.

ARTICLE XIII.

The contribution of \$1,000 or more to the funds of the Museum, at any one time, shall entitle the person giving the same to be a Patron of the Museum, who shall have the right in perpetuity to appoint the successor in such patronship.

The contribution of \$500, at one time; shall entitle the person giving the same to be a Fellow, who shall have the right to appoint one successor in such fellowship.

No appointment of a successor shall be valid unless the same shall be in writing, endorsed on the certificate, or by the last will and testament.

The contribution of \$100, at one time, shall entitle the person giving the same to be a Life Member.

Any person may be elected by the Trustees to either of the above degrees, who shall have given to the Museum books or specimens, which shall have been accepted by the Executive Committee, or by the President, to the value of twice the amount in money requisite to his admission to the same degree, and the President and Secretary shall issue diplomas accordingly under the seal of the Museum.

The Trustees may also elect Honorary Fellows of the Museum in their discretion.

ARTICLE XIV.

Any person who has held the office of President for ten or more successive years may be elected by the Trustees as Honorary President for life.

ARTICLE XV.

No alterations shall be made in this Constitution, unless at a regular quarterly meeting of the Trustees, or at a special meeting called for this purpose; nor by the votes of less than a majority of all the Trustees; nor without notice in writing of the proposed alteration, embodying the amendment proposed to be made, having been given at a regular meeting.

BY-LAWS.

I.

Patrons, giving \$1,000, are each entitled to 1 Subscriber's Ticket, 5 Complimentary Season Tickets and 10 Tickets for a single admission.

Fellows, giving \$500, are each entitled to 1 Subscriber's Ticket and 10 Tickets for a single admission.

Life Members, giving \$100, are each entitled to 1 Subscriber's Ticket and 5 Tickets for a single admission.

Annual Members, paying \$10 yearly, are each entitled to 1 Subscriber's Ticket and 2 Tickets for a single admission.

[NOTE.—A Subscriber's Ticket admits two persons to the Museum on reserve days (Mondays and Tuesdays), and to all Receptions and Special Exhibitions, and may be used by any member of the Subscriber's family.

The Single Admission Tickets admit the bearers to the Museum on reserve days (Mondays and Tuesdays), and are issued to Subscribers for distribution among friends and visitors.]

II.

Any Trustee who shall fail to attend three consecutive Regular Quarterly Meetings of the Board shall cease to be a Trustee, unless excused by the Board.

III.

No indebtedness (other than for current expenses) shall be incurred by any committee, officer or employee of the Museum, except as provided for in the Constitution. Any desired additional expenditure shall first receive the approval of the Board of Trustees.

IV.

If any Trustee shall accept a salary from this Corporation he shall thereby be disqualified for the time being from acting

as a Trustee thereof; provided, that the Board of Trustees shall have power to suspend the operation of this law in any special case.

V.

Any vacancies occurring in the membership of the several committees during the interval between the regular meetings of the Board of Trustees may be filled at a regular meeting of the Executive Committee, until the next meeting of the Board.

VI.

All bequests or legacies, not especially designated, shall hereafter be applied to the *Permanent Endowment Fund*, the interest only of which shall be applied to the use of the Museum as the Board shall direct.

VII.

At such times as it may be impracticable to obtain the services of the members of the Auditing Committee, the members of the Executive Committee may act in their place and stead.

THE MAINTENANCE APPROPRIATION.

BY THE LEGISLATURE, 1905.

CHAP. 292.

AN ACT to authorize a further appropriation for the maintenance of the American Museum of Natural History in the Central Park of the City of New York.

ACCEPTED BY THE CITY.

Became a law, April 22, 1905, with the approval of the Governor. Passed, three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The Board of Estimate and Apportionment of the City of New York may annually in its discretion include in the budget for the then next ensuing financial year a sum not exceeding forty thousand dollars to be applied by the Department of Parks of said city through the Commissioner of Parks for the Boroughs of Manhattan and Richmond for keeping, preparing, preserving and exhibiting the collections in the buildings in the Central Park in the said city that are now or hereafter may be occupied by the American Museum of Natural History in addition to the sum or sums now authorized by law for such purposes.

Sec. 2. This act shall take effect immediately.

STATE OF NEW YORK, }
Office of the Secretary of State. } ss.:

I have compared the preceding with the original law on file in this office, and do hereby certify that the same is a correct transcript therefrom and of the whole of said original law.

(Signed) JOHN F. O'BRIEN,
Secretary of State.

FOR THE COMPLETION OF THE CONSTRUCTION OF
THE UNFINISHED PORTIONS OF THE BUILDING.

LEGAL ENACTMENTS OF 1903.

BY THE BOARD OF ALDERMEN.

AN ORDINANCE providing for an issue of Corporate Stock in the sum of one hundred and eighty-eight thousand dollars (\$188,000), to provide means for the completion of the construction of the unfinished portions of the American Museum of Natural History Building in the Borough of Manhattan.

Be it ordained by the Board of Aldermen of the City of New York, as follows:

SECTION 1. The Board of Aldermen hereby approves of and concurs in the following resolution, adopted by the Board of Estimate and Apportionment May 8, 1903, and authorizes the Comptroller to issue Corporate Stock of the City of New York to the amount and for the purposes therein specified:

"Resolved, That, pursuant to the provisions of Section 47 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the issue of Corporate Stock of The City of New York, to an amount not exceeding one hundred and eighty-eight thousand dollars (\$188,000) to provide means for the completion of the construction of the unfinished portions of the American Museum of Natural History Building in the Borough of Manhattan, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue Corporate Stock of The City of New York, in the manner provided by Section 169 of the Greater New York Charter, to an amount not exceeding one hundred and eighty-eight thousand dollars (\$188,000), the proceeds whereof shall be applied to the purposes aforesaid."

Adopted by the Board of Aldermen June 16, 1903, a majority of all the members elected voting in favor thereof.

Approved by the Mayor June 22, 1903. (Signed) P. J. SCULLY, *Clerk*.

Contracts awarded to December 31, 1905.

For the completion and construction of Corridors and Approaches to the Power Wing, and the Heating, Lighting and Ventilation of same for The American Museum of Natural History.

Contract awarded Richard L. Walsh Company, September 31, 1904, \$52,355.

APPROPRIATION AND EXPENDITURES MADE THEREFROM
DECEMBER 31, 1904, TO DECEMBER 31, 1905.

APPROPRIATION:

By Balance January 1, 1905. \$54,822.97

EXPENDITURES:

To Richard L. Walsh Company. \$52,355 00

To Charles Volz. 1,096 91 \$53,451 91

Balance January 1, 1906. \$1,371 06

FOR THE EQUIPPING AND FINISHING OF THE
BUILDING AND THE CONSTRUCTION OF
ADDITIONS THERETO.

LEGAL ENACTMENTS OF 1905.

BY THE BOARD OF ALDERMEN.

AN ORDINANCE providing for an issue of Corporate Stock in the sum of five hundred thousand dollars (\$500,000), to provide means for the equipping and finishing of The American Museum of Natural History in Manhattan Square, Borough of Manhattan, and the construction of additions thereto.

Be it ordained by the Board of Aldermen of the City of New York as follows:

SECTION I. The Board of Aldermen hereby approves of and concurs in the following resolution adopted by the Board of Estimate and Apportionment March 16, 1905, and authorizes the Comptroller to issue Corporate Stock of The City of New York to the amount and for the purposes therein specified:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended by chapter 409 of the Laws of 1904, the Board of Estimate and Apportionment hereby approves of the issue of Corporate Stock of The City of New York, to an amount not exceeding five hundred thousand dollars (\$500,000), to provide means for the equipping and furnishing of The American Museum of Natural History in Manhattan Square, Borough of Manhattan, and the construction of additions thereto, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue Corporate Stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding five hundred thousand dollars (\$500,000), the proceeds whereof to be applied to the purposes aforesaid."

Adopted by the Board of Aldermen April 11, 1905, a majority of all the members elected voting in favor thereof.

Approved by the Mayor April 18, 1905. (Signed) P. J. SCULLY, *Clerk*.

Contracts awarded to December 31, 1905.

For the erection of Fire Lines, Sprinkler System, Fire Escapes, etc.

Contract awarded R. J. F. Gerstle Company, November 26, 1905, \$19,838.

APPROPRIATION AND EXPENDITURES MADE THEREFROM
TO DECEMBER 31, 1905.

APPROPRIATION:

By Direct Appropriation..... \$500,000 00

EXPENDITURES:

Museum orders.....\$5,253 37

Carpenters' Payroll, etc..... 4,167 38 9,420 75

Balance January 1, 1906..... \$490,579 25

In Memoriam.

At the Regular Quarterly Meeting of the Board of Trustees of The American Museum of Natural History, held May 8, 1905, the following Minute was adopted:

The Trustees of The American Museum of Natural History record with profound sorrow and regret the loss of their esteemed friend and associate,

ADRIAN ISELIN.

Mr. Iselin aided in the preliminary efforts to establish the Museum; was one of its original incorporators in 1869, and served as a Trustee during a period of thirty-six years.

Mr. Iselin rendered efficient service for many years as a member of the Executive, Finance, and Auditing Committees, and was ever faithful in the discharge of his duties as a Trustee. In later years his failing health prevented his regular attendance at the meetings of the Board, greatly to the regret of his associate Trustees, but his interest in the growth and advancement of the Museum was unrelaxed, and was evinced by his generous contributions for the enlargement of its collections and for its maintenance. In his death the Museum suffers a great loss.

Mr. Iselin belonged to the class of public spirited citizens, who find in the promotion of the public welfare and in the full discharge of their duties to their fellow-men, ample reward for their conscientious efforts, and who leave after them a loving remembrance of good deeds unpretentiously performed.

At the Adjourned Meeting of the Board of Trustees of The American Museum of Natural History, held February 8, 1906, the following Minute was adopted:

The Trustees desire to record their sense of loss in the death of

JOHN H. WINSER

for so many years the faithful Secretary and Assistant Treasurer of the Museum.

Mr. Winsor was appointed to his office in 1892, and for fourteen years served the Board of Trustees and the officers of the staff of the Museum with the greatest fidelity. He was invariably accurate in all his accounts and records, absolutely trustworthy in all matters of administration, devoted to the best interests of the Museum, giving its interests his very constant thought and attention, and extremely courteous and kindly in his manner. When acting under the direction of the President or other members of the Board he could always be depended upon to faithfully represent their wishes and instructions. During all the long years of his service he never failed to do his duty to the best of his ability. His genial and kindly presence will be greatly missed at the Museum.
